Under-Secy. to the Govt of Bengal.

DEVELOPMENT OF CALCUTTA.

GOVERNMENT OF BENGAL.

MUNICIPAL DEPARTMENT.

Municipal.

DARJEELING, THE 24TH MAY 1920.

RESOLUTION No. 84T.—M.

IN introducing the Calcutta Rent Bill in the Bengal Legislative Council, the Hon'ble Maharajadhiraja Bahadur of Burdwan stated that Government realized that legislation for the restriction of rents was in itself not sufficient to solve the housing problem in Calcutta and that Government were considering the adoption of further measures for the improvement of existing conditions. At present, one of the chief obstacles to the expansion and development of Calcutta is the difficulty which building societies and companies experience in obtaining land and securing a firm title. It was on this account that the Calcutta Rents Committee recommended that Government should utilize the provisions of the Land Acquisition Act to acquire land for bodies which had been formed definitely for the provision of housing accommodation. There is evidence that private enterprise is prepared to take up housing schemes provided that it is granted reasonable facilities for the acquisition of land; and Government have accordingly decided to accept the recommendation of the Committee and to acquire land under the Land Acquisition Act on behalf and at the cost of registered companies formed for housing purposes whose schemes are approved by Government, so long as emergent measures are necessary for the development of Calcutta. In order to give effect to this decision, an officer will be placed on special duty, under the title of Development Commissioner, who will be required to examine the schemes put forward by private companies, to obtain full information about them and to advise Government whether land should be acquired and, if so, upon what conditions. It will also be the duty of this officer to ascertain whether Government or any local authority or railway has proposals in view or work in hand which may affect or be affected by the building schemes proposed. For this purpose, he will be a member of the Calcutta Public Works Conference, which contains representatives of Government, the Railways, the Corporation of Calcutta, the Calcutta Improvement Trust, the Port Commissioners and six suburban municipalities. Each scheme will be considered by Government on its merits and with reference to its public utility, and if accepted by Government, such conditions will be imposed as will safeguard the interests of the public, for while Government are of opinion that the existing shortage of houses in Calcutta and its neighbourhood justifies them in making use of the provisions of the Land Acquisition Act for the purpose of making good the deficiency in the interests of the public at large, it is equally clear to them that they would not be justified in using the Act in furtherance of speculative schemes whose primary object is that of enriching their promoters. Pending the appointment of the special officer above referred to, applications from those desirous of having land acquired for building purposes in Calcutta or its neighbourhood should be made to the Collector of Calcutta.

By order of the Governor in Council,

L. S. S. O'MALLEY,
Secy. to the Govt. of Bengal.

ANNUAL REPORT

OF THE

ROYAL BOTANIC GARDEN AND THE GARDENS IN CALCUTTA AND OF THE LLOYD BOTANIC GARDEN, DARJEELING, FOR 1919-20.

ROYAL BOTANIC GARDEN.

1. **General.**—Weather conditions during the latter half of the year were somewhat abnormal and the rainfall excessive. On one occasion seven inches of rain fell over night and, accompanied by heavy squalls, accounted for the downfall of several trees by the edges of flooded tanks. Except where the damage involved a species not elsewhere represented in the garden or a tree forming an integral part of a scenic group, the loss was negligible, for parts of the garden suffer already from overcrowding and the elimination of a few trees here and there may be regarded with equanimity. The garden fortunately escaped the cyclone which caused such damage to trees and dwellings in the eastern part of Bengal during November.

The three new vistas referred to in last year's report have resulted in a great improvement to the garden. Their directions were carefully selected, to some extent defined by the trees which could most conveniently be spared, and to the necessity of maintaining the requisite amount of shade. The result is evident in a much more open, park-like appearance and the improvement effected could, with advantage, be paralleled by experiments on similar lines in other parts of the garden.

The year has been particularly well suited for cold weather annuals, the display of these being unrivalled in the writer's experience of the garden. In addition to raising the usual variety of annuals, the experiment of transporting established plants from the hills at the beginning of the cold weather was rendered possible through the services of Mr. H. F. Green, Manager of the Government Cinchona Plantation, Munsong. The species with which the greatest degree of success was attained were *Primula obconica* and *malacoides* and a variety of *Begonia semperflorens*. The presence in the garden of plants usually seen in India in the hills only added greatly to the attractiveness of the collection. To those who love gardening and who are fortunate enough to be able to get established material from the hills the experiment can be confidently recommended.

The display of Orchids during March and April was up to the usual standard and formed one of the principal attractions to visitors.

About fifty young trees and shrubs were planted out during the year, twenty-three of which were species new to the garden.

Labour during the early part of the year was concentrated on the building of walls and rivetments along the river bank. In a few years time this work may be expected to engulf a smaller percentage of the garden allotment, but for the present it must continue to be a heavy drain on garden funds, for the river takes yearly toll of the bank and it will be some years before the substantial type of structure now being built can be completed. With this constant drain on funds much could not be attempted in the way of garden improvement proper. Though such improvement is much to be desired, industrial development on the right bank with its increasing demand for labour at post-war rates further sets a limit to what the officers responsible for the state of the garden can accomplish. During the latter part of the year garden labour was reduced to about half its normal strength.

2. **Plant and Seed Exchange.**—Over 40,000 young trees and shrubs were distributed to the Public Works Department, District Boards, Municipalities, Railways, etc., and some 2,200 were received by the garden, during the year. Two thousand three hundred packets and 135 lbs. of seed, mostly of trees and shrubs, were distributed within and outside India. The seed went chiefly to Government or other institutions or to private parties throughout the British Empire. A considerable quantity including palm seed went to Delhi, where in spite of difficult soil and adverse climatic conditions, it is being successfully applied in arboricultural development work. Over 400 packets and 60 lbs. of seeds were received by the garden, exclusive of two barrels of Mahogany seed from Kew.

3. **Herbarium and Library.**—Work was carried out along the usual lines throughout the year, aid in herbarium work being given by Messrs. Debbarman and Narayanaswami, of the Botanical Survey Department.

Accessions to the herbarium number over 6,000 sheets the largest collection being one of middle and West Himalayan flowering plants and ferns. Distributions number between 2,000 and 3,000 in addition to over 9,000 sheets sent on loan for work at Kew. Since the termination of the war increased numbers of individual workers have asked to be supplied with material to work on. In addition to material for work on the flora of Madras and on the Euphorbiaceæ the Sibpur representatives of some thirty genera have been out on loan to various institutions or individuals.

Less than the usual number of book additions was made to the library on account of supplies ordered from London either not being available or the orders being left unattended to. Periodicals and reports over 200 in number have been added, but the expenses of binding and the difficulty of obtaining binding material have interfered with their being properly deposited in the library.

4. **Publications.**—Volume XII, Part II of the Annals of the Royal Botanic Garden, being Signor Beccari's account of the Lepidocaryeæ palms, is now complete in letter-press and plates and will be distributed during the current year.

5. **Financial.**—The total revenue was Rs. 3,842-12, being Rs. 2,842-12 above the sanctioned estimate. The excess is due to the temporary letting out of the garden foreshore below high-water mark for timber storing purposes. Revenue proper, being the sale-proceeds of seeds and plants, amounted to Rs. 550-4. The total expenditure under establishment and contingencies was Rs. 1,10,244-15-2. There was an excess expenditure of Rs. 2,861-13-3 under establishment, and a saving of Rs. 1,534-11-7 under contingencies.

6. **Staff.**—Lieutenant-Colonel A. T. Gage, I.M.S., was in charge of the gardens as Superintendent from 1st April to 10th October 1919, after which he went on combined leave being relieved by Mr. C. C. Calder, who continued to act, in addition to his own duties, till the end of the official year. Mr. G. T. Lane was Curator of the Garden till 17th July 1919, when he went on combined leave. His relief, Mr. P. V. Osborne, was in charge thereafter till the end of the year. Messrs. Mitra and Jones were Overseers, the former throughout the year, the latter on his return from military duty on 7th January 1920. Babu Devendranath Basu was Head Clerk throughout year.

CALCUTTA GARDENS.

Work in these gardens was mostly of a routine character. Great damage was done to the Eden Gardens during the Peace Celebration Mêla and the usual display of annuals was much delayed. A special grant was provided by the Mêla Committee for repairs, but the ride and lawns will require the monsoon drenching before one can hope to see them in their former condition. All these gardens are suffering not only from a shortage of labour, but from the inferior type of labour which a pre-war rate of wage draws.

Mr. S. Basu officiated as Assistant Curator in charge and Babu K. C. Maity as Overseer throughout the year, and both performed their duties conscientiously.

There was a saving of Rs. 5,543-13-6, almost entirely on salaries and establishment. Sums collected and paid into the Bank of Bengal as revenue amounted to Rs. 440.

LLOYD BOTANIC GARDEN, DARJEELING.

The excellent state of this garden lies to the credit of Mr. G. H. Cave. During a year characterised by difficulties both of a general and of a local character, the work has been carried forward with resource and ability. Epidemics among the labour force, enforced shortage of garden stores and the effects of adverse weather conditions have all successfully been overcome. The garden is a credit to Darjeeling and it is a pleasure to enter it.

About thirty plants, comprising as many species new to the garden, were added to the permanently planted out collections of trees and shrubs. Some 3,497 plants, 3,882 dozen seedlings of annuals, 386 bulbs and over 12,000 packets of seed were distributed.

Records at the gate show the popularity of the garden as an institution where recreation and educational pursuits can be combined. Over 60,000 persons visited it throughout the year.

The "Guide to the Lloyd Botanic Garden," an index to the contents of the garden, arranged both numerically and according to a natural system of classification, is being brought up-to-date and photographic illustrations prepared with a view to publication. There was a small saving of Rs. 176-2-5 out of a total annual allotment of Rs. 16,000 for upkeep.

for *Commissioner, Presidency Division.*

CALCUTTA, *the 29th May 1920.*

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 20th May 1920.

Summary.—During the week light to moderate rain was general almost throughout the province. More rain is, however, needed in parts of West and North Bengal. Sowing of jute and autumn paddy continues in West Bengal; weeding is proceeding in North and East Bengal. Ploughing of fields for winter rice is in full swing. Sowing for seedlings have commenced. Prospects of standing crops are generally satisfactory. The average price of common rice for the province has risen by about 2·45 per cent. as compared with that of the previous week.

Serial No.	District and subdivision.	Rainfall.	Price of common rice, in seers per rupee.		Character of the weather, condition of crops, etc.
			This week.	Previous week.

RESOLUTION REVIEWING THE WORK OF THE ANTI-HOOK-WORM CAMPAIGN IN BENGAL.

GOVERNMENT OF BENGAL.

MUNICIPAL DEPARTMENT.

Sanitation.

DARJEELING, THE 31ST MAY 1920.

RESOLUTION No. 38T.—San.

ENQUIRY having shown the prevalence of hookworm infestation (ankylostomiasis) among the people of Bengal, His Excellency Lord Ronaldshay, towards the end of 1918, called together a conference of the Sanitary Board, members of District Boards and representatives of the jute, coal and tea industries and other interests, and invited their advice as to the measures to be taken to fight against the disease. It was then resolved that a campaign on comprehensive lines should be undertaken in the mills and other industrial concerns near Calcutta, in the tea gardens and collieries, on the railways and in selected rural areas. In accordance with the recommendations of the conference, Government appointed three special officers, with a subordinate staff, to supervise and direct operations. A year has now passed since their appointment, and the Governor in Council desires to review the results of the work which has been done.

2. **Mill area and railways.**—In the mill area, work was at first impeded by ignorant suspicion on the part of the operatives, who imagined that the arrangements were part of an insidious scheme connected with the Rowlatt Act and that persons suffering from the disease would be discharged; but this spirit of distrust was gradually overcome. The Governor in Council desires to take this opportunity to acknowledge cordially the assistance given by the staff of the Titagarh, Empire and Kelvin mills, to whose co-operation is due much of the success which attended the initiation of the campaign in the mill area. A striking instance of appreciation of the beneficial results of treatment is that of a man whose son, a boy six years' old, was suffering from the debility characteristic of ankylostomiasis. The boy's health improved so much after one treatment with thymol that his father refused to bring him again because his appetite had grown so keen that he could hardly manage to satisfy it. A high ratio of infestation has been detected, the percentage in one month being 75 in one mill and 92 in another: in a third mill it was found that even among skilled artisans, who mostly wore boots, as many as 35 per cent. were infected. During the first four months of the present year, 3,112 persons were examined, of whom 81·5 per cent. were found to be infected.

Laboratories for the examination of patients have been started at the Titagarh, Kelvin, Empire, Kinnison, Barnagore and Khardah mills and at the Howrah General Hospital, the last being selected because it is in the vicinity of a number of mills and factories. Arrangements have also been made by the Anglo-Indian Jute Mill for work on lines laid down by the special officer (Dr. McVail); while a laboratory, with a dispensary attached, on a plan approved by Dr. McVail is being constructed by the Russa Engineering Company. Training has been given to sub-assistant surgeons from the Bengal-Nagpur Railway and the ordnance factories at Cossipore, Ishapore and Dum-Dum. The chief medical officer of the Eastern Bengal Railway is arranging for the training of all assistant surgeons and sub-assistant surgeons in charge of railway hospitals, where the detection and

examination of hookworm disease will be made a routine practice. The chief medical officer of the East Indian Railway has applied for a complete set of apparatus, and when this is available, training will be given to officers under him.

The aim from the first has been to utilize the Government staff for initiating work and training the local staff, so that the managing authorities of the different concerns may take up anti-hookworm work themselves. It is impossible for the Government staff to open laboratories at all the centres where they are needed, and if the movement is to be extended, it will be necessary for the concerns, which will benefit by the enhanced efficiency and consequent output of their labour force, to provide laboratories and staff a their own expense.

3. **Tea gardens and colliery areas.**—In the tea gardens, the work of the special officer (Dr. Griffin) was greatly assisted by the Duars Planters' Association, which made a grant of Rs. 1,500 and formed a special committee to deal with matters connected with the campaign. A laboratory was opened at Jalpaiguri and a class started for the training of tea-garden doctors. Altogether 112 attended the first course and 74 the second, and training has now been given to the doctors on the majority of the gardens in the Duars. Lectures and demonstrations in simple hygiene were included in the course, and instruction was given in the diagnosis, cure and prevention of common intestinal parasitic affections. Public lectures were also given, which were so much appreciated that the schoolboys of Jalpaiguri asked for instruction in simple hygienic measures. Their request was gladly acceded to. Treatment for hookworm and other intestinal parasitic diseases is reported to be now general on the European estates, on many of which there had been a certain amount of treatment for some years, though not on fully systematic lines: some of their medical officers now intend to start central laboratories for pathological observation in the districts under their charge. Interest has also been aroused among the managers of Indian-owned gardens, on one of which an anti-hookworm centre has been started; and they are anxious to have their doctors trained and to get advice on water-supply and sanitation.

In the Darjeeling district, where Colonel Clayton Lane's researches had shown the wide prevalence of infection and the great improvement which treatment secures in the efficiency of the labour force, systematic treatment is being carried on in some gardens. Anti-hookworm centres have been started by the Government staff in three tea estates; and endeavours are being made to improve the sanitary arrangements for the labour force. In the colliery area, where the operations have been under the direction of the Mines Board of Health, work has been carried on at the Damudapur Colliery, and investigation is now in progress in the underground workings of the Jamuria Colliery.

Rural areas.—Anti-hookworm operations have been conducted under the direction of Dr. Gupta in the town of Burdwan and some selected villages in the Burdwan district. In order to diffuse knowledge of the disease, hookworm charts have been supplied to the schools, pamphlets have been distributed to the students and to the public, and lectures delivered illustrated by magic lantern slides. Efforts are being made to induce the people to give up the habit of resorting to jungle and waste land for the purposes of nature and to teach them the use of approved and cheap types of pit-privies, while persons found to be infected with hookworm are informed of the fact, and those who are willing to submit themselves to treatment are treated by trained sub-assistant surgeons. Progress is, however, disappointing, as the people are generally ignorant of the gravity of the disease; and it appears that an intensive educative campaign is necessary in order to convince them that hookworm infection is present and is a potent but preventible cause of sickness and debility.

General.—Much has been done in the way of propaganda, for it has been realized from the first that progress must largely depend on the spread among the people of knowledge as to the prevalence of hookworm disease, its effect upon the health and efficiency of the community and the need for taking measures to prevent and reduce infection. A variety of literature, including booklets, pamphlets, leaflets and posters dealing with different aspects of the problem, has been widely circulated. Nearly 100 different lantern slides, illustrating the life-history of the hookworm and various aspects of preventive work, have been prepared, and sets issued to the various centres of work and to local authorities and others interested in the campaign. The extension of the campaign has, however, been impeded by difficulties in obtaining supplies of microscopes and other apparatus. No microscopes or centrifuges could be obtained from the United Kingdom; and it has been only the kindness of the Rockefeller Foundation in New York and its branch in Ceylon that made it possible to obtain the materials necessary for the work which has already been done.

By order of the Governor in Council,

L. S. S. O'MALLEY,

Secy. to the Govt. of Bengal.

RECONSTITUTION OF THE STANDING WATERWAYS ADVISORY COMMITTEE.

GOVERNMENT OF BENGAL.

IRRIGATION DEPARTMENT.

CALCUTTA, THE 1ST JUNE 1920.

RESOLUTION—No. 1514-*I.*

READ—

Resolution No. 3847-I., by the Government of Bengal, Public Works (Irrigation) Department, dated the 28th August 1912.

Minutes of the proceedings of the meeting of the Standing Committee for waterways held on the 16th December 1914.

Minutes of the proceedings of the meeting of the Standing Committee for waterways held on the 14th February 1917.

Bengal Government letter No. 407-I., dated the 11th February 1919, to the Government of India, and

Letter No. 106-*I.*, dated the 3rd April 1920, from the Government of India, Public Works Department, to this Government.

A Standing Committee was appointed in 1906 to inspect periodically the natural and artificial waterways between Calcutta and Eastern Bengal and Assam and to suggest measures of improvement. The Committee was at first composed of three officials and one representative of the steamer companies; and in 1911 one official and three non-official members were added. On the redistribution of the territories of Bengal with effect from the 1st April 1912, the whole position was examined with a view to enlarge and strengthen the existing Committee; and the Bengal Government decided that the Standing Committee should be enlarged, to consist of nine members and the member of the Executive Council in charge of the Public Works Deparment portfolio as President. The Government of Bihar and Orissa and the Administration of Assam were also asked to assist the Committee, should occasion arise, by deputing their Chief Engineers to advise the Committee upon such matters as come under its consideration which directly affect the waterways situated in those provinces.

2. The question of the formation of a Waterways Trust was discussed by the Standing Waterways Committee in 1914 and again in 1917, and it was strongly urged that a Trust should be constituted at an early date. No conclusion, however, was reached, mainly because the Committee were unable to put forward any practical constructive proposals for the establishment of such a Trust on a sound financial basis. In April 1918 the subject was again reopened by the Joint Steamer Companies of Calcutta when they urged among other things the necessity for centralised control in order to ensure greater co-ordination in the matter of river conservancy between the various local Governments concerned. Again in June 1918 the subject of the formation of a Waterways Board, to look after the interest of river transport in India, was raised by a question asked in the House of Commons. After a complete and exhaustive examination of the facts by the Government of Bengal and the Government of India, the following conclusions have been formulated by the Secretary of State for India—

(*i*) that the formation of a Waterways Board for the whole of India is undesirable, and that in present conditions the proposal that a Trust should be constituted to undertake the conservancy and development of the navigable waterways of Bengal, Bihar and Orissa and Assam cannot be entertained; and

(*ii*) that the existing Waterways Committee in Bengal should be continued, but that the sphere of its action should be enlarged by the nomination to it of extra provincial representation.

3. The Governor-in-Council has, therefore, decided in consultation with the Government of Bihar and Orissa and the Administration of Assam, and with the approval of the Government of India to enlarge the sphere of the existing Waterways Advisory Committee by making it possible to have extra provincial representatives. He has, therefore, decided to reconstitute the Standing Waterways Advisory Committee as follows :—

President.

The Member of the Bengal Executive Council in Charge of the Irrigation Branch of the Public Works Department.

Members.

The Chief Engineer, Irrigation, Government of Bengal.

The Chief Engineer, Irrigation, Government of Bihar and Orissa.

The Chief Engineer, Assam Administration.

An official member to be nominated by the Government of Bengal to advise the Committee on financial matters.

The Superintending Engineer, South-Western Circle.

A representative of Railway interests to be nominated by Goverment.

The Vice-Chairman of the Commissioners for the Port of Calcutta.

A member to be nominated by the Calcutta Chamber of Commerce.

A member to be nominated by the Bengal National Chamber of Commerce.

A member to represent the Commercial interests of Eastern Bengal to be nominated by the Narainganj Chamber of Commerce.

A member to be nominated by the Managing Agents of the India General Navigation and Railway Company and the Agents of the Rivers Steam Navigation Company acting jointly.

The Under-Secretary to the Government of Bengal in the Irrigation Department will act as Secretary to the Committee, and the records will be kept in the Bengal Secretariat.

The functions of the Standing Waterways Advisory Committee will be to advise on (*a*) the maintenance and improvement of waterways more specially the Ganges, Brahmaputra, Meghna group of waterways which connect Bengal with Bihar and Orissa on the one side and with Assam on the other ; and (*b*) the regulation of traffic on these waterways.

ORDER.—Ordered that this Resolution be published in the *Calcutta Gazette*, and that a copy thereof be submitted to the Government of India, Public Works Department, for information.

Ordered also that copies of the Resolution be forwarded to the Secretary, Railway Board ; the Government of Bihar and Orissa, Public Works Department ; the Administration of Assam, Public Works Department ; the Finance Department of this Government ; Superintending Engineer, South-Western Circle ; the Vice-Chairman, Port Commissioners, Calcutta ; the Secretary, Bengal Chamber of Commerce, Calcutta ; the Secretary, Naraianganj Chamber of Commerce ; the Secretary, Bengal National Chamber of Commerce, and the Managing Agents, Steamer Companies (India General Navigation and Railway Company and Rivers Steam Navigation Company), Calcutta, for information.

By order of the Governor in Council,

F. A. A. COWLEY,

Secy. to the Govt. of Bengal.

RESOLUTION ON THE TRIENNIAL REPORT ON THE ADMINISTRATION OF THE REGISTRATION DEPARTMENT FOR THE YEARS 1917, 1918 AND 1919.

GOVERNMENT OF BENGAL.

REVENUE DEPARTMENT.

Registration Branch.

DARJEELING, THE 5TH JUNE 1920.

RESOLUTION—No. 1078T.R.

READ—

The triennial report on the administration of the Registration Department for the years 1917, 1918 and 1919.

THE charge of the department was held by the late Inspector-General of Registration, Rai P. N. Mukharji Bahadur, I.S.O., till his retirement on 21st February 1919. His successor the Hon'ble Khan Bahadur Amin-ul-Islam held charge for the rest of the triennial period under review.

2. The most important event of the period was the introduction from May 1919, as an experimental measure, of the system of departmental registrars, already in force in Madras, in a few districts in Bengal. District officers in these districts have been relieved of all their legal and routine duties in connection with registration. The new district registrars are directly under the Inspector-General of Registration. They perform the ordinary duties which they have hitherto performed as district sub-registrars as well as those prescribed for the district registrars, and receive a duty allowance of Rs. 100 per mensem in addition to their pay as district sub-registrars. So far as it has gone, the experiment promises well. It is, however, too soon to make a definite pronouncement as to its success or failure; much also depends upon the personnel of the existing staff. Among other important reforms the following may be noted. The power to transfer and grant leave to sub-registrars has been delegated to the Inspector-General of Registration; and the rules regarding the recruitment of sub-registrars have been modified so as to eliminate direct appointments by Government except in exceptional cases.

3. An improvement of pay of practically the whole staff of the department was effected either during, or at the end of, the period under review. A scheme for the revision of the pay and strength of the ministerial establishment of district headquarters and rural registration offices was partially introduced in 1919 by granting clerks and muharrirs an immediate increase of 20 per cent. on their pay. Full effect has now been given to the scheme from 1st March 1920. The 4th grade on Rs. 175 per mensem in the cadre of district sub-registrars was eliminated, and the total number of appointments has been equally distributed among the remaining three grades on Rs. 200, Rs. 225 and Rs. 250 per mensem. A readjustment of the cadre of sub-registrars has been sanctioned with a view to secure an even flow of promotion throughout the four grades into which the sub-registrars are distributed at present. Sanction has also been accorded to the raising of the pay of probationers from Rs. 30 to Rs. 40 per mensem. A total annual additional expenditure of Rs. 2,12,773 has been incurred in the improvement of pay.

4. The rigid economy exercised on account of the war was continued during the triennium and prevented the adoption of the progressive policy already laid down for the opening of new offices, the construction of buildings for the offices and residences of sub-registrars, and the proper equipment of offices in furniture and iron-safes. The cyclone of September 1919 unroofed many of the registration offices in the affected area. The majority of these were located in unsatisfactory rented buildings, but no material damage occurred except that the records were drenched by the heavy rain. It has, however, emphasised the necessity of replacing the rented houses by substantial Government buildings.

The Mymensingh Registration office was burnt down by an accidental fire on the night of 14th April 1918. All the old records from 1793 consisting of about 35,000 volumes together with the current records were completely lost. Fortunately the gravity of the loss was lessened by the existence of a record-of-rights, which has just been completed for that district, in which the relations between landlord and tenant have been clearly defined.

5. The ordinary work of the department showed practically neither an increase nor a decrease for the whole triennium. It fell slightly in 1917, very largely in 1918, but rose again considerably in 1919. The number of offices open at the end of the triennium under review was 408 against 403 at its commencement. As compared with the preceding triennium, compulsory registrations affecting immoveable property increased by 2·9 per cent., and optional registrations decreased by 1·8 per cent. The total number of registrations under all heads was 4,913,594 in the period under review, showing the remarkably small difference of a decrease of only 216 on the number in the preceding triennium. The receipts of the department

during the past three years amounted to nearly Rs. 62½ lakhs and the expenditure to Rs. 33 lakhs, leaving a surplus of over Rs. 29 lakhs. As compared with the previous triennium the receipts increased by 5·2 per cent., the expenditure by 4·5 per cent., and the surplus by 6·2 per cent.

6. The marked increase in the year 1919, both in the number of, and receipts from, registrations over similar statistics for the year 1918 is attributed generally to high prices and particularly to famine in Bankura, distress in Brahmanbaria, the cyclone in East Bengal, the operations of the Calcutta Improvement Trust, and to speculation in land in Calcutta and in the 24-Parganas. On the other hand, the combined effect of these causes has been so far little more than to restore the normal conditions of the department. It was 1918 which was the abnormal year. Numbers and receipts fell in that year to Rs. $13\frac{9}{10}$ and Rs. $17\frac{8}{10}$ lakhs from Rs. $16\frac{6}{10}$ and Rs. $20\frac{6}{10}$ lakhs, respectively, in 1917 against Rs. $17\frac{7}{10}$ and Rs. $21\frac{4}{10}$ lakhs which would have been normally expected in 1918. It is remarkable that the decrease in 1918, as well as the increase in 1919, has been ascribed to adverse economic factors. This is an illustration of the fact mentioned in the resolution on the working of the previous triennium that the reasons for changes are often obscure. But it is, in the opinion of Government, more than probable that the decrease in 1918 was also largely due to the bountiful harvest which improved the material condition of agriculturists during that year.

7. The total number of appeals under section 72 and applications under section 73 decreased from 5,497 to 5,113. The number of prosecutions under section 83 for making a false denial of execution or false personation and its abetment rose from 86 to 202. No less than 134 cases were instituted in 1919 out of the 202 cases, and 132 cases were disposed of, of which 106 cases ended in conviction. The rules under the Registration Act were amended in 1918 so as to provide that thumb impressions should be taken of illiterate identifiers.

8. The special thanks of the Governor in Council are due to the late Inspector-General of Registration, Rai P. N. Mukharji Bahadur, I.S.O., for his able and efficient administration of the department and for his willing service and valuable assistance during the first two years of the triennium. His thanks are also due to the Hon'ble Khan Bahadur Amin-ul-Islam for his careful and energetic administration of the department since he has assumed the charge.

ORDER.—Ordered that a copy of this resolution be forwarded to the Inspector-General of Registration, Bengal, for information.

Ordered also that a copy of the resolution together with the report be submitted to the Government of India in the Home Department.

Ordered also that a copy of the resolution be forwarded to Rai P. N. Mukharji Bahadur, I.S.O., for his information.

Ordered also that the resolution be published in the *Calcutta Gazette*.

By order of the Governor in Council,

M. C. McALPIN,
Secy. to the Govt. of Bengal.

RESOLUTION ON THE REPORT ON THE ADMINISTRATION OF THE JAIL DEPARTMENT IN THE PRESIDENCY OF BENGAL FOR THE YEAR 1919.

GOVERNMENT OF BENGAL.

POLITICAL DEPARTMENT.

Jails.

CALCUTTA, THE 7TH JUNE 1920.

RESOLUTION—No. 2378P.J.

READ—

The Report on the Administration of the Jail Department in the Presidency of Bengal for the year 1919.

READ ALSO—

The Reports for the years 1918 and 1917 and the resolutions of Government recorded thereon.

THE appointment of the Committee to investigate the system of prison administration in India has naturally overshadowed the working of the jails in Bengal during the past year, and the considered opinion of the Committee on various pending questions is awaited with interest. Any large reforms that may be advocated will, to some extent at least, be dependent on the suitability of the existing jail buildings for their introduction, and the chief defect in Bengal, viz., the overcrowded condition of most of the jails throughout the year, will still continue until more funds can be devoted to the enlargement of existing structures. Admissions in the past year were 4,905 more than in the preceding year, but the situation was relieved by the release of 2,338 prisoners on the occasion of the Peace celebration, and the grant of partial remissions of sentence to 8,000 others; this resulted in the average daily population being reduced to 15,887, or 874 less than in the preceding year.

2. It is satisfactory that the number of jail offences further decreased as compared with the previous year, the ratio of total punishments to daily population being 135 as against 142 in 1918. The penalty of whipping was inflicted in 40 cases, as compared with 42 in the previous year.

3. The year was not a healthy one, though the number of admissions to hospital decreased, and the daily average number of sick was 878 against 963 in the previous year, the death-rate rose from 21·3 to 22·9, the total number of deaths being 365 against 358 or higher than in any of the previous four years. The rise, however, corresponds to a similar rise in the case of the general population, and was largely due to the prevalence of influenza and cholera. Apart from epidemics, scarcity and hardships resulting from the cyclone in Eastern Bengal lowered the stamina of new admissions. Influenza appeared again in an epidemic form, and altogether 2,022 cases occurred, of which 67 proved fatal. The Presidency, Berhampore, Comilla, Barisal and Dacca jails had most cases, although otherwise the Berhampore and Comilla jails showed excellent records. The most unhealthy jails were Burdwan, Khulna, Mymensingh and Malda, and the healthiest Berhampore and Comilla.

4. The popularity of the wheat scale dietary continues. The use of wheat at one daily meal in lieu of rice has extended and considerably more than half the prisoners have now voluntarily adopted this diet. Statistics show that the incidence of bowel complaints is apparently less among them than among those on the ordinary rice diet. The average cost per prisoner on rice diet was Rs. 4-8-7, and on wheat scale diet Rs. 5-2-10.

5. The Juvenile jail at Alipore continues to do good work. The star class system instituted during the last few years has worked fairly well. The school which was started experimentally for the benefit of the inmates of the

jail having proved a success, has been made permanent, and hopeful results in physical and moral training were obtained, jail offences are steadily decreasing. The "Prisoners' Aid Society" and the "After-care Association" whose object is to provide work for juvenile prisoners on release are rendering useful assistance, but there is still much scope for better organisation and more practical sympathy from the public. The value of the quinine sold by the jail during the year amounted to over Rs. 5 lakhs, the profit on which exceeded Rs. 2 lakhs.

6. The outturn of jail manufactures exceeded that of the previous year, and the net cash earnings rose from Rs. 84,589 in the previous year to Rs. 5,31,142 in the year under report. There was a decrease in the outturn and profit of the Presidency Jail owing to the decrease in orders from Government departments. The Midnapore Central Jail was hampered in manufacturing uniforms for the Police Department by delay in receiving materials from the Munitions Board. The manufacture of woollen blankets in the Rajshahi Jail was limited so as not to interfere with the Dacca blanket factory which had ceased to supply blankets to the Military Department.

7. The conduct of the warder staff continued to be satisfactory. There was a slight increase in the number of departmental punishments. Fifty-eight warders resigned against 82 in the previous year. The decrease is satisfactory and is probably due to the sanction given by the Secretary of State to pensions for the warder establishment, but the number of resignations is still high and considerable difficulty is met in recruiting. The improvement in recent years on the conditions of service of the warders appears to have been overtaken by the rise in the cost of living. A scheme for improving the conditions of the jailor service was submitted to the Secretary of State in December 1919, and has been sanctioned since the close of the year.

8. The thanks of the Government are due to Lieutenant-Colonel Thompson for his efficient management of the department. His Excellency in Council has read with pleasure the list of officers who have been commended by the Inspector-General.

ORDER.—Ordered that a copy of this resolution be forwarded to the Inspector-General of Prisons, Bengal, for information.

Ordered that a copy of this resolution and a copy of the report be submitted to the Government of India in the Home Department.

Ordered also that the resolution be published in the *Calcutta Gazette*.

S. N. GHOSH,
for *Commissioner, Presidency Division.*

CALCUTTA, *the 7th June 1920.*

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 3rd June 1920.

Summary.—During the week light showers were reported from a few districts. Rain is urgently needed especially in West Bengal, where agricultural operations are being impeded and standing crops are suffering in places. Sowings of jute and autumn paddy continue slowly in the western districts while weeding is still going on in the eastern districts. Ploughing for and sowing of winter paddy in seed-beds are proceeding. The average price of common rice for the Province has risen by about 2 per cent. as compared with that of the previous week.

Serial No.	District and subdivision.	Rainfall.	Price of common rice, in seers, per rupee.		Character of the weather, condition of crops, etc.
			This week.	Previous week.

	Tamluk ...	Nil	5 5/16	4 3/16	
	Contai ...	Nil	5½	5½	
10	HOOGHLY ...	Nil	4¾	5	Effects of weather on the growth of the crops are unfavourable. Rain is urgently needed. Fodder is sufficient. Price of rice is rising at Serampore and Sadar.
	Serampore ...	Nil	4¾	5	
	Arambagh ...	Nil	5⅛	5⅛	
11	HOWRAH ...	Nil	5 5/16	5	Weather hot. Sowing of paddy and jute is suspended for want of rain. Fodder is sufficient.
	Ulubaria ...	Nil	4¾	5	
12	RAJSHAHI (RAMPUR-BOALIA).	0·03	4⅞	5¼	Prospects of standing crops are favourable. Fodder is sufficient. Cattle-disease is reported from Nator, Lalpur and Bagatipara thanas.
	Naogaon ..	Nil	5½	(a)	
	Nator ...	0·09	4⅞	5½	
13	DINAJPUR ...	Nil	4 3/16	5⅛	More rain is wanted for proper growth of the standing crops. Rice market is rising owing to export. Fodder and water are sufficient.
	Thakurgaon	Nil	6	6	
	Balurghat ...	0·85	5⅛	5½	
14	JALPAIGURI	1·82	5	5½	Prospects of standing crops are fair. Export of rice and paddy is going on, hence the prices are rising. Cattle-disease is reported from places. Fodder and water are sufficient.
	Alipur ...	1·10	5½	5½	

(a) Not reported.

Serial No.	District and subdivision.	Rainfall.	Price of common rice, in seers, per rupee.		Character of the weather, condition of crops, etc.
			This week.	Previous week.	
1	2	3	4	5	6
		Inches.			
15	DARJEELING	0·67	4½	5	Potatoes and maize are progressing. Stocks of rice, fodder and water are sufficient. Cattle-disease is prevalent at places.
	Kurseong ...	0·35	5	(*n*)	
	Siliguri ...	1·40	5	(*n*)	
	Kalimpong...	(*n*)	(*n*)	5	
16	RANGPUR ...	1·15	5	5	Weather hot. Weeding of jute and *aus* paddy continues. Rain is urgently wanted. Hailstorm accompanied by high wind referred to in last week's report now ascertained to have done considerable damage to standing crops, trees and huts in strip 70 miles by five miles in Kurigram, Sadar and Nilphamari subdivisions. Price of rice is rising in places. Prospects of standing crops are fair Fodder and water are sufficient. Cattle-disease is reported from Bhurungamari and Fulbari thanas.
	Nilphamari	Nil	5 7/16	5 7/16	
	Kurigram ...	1·07	4 7/8	5	
	Gaibandha ...	Nil	5	5	
17	BOGRA ...	0·02	4⅞	5	Weeding of jute and *aus* paddy continues. More rain is urgently wanted.
18	PABNA ...	Nil	4⅞	4⅞	Prospects of standing crops are good. Fodder is sufficient.
	Sirajganj ...	0·23	4⅞	4⅞	
19	MALDA ...	Nil	5	5½	Harvesting of *boro* paddy is nearly finished. Standing *bhadoi* paddy and jute are suffering from drought. Fodder and water are sufficient.
20	COOCH BEHAR	2·33	6¼	6⅜	Weather hot. Weeding operations and rearing of *haimanti* seeds in the nursery continue. Cattle-disease is still reported from Mathabhanga. Fodder is sufficient.
21	DACCA ...	0·04	4⅞ / 4⅜*	4½ / 5*	Weather very hot. Weeding of jute and paddy is going on. The jute crop is not thriving well for want of occassional showers. In some places jute plants are infested by insects but this is perhaps insignificant. Price of rice is increasing. Prospects of jute and paddy are fair.
	Manikganj ...	Nil	4½	4½	
	Narayanganj	Nil	4½	4½	
	Munshiganj (*a*)	Nil	4	4	
22	MYMENSINGH	0·29	4⅞	4⅞	Weather too hot. Weeding of jute and *aus* paddy is still going on. Preparation of soil for winter rice has commenced. Prospects of standing crops are not good for want of rain. Water and fodder are sufficient.
	Jamalpur ...	Nil	4½	4½	
	Tangail ...	Nil	4½	4⅝	
	Netrakona ...	(*n*)	(*n*)	4½	
	Kishorganj...	1·50	4⅞	4⅞	

(*n*) Not reported. * Burma rice.

(*a*) Munshiganj being very near to Dacca and Narayanganj, its rainfall statistics are not quoted. To give information regarding the northern part of the district, rainfall figures for Kapasia thana are reported here.

MONTHLY WEATHER AND CROP REPORT OF BENGAL FOR MAY 1920.

I. **Character of the season.**—During the month under review the rainfall throughout the Province was in considerable defect except in the district of Pabna only, where the fall was slightly in excess of the normal. The usual rainfall statement is appended.

II. **Progress of agricultural operations.**—Harvesting of summer rice was completed. Sowing of jute and other autumn crops was almost finished in East and North Bengal while in West Bengal the operation was retarded for want of sufficient rain. Weeding was proceeding in the Northern and Eastern districts. Preparatory tillage for winter paddy was in full swing; but more rain was needed for the operation, especially on high lands. Sowing of paddy seed-beds commenced during the latter part of the month.

III. **State of standing crops.**—The condition of sugarcane, jute, paddy and other standing crops was generally fair.

IV. **Prospects and probable outturn.**—Some low land jute has flowered prematurely in East Bengal and some low land paddy has not recovered from the heavy rain early in the season. On the whole, however, prospects are at present fairly favourable; though more rain is urgently needed in West Bengal. The summer rice harvest has been a satisfactory one.

V. **Damage to standing crops.**—In the middle of the month excessive rain caused some damage to standing crops in parts of Mymensingh, while in the latter part of the month hail damaged crops in parts of Rangpur. Jute and other standing crops on high lands suffered from want of moisture in some Western districts.

VI. **Condition of agricultural stock.**—No report about the existence of of cattle disease was received frem the districts of the Burdwan Division, Dinajpur, Rangpur, Dacca, Faridpur, and Chittagong. Elsewhere it was reported to be more or less prevalent.

VII. **Failure of pasturage and fodder.**—The supply of fodder was reported to be sufficient throughout the Province.

VIII. **Prices of food-grains.**—During the second fortnight of the month under review, the price of common rice of the cheapest quality rose in sixteen districts, fell in one only and remained stationary in the rest of the Province. In varied from 4 seers 3 chittaks at Bakarganj to 6 seers 12 chittaks at Birbhum.

IX. **Condition of agricultural people.**—The condition of agricultural population was fairly satisfactory.

R. S. FINLOW,
Offg. Director of Agriculture, Bengal.

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 10th June 1920.

Summary.—During the week rainfall was heavy in the Chittagong Division and light to moderate elsewhere. It has facilitated the preparatory tillage for winter rice crop and benefited the standing crops, especially in East Bengal. More rain is, however, needed in Western districts and in parts of North Bengal. Sowing of jute and autumn paddy is approaching completion. Weeding continues. Sowing of winter paddy for seedlings is also proceeding. The average price of common rice for the province has risen by about 2·28 per cent. as compared with that of the previous week.

J. C. ROY
for *Director of Agriculture, Bengal.*

Statement of weekly gauge-readings on the rivers Ganges and Brahmaputra at Goalundo for the week ending 12th June 1920.

Month and date.	Hour.	Height of surface above or below zero of gauge.	Height of surface above mean sea-level.	Height of surface above mean sea-level on same date last year.	Remarks.
1920.					
6th June ...	7 A.M.	12·0	12·0	14·3	Zero is placed at mean sea-level.
7th ,, ...	7 ,,	12·1	12·1	14·4	The bench mark for the gauge is on a pucca pillar between the passenger ghât and Chandpur ghât.
8th ,, ...	7 ,,	12·4	12·4	14·2	
9th ,, ...	7 ,,	12·4	12·4	13·8	
10th ,, ...	7 ,,	12·5	12·5	13·5	
11th ,, ...	7 ,,	12·9	12·9	13·5	Its reduced level is 26·84.
12th ,, ...	7 ,,	13·4	13·4	13·5	

The previous year ...	Highest water-level ...	23·7 on 15th September 1919.	
Ditto ...	Lowest ,, ...	6·1 on 24th February 1919.	
Record (H.F. in Brahmaputra and Ganges)	Highest ,, ...	25·75 on 28th August 1906.	
Record (average flood in Brahmaputra and Ganges) ...	Ditto ,, ...	25·74 on 20th and 21st August 1893.	
Record (H.F. in Brahmaputra and Ganges)	Ditto ,, ...	25·66 on 11th to 17th and 31st August 1889 and on 1st to 3rd September 1889.	
Record (H.F. in Brahmaputra only)	Ditto ,, ...	25·66 on 31st July 1900.	
Do.	Lowest ,, ...	1·0 on 8th February 1914.	
Do.	Ditto ,, ...	2·42 on 13th March 1908	
Do.	Ditto ,, ...	2·91 on 21st to 24th February 1884 and 8th to 9th March 1884.	
Do.	Ditto ,, ...	3·16 on 9th to 11th March 1885.	
Do.	Ditto ,, ...	3·16 on 16th, 17th and 29th to 31st March 1901.	

N.B.—The gauge readings commenced from 3rd October 1909.

FARIDPUR,
The 12th June 1920.

RAJ KUMAR GHOSE,
for *Subdivisional Officer, P. W. D., Faridpur.*

Statement of weekly gauge-readings on the river Ganges at Rampur-Boalia for the week ending the 12th June 1920.

Date.	Hour.	Height of surface above or below zero—minus sign for those below zero.	Height of surface above mean sea-level according to P. W. D. datum.	Height of surface above mean sea-level on the same date last year according to P. W. D. datum.	Remarks.
1920.					
6th June ...	8 A.M.	Zero of gauge is at mean sea level.	36·00	37·10	P. W. D. datum 6·25 feet above Kidderpur old dock sill.
7th ,, ...	8 ,,		36·00	37·20	
8th ,, ...	8 ,,		36·00	37·20	
9th ,, ...	8 ,,		36·10	37·30	B. M. on College step 64·93.
10th ,, ...	8 ,,		36·20	37·20	
11th ,, ...	8 ,,		36·45	37·40	
12th ,, ...	8 ,,		36·60	37·75	

			Old value.		According to P. W. D. datum.
The previous year ...	Highest water level ...		61·29 on 13th September 1919	...	62·80
Ditto ...	Lowest ,, ...		38·51 on 8th May 1919	...	39·01
Record ...	Highest ,, ...		69·25 on 26th August 1879	...	64·44
Do. ...	Ditto ,, ...		69·08 on 9th September 1885	...	64·27
Do. ...	Ditto ,, ...		68·80 on 25th August 1906	...	63·47
Do. ...	Ditto ,, ...		68·21 on 26th August 1890	...	63·40
Do. ...	Lowest ,, ...		37·63 on 25th April 1884	...	32·82
Do. ...	Ditto ,, ...		38·13 on 14th-15th April 1883	...	33·32
Do. ...	Ditto ,, ...		39·02 on 21st-22nd April 1897	...	34·21
Do. ...	Ditto ,, ...		39·28 on 6th-7th May 1908	...	34·47

N.B.—The gauge readings commenced from the 1st August 1887.

*New gauge fixed at Rajmahal from 1st June 1910 in place of the gauge at Sahebganj. The zero of gauge at Rajmahal again 56·46 ft. above M.S.-L. from 10th February 1916 to 15th June 1918. From the 16th June 1918 to 6th April 1919 it April 1919 it is 56·319 ft. above M.S.-L.

†To compare the reduced levels shown in these monthly printed statements before and after the 1st June 1908, 5·78 ft. October 1909).

(a) A new gauge fixed at Monghyr on 16th July 1914.

(b) From the 1st November 1915 the zero of gauge was 2·48 ft. above M.S.-L. Previous to that the zero was at M.S.-L. zero is 1·509 ft. above M.S.-L.

(c) From the 25th January 1916 to 4th April 1919 the zero of gauge at Berhampore was 30·99 ft. above M.-S.L. From

(d) From the 25th October 1916 a temporary wooden gauge with its zero at 49·00 ft. above M.S.-L. was erected at 3rd June 1919. From 4th June 1919 the zero is 1·51 ft. above M.S.-L.

(e) Gauge shifted from Sabik Goalundo to Fakirabad from 30th June 1919.

The 14th June 1920.

MENT, BENGAL.

FUTURE OF THE SUBORDINATE CIVIL SERVICE.

GOVERNMENT OF BENGAL.

APPOINTMENT DEPARTMENT.

DARJEELING, THE 21ST JUNE 1920.

RESOLUTION No. 1646 A.D..

AT a meeting of the Legislative Council in July last Government announced their intention of bringing the pay and conditions of service of the subordinate civil service under review as soon as a decision had been arrived at regarding the future pay and conditions of service of the provincial civil service. The orders of the Secretary of State on the system of recruitment, the method of training and the leave and pension rules of the senior service are still awaited, and any proposals affecting the junior service under these heads must still, to some extent, be provisional. But final orders have been passed fixing the future emoluments of the provincial civil (executive) service, and the Governor in Council considers that the time is now ripe for the publication of the suggested lines of treatment for the subordinate service so that the public and those directly interested may have an opportunity of making their views known to Government before a final decision is arrived at. The case of this service was not dealt with by the Public Services Commission, whose recommendations have formed the basis for discussion in regard to the revision of pay in other services. The main points in issue are, however, indicated under the general heads discussed below. The proposals put forward are those which at present commend themselves to the Governor in Council.

2. **Status and Title.**—The service was originally constituted for outdoor revenue work of a minor kind. As administrative needs developed the service was later entrusted with minor magisterial functions as well, and came to be employed in a general way on minor duties at headquarters and in the field, thus setting free the two major services for the more important duties for which they are responsible. The magisterial powers of the service were limited to those of the 2nd and 3rd class until 1911, when it was decided that powers of the 1st class might be given to a limited number of sub-deputy magistrates, whose promotion on grounds of merit to the provincial civil service was likely to take place within two or three years. During the war, owing to the depletion of the cadre and the absence on war service of a number of members of the Indian Civil Service, it was found necessary to relax this restriction temporarily, and to vest with first class powers a further limited number of sub-deputy magistrates who had exercised second class powers with credit for some time. Some members of the subordinate service were thus temporarily employed to do the work which properly falls within the sphere of the provincial service, and the distinction between the two services was to that extent blurred, with the result that the claim has been put forward that the distinction is non-existent and that the two services should be amalgamated. This claim the Governor in Council cannot admit. His reasons were given in detail in the debate on the resolution on the subject which was moved by the Hon'ble Babu Surendra Nath Ray at the meeting of the Bengal Legislative Council held on the 4th July 1919. They need not be repeated here; but the essence of the case is that there is in the field of administrative work a class of duties of minor importance, on the performance of which a separate service, limited to minor responsibilities and drawing lower emoluments, should be employed. Any other arrangement would be financially

unjustifiable. It is proposed accordingly to constitute the service as a definitely self-contained part of the administrative machinery with duties of its own and emoluments sufficient to provide a reasonable career to the officers joining it.

The practice of investing sub-deputy magistrates with 1st class powers will be stopped ; and steps are being taken to effect such revisions in the cadre of the provincial civil service as will avoid the future employment of officers of the junior service on duties more properly belonging to the major services. On the other hand, the work to be performed by the junior service is expanding in other directions, as for instance, the circle system develops under the application of the Village Self-Government Act, and their share in the administration will remain important and honourable.

The present title of the service seems appropriate, and might continue. The orders of the Secretary of State on the proposal that the provincial civil service should, in future, be called the "Bengal Civil Service" have not yet been received.

3. **Recruitment.**—The Subordinate Civil Service is at present recruited—

(1) by promotion of officers serving under the Board of Revenue or the Revenue Department on the nomination of the Board or the Department ;

(2) by appointment once in every three years of an officer nominated by the Finance Department from a service under that Department ; and

(3) by the direct recruitment of candidates possessing certain prescribed qualifications.

Twenty per cent. of vacancies are ordinarily filled by the promotion of persons already in Government service, and the remainder are filled by the Governor in Council, assisted by Commissioners of Divisions, who are asked to nominate candidates for 50 per cent. of the appointments to be made. The following are the minimum qualifications demanded in a candidate for direct recruitment :—

(*a*) that he is a natural born subject of His Majesty or of a Native State ;

(*b*) that he is not under 20 or over 25 years of age ;

(*c*) that he is of good character ;

(*d*) that he is a graduate ; and

(*e*) that he is physically fit.

The advantages of a system of direct recruitment for the services they had under review were discussed by the Public Services Commission ; and the Governor in Council considers that, normally, recruitment to the Subordinate Civil Service should be direct. But the circumstances of certain revenue establishments are peculiar, and it is not considered desirable to deprive them of the opportunities they have hitherto had of attaining to pensionable status in the subordinate service as a reward for good work. Twenty per cent. of the vacancies might therefore continue to be filled from officers serving under the Revenue Department or Board of Revenue who are otherwise qualified for direct appointment. The remainder might be recruited directly from outside candidates ; and the qualifications at present demanded seem to be suitable. No final decision has yet been announced regarding the proposal that direct recruitment for the provincial civil service should be made by a competitive examination open to persons possessing specified qualifications, with reservations calculated to secure the representation of special communities. If such a system is adopted the direct recruitment for the subordinate service would naturally form part of the scheme.

4. **Probation and training.**—Officers are at present first appointed as probationers for a minimum period of one year and are thereafter, if their work is satisfactory, appointed to the lowest grade of the cadre as vacanies occur. During their period of probation they undergo a course of practical training similar to that prescribed for officers of the two senior services, and are required to pass departmental examinations, It is proposed in future to

appoint a candidate definitely to the service at once, but he will remain on probation for the first two years. This proposal follows the decision recently announced in the case of the provincial civil service. The incidence of training may continue as at present.

5. **Salary.**—The service is at present divided into probationers on an allowance of Rs. 50 per month and five grades of officers on salaries ranging from Rs. 100 to Rs. 250 per month. The cost of living has increased since these rates were sanctioned, and the service is entitled to share in that general amelioration of conditions which has been accorded to the services brought under review by the Public Services Commission. It is also desired, as explained above, to reflect in the emoluments of the service the fact that the service is designed to be a career in itself for educated men, and is a service filling a definite part in the general administration. The Governor in Council is accordingly prepared to consider an improvement in its emoluments not strictly limited by considerations of supply and demand; and he proposes that, in common with other services recently re-organized, it should be given a system of pay by time scales instead of by grades with a selection grade outside the scale for officers of special merit. A suitable time scale would appear to be—

(1) for probationers Rs. 125 in the first year, and Rs. 150 in the second; and

(2) for confirmed officers Rs. 175 rising by triennial increments of Rs. 25 to Rs. 350 in the 24th year of total service. Above this scale there might suitably be a selection grade for 3 per cent. of the total cadre on a pay of Rs. 400.

As in other services recently brought under time scales, there should be an efficiency bar within the timescale. An efficiency bar between the pay of the 11th year and that of the 12th, *i.e.*, just above the pay of Rs. 225, would appear to be appropriate.

6. **Promotion to the Provincial Civil Service.**—At present 35 per cent. of the vacancies occurring in the provincial civil service are filled by promotion of selected officers from the subordinate civil service on the nomination of the Revenue Department. As has already been stated the question of partially recruiting a service from a subordinate service was discussed by the Public Services Commission. But in any case it would be unfair to deprive those already in the subordinate service of the opportunities for promotion which were open to that service when they entered it; and it is intended, therefore, until further notice and subject to any orders that may be passed on the recommendation of the Public Services Commission with reference to the recruitment of the provincial service, to continue the recruitment of 35 per cent. of the vacancies in the provincial service from the subordinate service. The continuance of this recruitment does not, however, affect the principle that the subordinate service is intended to afford a reasonable career in itself for those who enter it, and promotion to the higher service can only be regarded as a prize in reward for specially good work, to which individual officers have no specific claim.

7. **Leave and Pension.**—At present the service is not a gazetted one and does not therefore come under the same rules for leave and pension as gazetted services. As at present advised the Governor in Council considers that the rules on these subjects should be the same for the provincial and subordinate services.

8. Any criticisms which it is desired to offer should reach the local Government not later than the 31st July, after which the matter will be further considered.

By Order of the Governor in Council,

H. L. STEPHENSON,

Chief Secretary to the Government of Bengal.

RESOLUTION ON THE ANNUAL REPORT ON THE POLICE ADMINISTRATION OF THE TOWN OF CALCUTTA AND ITS SUBURBS FOR THE YEAR 1919.

GOVERNMENT OF BENGAL.

POLITICAL DEPARTMENT.

Police.

CALCUTTA, THE 26TH JUNE 1920.

RESOLUTION—No. 2682P.J.

READ—

The annual report on the Police Administration of the town of Calcutta and its suburbs for the year 1919.

THE outstanding feature of the Police Administration of Calcutta is its complexity. Calcutta is a great and wealthy city, with many densely populated areas where modern conditions of police and traffic control are still impossible, a great port bounded by a long stretch of open river, the centre of a very important industrial area, a resort of foreigners and of people from all parts of India, and an important political focus. Its policing constitutes

a problem in itself, distinct from that afforded by any other part of the Presidency, and it becomes yearly more important that the full meaning of these facts should be realised. Calcutta has attained the status of a huge modern city and is still growing. It began with a police administration based on that in force in rural and urban Bengal: it has steadily outgrown the potentialities of such a system, and this growth has been met by a series of adaptations that have approximated more and more to the model set by European cities of similar size and similar activities. There can be only one policy for the future, and that is the policy of definitely casting the administration into what may be called the metropolitan mould. This will mean increasing specialisation, increasing subdivision of activities under separate departments, and the employment more and more of men with special qualifications. Such an evolution will inevitably be accompanied by a growth of expenditure.

Apart from this internal process towards increasing cost, there is the external pressure exerted by the economic conditions of Calcutta. This pressure has been very noticeable during the year under report. It has become clear, for instance, that the housing of officers in hired houses (the total rents paid to private owners rose to Rs. 3,10,490) is uneconomical and administratively most undesirable. The Commissioner regards a loan as the only solution of the difficulty, and as it is obviously impossible to finance these building schemes within a reasonable time out of revenue, careful consideration will be given to his proposals when received. But besides capital outlay it is clear that the improvement in the pay of the lower branches of the force has not kept pace with the increase of economic pressure, and the result is seen in the difficulty of recruitment and in the tendency noticed by the Commissioner to a lower morale. Government have received proposals from the Commissioner to meet these difficulties and they are under consideration. As the cost of the administration thus increases the question must soon arise, whether Calcutta should not be called upon to pay more directly than it at present does for the service which administers and protects it.

2. The office of Commissioner of Police was held throughout the year by Mr. R. Clarke, C.I.E.

3. Recruitment fell short of vacancies. The hope that, as army demobilisation progressed, recruitment would become easier, was not fulfilled; the high cost of living in Calcutta and the inadequacy of the pay and prospects offered are given as the reasons for the failure.

4. Crime in the aggregate increased by about 10,000 cases, the increase falling mainly under special and local laws. The general prevalence of industrial unrest produced a number of strikes, none of which, however, was attended by any disturbance of the peace.

The old question of the control of the unruly element known as *goondas* again came to the fore. The difficulties of holding these hooligans in check are referred to by the Commissioner: prosecutions are impeded by the reluctance of parties to give evidence for the prosecutions; the ordinary bad livelihood sections of the Code are in some ways inapplicable to a large town, or at least it is not easy to enforce them; the areas most preyed upon afford facilities to criminals and it is hard to patrol them. An effective remedy would lie in an executive power to remove from the town those desperate characters who endanger the public peace in this way, and representative opinion is being consulted as to this or any other solution which may be feasible.

5. A riot necessitating the employment of armed force occurred in the northern part of the city on the 11th and 12th April. It was a sequel to the *Satyagraha hartal* observed in the city on the 6th of that month, and was an echo of more serious disturbances which occurred elsewhere in the country. Its operations were fortunately restricted, and order was promptly restored by measures which the general sense of the public admitted to have been characterised by forbearance and moderation.

6. The rapid rise in the number of motor vehicles since the armistice and a steady increase in the number of traffic offences necessitated an improvement in the method of traffic control. Sanction was obtained during the year to the centralization of a control hitherto divided between the Corporation and the Police under a specialised Police Department designated the Public Vehicles Department, having at its head a Deputy Commissioner of Police responsible solely for this branch of control. The officer designated to hold charge of the department was placed on special duty in London to study the details of traffic control in that city. He has now taken charge, and an improvement is looked for in this important branch of public convenience.

7. The Fire Brigade maintained its record of good work, and coped with fires which involved property of considerably higher value than in the previous year.

8. The general conduct of the police was good, and the Governor in Council, looking upon the administration as a whole, congratulates the force and in particular Mr. Clarke on a year's record of efficient work carried out with a depleted cadre. To all the officers whom Mr. Clarke has commended for good work, and to the force as a whole, the Governor in Council accords his thanks.

Order.—Ordered that a copy of this resolution be forwarded to the Commissioner of Police, Calcutta, the Chief Presidency Magistrate, Calcutta, and the Commissioner of the Presidency Division for information.

Ordered also that a copy of the resolution and a copy of the report be submitted to the Government of India in the Home Department.

Ordered also that the resolution be published in the *Calcutta Gazette*

S. N. GHOSH,

for *Commissioner, Presidency Division.*

CALCUTTA, *the 28th June 1920.*

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 24th June 1920.

Summary.—Excepting heavy showers in some North Bengal districts, light to moderate rain fell throughout the province. It has benefited the standing crops and helped the field operations generally. More rain, however, is needed especially in Western Bengal districts. Preparatory tillage for winter paddy is proceeding. Harvesting of jute ard early autumn paddy and transplanting of winter paddy seedlings have commenced in low-lying tracts of Eastern Bengal. Weeding of autumn paddy and jute is still in progress in Western Bengal. The average price of common rice for the province has risen by about 1·34 per cent. as compared with that of the previous week.

Serial No.	District and subdivision.	Rainfall.	Price of common rice, in seers, per rupee.		Character of the weather, condition of crops, etc.

CALCUTTA,
The 6th July 1920.

G. J. ST. C. SEDGLEY,
Under-Secy. to the Govt. of Bengal.

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 1st July 1920.

Summary.—During the week moderate to heavy rain fell all over the province. More rain is wanted, especially in West Bengal. Harvesting of early autumn paddy and jute has commenced in some northern and eastern districts. Prospects of standing crops are generally hopeful. The average price of common rice for the province has slightly risen as compared with that of the previous week.

Serial No.	District and subdivision.	Rainfall.	PRICE OF COMMON RICE IN SEERS PER RUPEE.		Character of the weather, condition of crops, etc.
			This week.	Previous week.	
1	2	3	4	5	6
		Inches.			
1	24-PARGANAS	2·28	5	4½	Weeding of jute and *aus* paddy is going on. Paddy seedlings are suffering for want of rain in Diamond Harbour subdivision. Fodder and water are sufficient.

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 8th July 1920.

Summary.—During the week light to moderate rainfall was general throughout the province. More rain is wanted for the growth of standing crops and for the transplantation of winter paddy seedlings, especially in Western Bengal where the operation is being retarded owing to insufficient rain. Harvesting of jute and autumn paddy is proceeding in some Eastern Bengal districts. Standing crops are doing well. The average price of common rice for the province has slightly fallen as compared with that of the previous week.

Serial No.	District and subdivision.	Rainfall.	Price of common rice. in seers. per rupee.		Character of the weather, condition of crops, etc.
			This week.	Previous week.

CALCUTTA,
The 9th July 1920.

G. J. ST. C. SEDGLEY.
Under-Secy. to the Govt. of Bengal.

DEPARTMENT OF STATISTICS, INDIA

CALCUTTA TRADE FLUCTUATIONS

THE following tables are intended to show the trade by all routes, *i.e.*, by rail, river, canal, road, and sea, of the Calcutta block* in certain selected articles during the month of April, 1920, as compared with the corresponding month of 1919 and 1918. The statistics have been compiled from returns furnished by the Collector of Customs, Calcutta, Railway Audit Offices, Steamer Companies, the Commissioners for the Port of Calcutta, the Collectors of the 24-Parganas and Howrah, and the Assistant Engineer, Calcutta Canals.

General Summary

Imports.—The imports of rice, including paddy†, into Calcutta* by rail, river, canal, road, and sea (coastwise) during the month of April, 1920, amounted to 964,000 maunds, as against 2,557,000 maunds in the corresponding period of the preceding year—a decrease of 62 per cent, being chiefly due to smaller imports of rice from Burma. There was an increase of 7 per cent in the imports of coal and coke (9,755,000 maunds as against 9,109,000 maunds last year). The value of the imports by rail, river, road, and sea (coastwise) of Indian cotton piecegoods showed an increase of 42 per cent, the total value amounting to Rs. 76,02,000 as against Rs. 53,58,000 in 1919. The quantity of indigo imported during the month of April, 1920, increased from 104 maunds last year to 2,845 maunds. The imports of raw jute amounted to 398,000 bales as against 222,000 bales,—an increase of 79 per cent. The importations of gunny bags also showed an increase to 42 million bags from 28 millions in the preceding year. The total imports of oilseeds (linseed and rape and mustard seed) increased by 38 per cent from 708,000 maunds to 979,000 maunds. The imports of tea decreased by 75 per cent from 153,000 maunds to 39,000 maunds.

Exports.—The exports of cotton piecegoods, foreign, from Calcutta* by all routes during the month of April, 1920, decreased slightly from Rs. 2,63,87,000 to Rs. 2,61,93,000. The exports of gunny bags (including the exports by sea to foreign countries) increased from 99 million bags to 122 millions but the shipments of gunny bags to other Indian ports decreased from 7 millions to 6 millions in number in the month under review. The quantity of kerosene oil despatched from Calcutta and Budge-Budge by internal routes and by sea (coastwise) increased from 369,000 maunds to 406,000 maunds, or by 10 per cent.

* The Calcutta block consists of the town of Calcutta with Howrah and Kidderpore Docks.
† One maund of paddy is equivalent to 25 seers of rice.

Weather and Crop Report for the week ending on the 15th July 1920	809—812		

MONTHLY WEATHER AND CROP REPORT OF BENGAL FOR JUNE 1920.

I. Character of the Season.—During the month under report the rainfall was in excess of the normal in Jalpaiguri, Darjeeling, Rangpur, Dacca, Tippera and the State of Cooch Behar; elsewhere it was in more or less marked defect. The usual rainfall statement is appended.

II. Progress of Agricultural Operations.—Sowing of jute and autumn paddy was completed; weeding was in progress, especially in Western districts. Preparatory tillage for winter paddy and rearing of seedlings in nurseries continued; the operations were retarded in parts of Western Bengal for want of rain during the first part of the month. Harvesting of early autumn paddy and jute and transplantation of winter paddy seedlings commenced during the latter part of the month in the low-lying tracts of Eastern Bengal.

III. State of Standing Crops.—The condition of sugarcane, jute, paddy and other standing crops was fairly satisfactory.

IV. Prospects and Probable Outturn.—During the first part of the month, standing jute and other autumn crops suffered generally from lack of soil moisture, especially in the West Bengal districts, owing to inadequate rainfall, but the rain in the latter part of the month improved their prospects to some extent. The prospects of deep-water winter paddy in Eastern Bengal were generally hopeful.

V. Damage to Standing Crops.—Except for some damage caused by hail in Rangpur and Tippera in the early part of the month, no reports of any damage to crops has been received.

VI. Condition of Agricultural Stock.—Sporadic cases of cattle disease were reported from fourteen districts of the province.

VII. Failure of Pasturage and Fodder.—No scarcity of fodder was reported from any part of the province.

VIII. Prices of Foodgrains.—During the second fortnight of the month, the price of common rice of the cheapest quality rose in eleven districts, fell in six and remained stationary in the rest of the province. It varied from 4 seers 8 chittacks per rupee at Darjeeling and Faridpur to 5 seers 13 chittacks a rupee at Dinajpur.

IX. Condition of Agricultural People.—The condition of the agricultural population was fair.

G. EVANS,
Director of Agriculture, Bengal.

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 15th July 1920.

Summary.—During the week light rain fell generally all over the province. More rain is urgently needed for field operations and for standing crops. Harvesting of jute and autumn paddy is progressing fairly in the low-lying tracts of Eastern and Northern Bengal. Some damage by insects is reported to have been caused to the jute crop in parts of Nadia, Jessore, Pabna, Faridpur and Bakarganj. The condition of standing crops is generally fair. The average price of common rice for the province has fallen by about 0·52 per cent. as compared with that of the previous week.

REPORT OF THE HONORARY COMMITTEE FOR THE MANAGEMENT OF THE ZOOLOGICAL GARDEN, CALCUTTA, FOR THE YEAR 1919-20.

NOTIFICATION.

No. 1609 P. D.—The 17th July 1920.—The following extracts from the Annual Administration Report of the Zoological Garden, Calcutta, for the year 1919-20 and the Government letter No. 1606P.D., dated the 17th July 1920, acknowledging the receipt of the report are published for general information.

H. L. STEPHENSON,

Chief Secy. to the Govt. of Bengal.

THE Honorary Committee has the honour to submit its report for the year ending 31st March 1920, the contents of which, as usual, include, among other items—

(1) The Superintendent's report upon the Zoological collection.
(2) Abstract of accounts of ordinary receipts and expenditure.
(3) Monthly returns of visitors and gate receipts and a list of donors and their donations.

The Committee consisted of—

President:

The Hon'ble Sir C. J. Stevenson-Moore, K.C.I.E., C.V.O., I.C.S.

Vice-President:

The Hon'ble Mr Justice P. L. Buckland, F.Z.S.

Honorary Secretary and Treasurer:

W. Dods, Esq.

Members of the Committee:

Nominated—

R. D. Mehta, Esq., C.I.E.
Dr. Nelson Annandale, B.A., D.SC., C.M.Z.S.
W. R. Gourlay, Esq., C.I.E., I.C.S.
H. J. McIntosh, Esq.
Nawab Sir Asif Qadr Saiyid Wasif Ali Mirza, Khan Bahadur, Mahabat Jang, Nawab Bahadur of Murshidabad, K.C.S.I., K.C.V.O.
G. Girard, Esq., I.S.O., F.R.H.S.
The Hon'ble Sir Bijay Chand Mahtab, K.C.S.I., K.C.I.E., I.O.M., Maharajadhiraja Bahadur of Burdwan.
Shirley Tremearne, Esq.
David Ezra, Esq.
Nawab A. F. M. Abdur Rahaman, Khan Bahadur.
Lieutenant-Colonel Sir L. Rogers, KT., C.I.E., M.D., I.M.S.
C. W. E. Cotton, Esq., I.C.S.
Lieutenant-Colonel E. H. Brown, I.M.S. (Retired), M.D., D.P.H., F.R.C.S.E.
H. F. Yeoman, Esq.
Babu Surendra Nath Laha.

Ex-officio—

The Commissioners of Divisions in Bengal.
The Executive Engineer, 2nd Calcutta Division, Public Works Department.
The Sanitary Commissioner, Bengal.
The President of the Asiatic Society of Bengal.
The Director of Public Instruction, Bengal.
The Natural History Secretary of the Asiatic Society of Bengal.
The Director of Land Records, Bengal.
The Superintendent, Civil Veterinary Department, Bengal.
The Professor of Comparative Anatomy and Zoology, Medical College, Bengal.
The Superintendent of the Royal Botanic Garden, Sibpur.
The Chairman of the Calcutta Corporation.
The Principal of the Bengal Veterinary College.

Resignation.

The Hon'ble Colonel C. R. M. Green, M.D., I.M.S., resigned his membership owing to his transfer from Calcutta.

OBITUARY.

The death of Lieutenant-Colonel C. R. Stevens, M.D., I.M.S., a member of the Committee, occurred during the year. The Committee received the announcement with deep regret.

IMPROVEMENTS.

Among the improvements carried out during the year, the following may be mentioned :—

(1) Accommodation for the young Hippopotamus :—It was found necessary to provide separate accommodation for the young Hippopotamus born last year. The Abdul Gani House was, therefore, remodelled to suit the requirements of the animal, a water-tight tank being constructed with unfiltered water connection.

(2) Construction of a Gate for the New Extension :—With a view to relieve the congestion at the main entrance on occasions when large crowds are attracted to the Zoo a gate was opened on to the Sterndale Road.

ANNUAL REPAIRS.

The annual repairs to the buildings of the Garden were limited to those buildings which needed repairs very badly. Extensive repairs could not be taken in hand on account of the high prices of building materials, paints, and the increased cost of labour.

STAFF AND ESTABLISHMENT.

There was no change in the superior staff during the year The *personnel* consists of—

SUPERIOR STAFF.

Superintendent :

Rai Bijay Krishna Basu Bahadur, G.B.V.C., C.M.Z.S.

Assistant Superintendent :

Babu Somadev Ganguli.

Store-keeper :

Babu Jugal Kishore Roy.

Overseer :

Babu Niranjan Mukherji.

Clerk :

Babu Tarak Chandra Chatterji.

Gate Clerk :

Babu Doyal Chandra Dass

VISITORS.

There was an increase in the attendance of paying visitors during the year, the turnstile records indicating a total of 715,039 visitors, and showing an increase of 79,542 over the figures for 1918-19.

Corresponding with the increase in the number of visitors, the gate receipts increased by Rs. 6,034-2. The following is a comparative statement of visitors and gate receipts for the last three years :—

Year.	Visitors.	Receipts. Rs. A.	Year.	Visitors.	Receipts. Rs. A.
1917-18	... 583,343	44,564 0	1919-20	... 715,039	54,524 2
1918-19	... 635,497	48,490 0			

A large number of children under four years of age, and school children in charge of their teachers were admitted free. On the days of the Fancy Fair when no individual charge is levied, it is estimated that about 15,500 visitors entered the Garden. In addition 35,674 persons visited the Garden on free days, of which a list with the number of visitors on each will be found in Appendix C.

Special arrangements were made for the admission without payment of soldiers on leave and convalescents.

FINANCE.

The financial condition of the Garden is on the whole satisfactory; in spite of the high cost of food-grains, and of building. This is due to the rigid economy, which has been practised during the past few years, but a comprehensive programme of improvements and repairs will soon have to be undertaken, on which the available balance will be expended.

The amounts of income and expenditure are summarised in Appendix A.

GARDEN.

Considerable attention has been paid to the lawns, flower-beds, shrubs and trees, and the Gardens generally have been maintained in good order. The appearance of the grounds has improved. For some very excellent exhibits at the Centenary Flower Show, held on 20th and 21st February 1920, the Agri-Horticultural Society of India awarded 16 prizes, of which 13 were first prizes.

CONCLUSION.

The Committe desires to express its thanks to the Corporation of Calcutta for their continued generosity in remitting the consolidated rates in respect of the Gardens.

The thanks of the Committee are also due to those ladies and gentlemen who have added to the Zoological collection by donations, a list of which is given in Appendix D. Thanks are also due to those who kindly offered to present animals to the Garden, but whose offers could not be accepted either because the particular species of animals was already sufficiently well-represented, or owing to want of accommodation.

The Committee also desires to express its thanks to the Railway and Steamer Companies for the conveyance of animals belonging to the Gardens free of charge.

W. K. DODS.
Honorary Secretary.

C. J. STEVENSON-MOORE,
President.

SUPERINTENDENT'S REPORT.

I have the honour to submit the following report on the existing condition and the progress of the Zoological collection.

The following comparative table shows how the various collection of specimens in the Garden has stood during the last four years:—

YEAR.	Mammals.	Birds.	Reptiles.	YEAR.	Mammals.	Birds.	Reptiles.
1916-17 ...	318	1,975	263	1918-19 ...	299	1,944	171
1917-18 ...	316	2,029	199	1919-20 ...	294	1,919	183

ACQUISITIONS.

The most important purchase during the year was a female Giraffe. Other purchases for the year included—

1 Baby Elephant.
1 Pair Fallow deer.
1 Hunting leopard.
1 Pink-headed duck.
1 Tiger cub.
1 Golden cat.
4 Cat bears.
1 Uryal.
3 Blood pheasants.

Among the important gifts deserving special mention are a pair of Kashmir deer presented by H. H. the Maharaja of Kashmir, and two tiger cubs presented by L. E. Cobden-Ramsay, Esq., I.C.S., C.I.E.

The following animals were received in exchange from the Zoological Society of Scotland:—

1 Common English Fox.
4 Ferrets.
2 Bernicle geese.
8 Mute swans.

GENERAL CONDITION OF THE ANIMALS.

The general condition of the larger mammals was very satisfactory, and important animals were kept in a perfect state of health. There were a number of cases of mange and distemper amongst the foxes and of general debility brought on by mange amongst the anthropoid apes. Prompt isolation of the cases and proper disinfection of the cages checked the spread of the diseases. Some old and decrepit specimens which had been exhibited in the Gardens for a long time were mercifully destroyed, as not fit for exhibition.

The general health of the birds was good, and there were no epidemics amongst them.

No. 1606P.D., dated Darjeeling, the 17th July 1920.

From—The Hon'ble Mr. H. L. STEPHENSON, C.S.I., C.I.E., I.C.S., Chief Secretary to the Government of Bengal,

To—The Honorary Secretary, Zoological Garden, Calcutta.

I AM directed to acknowledge the receipt of the Report of the Honorary Committee for the Management of the Zoological Garden, Calcutta, for the year 1919-20 forwarded with your letter No. 33, dated the 8th July 1920, and to convey the thanks of the Governor in Council to the Committee for their management of the Garden during the year.

2. The acknowledgments of His Excellency in Council are due to the ladies and gentlemen named in Appendix D to the Report, who presented the Garden with various animals during the year.

PRELIMINARY FORECAST OF THE JUTE CROP, 1920.

Consolidated Statement for Bengal, Bihar and Orissa, and Assam.

(This Forecast deals with estimates of areas only. Estimates of outturn are dealt with in the Final Forecast.)

Area.—The estimated area under jute in the three Provinces is 2,501,636 acres, a decrease of 337,239 acres, or about 11·9 per cent. on last year's final figures.

The consolidated figures are as follows :—

Name of Province.	Estimated acreage under jute.			Difference between the Preliminary Forecast, 1920, and Final Forecast, 1919.	
	1919.		1920.		
	Preliminary.	Final.	Preliminary.	Increase.	Decrease.
Bengal (including Cooch Behar).	2,431,063	2,498,145	2,198,704	.....	299,441
Bihar and Orissa ...	202,757	203,430	177,832	.....	25,598
Assam ...	115,300	137,300*	125,100	.....	12,200
Total ...	2,749,120	2,838,875	2,501,636	.....	337,239

* Revised.

The Departmental Preliminary Forecasts for each of the three Provinces are appended.

G. EVANS,
Director of Agriculture, Bengal.

CALCUTTA,
The 14th July 1920.

DEPARTMENT OF AGRICULTURE, BENGAL.

Preliminary Forecast of the Jute Crop in Bengal, 1920.

(NOTE.—On an average of five years ending 1918-19, the area under jute to which this forecast relates represents 88·2 per cent. of the total area under jute in British India.)

THIS forecast deals with the estimates of area sown and the present condition of the crop, based on information received through the agency of the panchayats, as in previous years.

Area Sown.—The district returns show a total area sown of 2,198,704 acres, a decrease of 299,441 acres, or about 11·9 per cent., as compared with the final figures of last year. The reduction is attributed to—

(1) Sudden drop in the jute market during the latter part of last year.

(2) High price of food-stuffs inducing cultivators to grow more paddy in place of jute.

(3) Unfavourable weather conditions at the time of sowing.

Character of the season.—The month of January was practically rainless. The preparatory tillage in Eastern and Northern Bengal, however, commenced in time owing to good rainfall in February, which also enabled the sowings to be commenced in the eastern districts during the course of that month. In the early part of March excessive rain caused the sowings in these tracts to be suspended at times. The rainfall in both April and May was considerably deficient, with the result that the sowings in the western districts, though commencing at the usual time, finished as late as the end of June. The drought also caused the plants in the eastern districts to flower prematurely, thereby stunting their growth. In the northern districts, however, the soil-moisture and general conditions were more favourable, and hence these districts show an increase over last year's figures. The rainfall in June, though below the normal, considerably improved the prospects of the late sown crop; the *deshi* districts being benefited in particular.

Present state of the crop.—Owing to the excessive rainfall at the beginning of the season followed by the drought later on, the crop this year does not promise to be so good as last year.

Stocks in hand.—Some of the more important districts report that a certain amount of old jute remains in stock. In the others there was little carry over.

G. EVANS,

Director of Agriculture, Bengal.

CALCUTTA,

The 14th July 1920.

APPENDIX I.

Preliminary Jute Forecast of 1920.

DISTRICT.	ESTIMATED AREA UNDER JUTE—		Whether much, little or no jute remains in the district from the crop of 1919.	Date by which the sowing of the crop generally commenced this year, and whether the date was early, normal or late.	REMARKS BY DISTRICT OFFICERS.
	Last year. (Final figures.)	This year.			
1	2	3	4	5	6
	Acres.	Acres.			
24-Parganas	62,309	47,778	Very little	May ; normal ...	Want of rain mainly accounts for the decrease in area which is also due to rise in the price of rice and sugarcane, the cultivators preferring to grow these crops in place of jute. The growth was retarded on account of unfavourable weather at the beginning. The present condition of the crop is fair.
Nadia	67,105	58,471	Much in Kushtia and Ranaghat subdivisions. Little elsewhere.	May ; late	Decrease in area sown as compared with last year is due to want of rainfall at sowing time and also to low price of jute and high price of rice. The weather has been unfavourable at the beginning but it is favourable now. The present condition of the crop is fairly good.
Murshidabad	20,826	19,697	Some in the Jangipur subdivision.	May to June ; late ...	The decrease is due to want of rain at the sowing season and also the low price of jute last year. The present condition of the crop is fair owing to the recent rainfall.
Jessore	84,687	80,171	Some	End of April and May ; generally late.	Decrease is due to unfavourable market and want of timely rain. The weather was unfavourable at the sowing time but has turned favourable now.
Khulna	21,668	10,417	Little	April ; normal ...	The decrease in the area sown is due to fall in the price of jute. The high price of paddy also induced the cultivators to grow paddy in most of the jute fields. Want of rain at the time of cultivation and sowing is also responsible for the decrease to some extent. The recent rainfall has done much good to the crop.
Burdwan	6,630	5,058	Do.	End of March to middle of May ; normal.	The decrease in area is partly due to unfavourable weather conditions and partly to the falling off in the price of jute and the difficulty experienced by the cultivators in disposing of last year's stock. The present condition of the crop is fair.
Midnapore	11,948	7,631	None	May to June ; late ...	The decrease in area sown is due to drought at sowing time. The crop is poor on high lands ; on low lands also the plants suffered from drought. Damage was done to the crop for want of rain.
Hooghly	30,862	22,760	Some	Sowing generally commenced in April ; early. Could not be completed before June (which was late).	The decrease in area as compared with that of last year is due to :— (i) Dullness of jute market and low prices obtained last year. (ii) High prices of rice inducing the cultivators to grow more *aus* paddy in place of jute. (iii) Want of adequate rainfall at sowing time. There was no rainfall after sowing in April. This damaged the young plants and a second sowing was necessary in some places. Since the middle of May the weather has turned more favourable. The present condition of the crop is fairly good.
Howrah	9,820	9,636	Little	First sowing commenced at the beginning of April. General sowing commenced about the second week of June ; late.	The decrease in area is due to unfavourable weather at sowing time. The crop is also of stunted growth on account of drought. The recent rain has somewhat improved the situation.
Rajshahi	73,597	76,703	Do.	On the low lands in March ; early. On the high lands in middle of April ; normal.	Increase is due to the favourable weather conditions at the sowing time and expectation of a good jute market this year. The weather was not favourable at the time of growth for want of sufficient rain. Some damage is reported to have been done in the Naogaon subdivision by drought and hail-storm. The recent rain has, however, improved the condition of the crop a good deal.
Dinajpur	60,978	68,645	Do.	May ; late	The increase is due to favourable weather conditions during the sowing season and expectation of a good price. The character of weather at sowing time and up till now has been favourable and the present condition of the crop is good.
Jalpaiguri	49,306	57,801	Much	Middle of April ; normal.	The increase is due to an expectation of a better price of jute this year, reclamation of waste land and favourable weather conditions. The present condition of the crop is good.
Darjeeling	2,215	2,803	Little	Middle of March ; early.	Increase in area is due to timely rain. The weather has been favourable up till now and the present condition of the crop is good.

District.	Estimated area under jute.		Whether much, little or no jute remains in the district from the crop of 1919.	Date by which the sowing of the crop generally commenced this year, and whether the date was early, normal or late.	Remarks by District Officers.
	Last year. (Final figures.)	This year.			
1	2	3	4	5	6
	Acres.	Acres.			
Rangpur	207,664	247,502	Much	March ; normal.	The increase in area is due to favourable weather conditions at the time of sowing and expectation of a better price of jute this year. The weather was favourable at first but less favourable later. Recently there has been good rain all over the district and a good outturn is practically assured in spite of local damage.
Bogra	69,945	87,490	Little	March ; normal.	Increase in area is due to high price early last year. The weather was favourable at sowing time ; later on the growth of the plants was retarded for want of rains. Weather has again turned favourable now. Some damage has been done to the crop in certain parts of the district. The present condition of the crop is fair. The early sown crop has, however, become stunted in growth.
Pabna	103,010	93,633	Considerable	Commenced early but continued till the middle of June.	The decrease in area this year is due to :— (1) Low price of jute last year. (2) High price of paddy. (3) Continued drought in April and May. The weather was not favourable at sowing time; later on it took a favourable turn. Growth of the crop is much below the normal. There has also been slight damage by insects.
Malda	26,600	17,000	Little	Low land sowings in April ; normal. High land sowing in June ; late.	The decrease in area is due to continued drought at sowing time, fall in the price of jute and rise in the price of foodstuffs. The early sown crop was damaged by drought. The recent rain has improved prospects to a certain extent.
Dacca	283,517	244,210	Some	Middle of February ; early.	The decrease in area is due to (1) fall of jute market, (2) high price of foodstuffs and (3) drought. The weather has not been favourable owing to the excessive rain followed by long drought. The present condition of the crop is not good.
Mymensingh	638,944	538,351	Some	End of March ; early	The decrease of area is due to the facts that :— (i) Some quantity of last year's jute was left in the hands of the cultivators owing to the sudden fall in the price. (ii) The abnormal rise in the price of rice has induced the cultivators to go in for paddy. The weather was favourable during sowing time. Long drought since then caused premature flowering of the plants and thus adversely affected their growth. The crop was slightly damaged by hailstorms in places.
Faridpur	258,400	219,100	Little	Beginning of March ; early.	The decrease in area is due to high price of rice and low price of jute in the latter part of the year. The weather was seasonable at sowing time. Drought in April and May, however, caused untimely flowering and affected the growth of the crop. The present condition is fair.
Bakarganj	36,633	37,623	Much	Middle of March to middle of April ; early.	The decrease in area is due to low price of jute and high price of rice obtained last year. This is also due to a large carry-over of last year's jute. Prolonged drought retarded the growth of the crop and caused the plants in some places to flower prematurely. The present weather conditions are favourable.
Chittagong	200	200	Nil ...	May ; late	The present condition of the crop is fair.
Tippera ...	266,641	209,203	Little	Chandpur—Latter part of February ; early Sadar and Brahmanbaria—End of March ; normal.	The decrease in area is due to relatively high price of paddy as compared with that of jute. There has been too much rain when the crop was sown. Since then weather has improved but the jute stalks are shorter than usual. The present condition of the crop is fair to average.
Noakhali	54,800	39,661	Much	Early in March ; normal.	Decrease in area is due to the low price of of jute last year. The weather has not been favourable owing to heavy rain at sowing time and long continued drought afterwards. Damage to the extent of about 2 annas is reported. The present condition of the crop is fair.
Total for Bengal ...	2,458,955	2,162,583			
Add—for Cooch Behar	39,190	36,121	Much	Beginning of March ; normal.	As jute did not fetch a good price last year a less quantity of land has been placed under jute cultivation this year. Weather was seasonable and favourable at the time of sowing and weeding and it is so up till now.
Grand total ...	2,498,145	2,198,704

NOTE.—The figures given above are the averages for all the rainfall-registering stations in each district.

DEPARTMENT OF AGRICULTURE, BIHAR AND ORISSA.

Preliminary Forecast of the Jute Crop of Bihar and Orissa, 1920.

(NOTE.—On an average of the five years ending 1918-19 the area under jute to which the Bihar and Orissa forecast relates represents about 8·3 per cent. of the total area under jute in British India.)

The present forecast deals only with the estimated area sown. It gives also a general survey of prospects, but makes no reference to the probable outturn either in percentage figures or in bales.

2. Acreage.—The estimated area sown during the current and four preceding years in round numbers is given below:—

Year.	Acreage
1916	224,000
1917	223,300
1918	149,300
1919	203,400
1920	177,800

3. Weather conditions.—In March the rainfall was above the normal in all jute districts. But in April to June it was below the normal everywhere. The short rainfall in the early part of the season checked sowings, especially in Champaran and the Santal Parganas. Rainfall was also insufficient for the growing crop in most districts. Earlier showers materially improved the condition of the crop in Purnea.

4. District returns.—The total area under jute, as reported by the District Officers, is estimated in round numbers at 177,800 acres, as compared with 202,800 acres shown in the corresponding forecast of last year and 203,400 acres reported in the final forecast of last year. The decrease in area sown this year was mainly in Purnea, where it is attributed to the rise in the price of paddy and fall in the price of jute. Short rainfall at the time of sowing is responsible for the decrease in Champaran and the Santal Parganas. Sowings were still going on in parts of Muzaffarpur, Bhagalpur and Balasore at the time of report.

5. Condition and prospects.—The condition of the crop is, on the whole, fair.

6. General.—The quantity of jute which remains from the crop of 1919 is small.

The statement below compares the area under jute in this province this year with the preliminary and final figures of last year:—

Name of Province.	Estimated acreage under jute.			Difference between the preliminary forecast, 1920, and final forecast, 1919.	
	1919.		1920.		
	Preliminary.	Final.	Preliminary.	Increase.	Decrease.

A. C. DOBBS,
Director of Agriculture, Bihar and Orissa.

RANCHI,
The 3rd July 1920.

APPENDIX I.

First Forecast of the Jute Crop of Bihar and Orissa, 1920.

Division.	District.	Total area of the district.	Estimated total area under cultivation.	Estimated normal area under jute. (This figure has been arrived at by taking the average of 10 years immediately preceding the year to which this forecast relates.)	Estimated area under jute.		Whether much, little or no jute remains in the district from the crop of 1919.	Date by which the sowing of the crop generally commenced this year and whether that date was early, normal or late.	Remarks by District Officers.
					Last year (1919).	This year (1920).			
1	2	3	4	5	6	7	8	9	10
Tirhut ...	Champaran	2,269,840	1,420,200	1,900	2,400	1,400	A little	End of April to beginning of May.	The weather is not at all favourable in the Sadar Subdivision. Absence of rain has checked sowings. The weather and rainfall were not favourable in the Bettiah subdivision too. Crops are suffering for want of moisture in the Sadar subdivision. The present condition of the crop is not good in the Bettiah subdivision as well. The crop is expected to be poorer than last year. There has been a decrease in the area sown. Sowings have been completed. The date of sowing was normal in the Sadar subdivision and somewhat late in the Bettiah subdivision.
	Muzaffarpur	1,942,324	1,627,000	1,700	2,200	2,100	Nil	March ...	The weather and rainfall have not been favourable for the growth of the crop. The condition of the crop is fair. The date of sowing was normal. Sowing is still going on.
Bhagalpur	Bhagalpur ...	2,661,020	1,684,100	1,267(a)	1,150	1,150	Very little ...	June in Sadar subdivision on account of late rain; April to June in other subdivisions.	Sowing has not been completed in the Madhipura subdivision. The condition of the crop is poor.
	Purnea ...	3,196,188	1,694,400	214,500	176,000	162,382	Little	March ...	Owing to the rise in the price of paddy and fall in the price of jute, the area cultivated with jute this year is less than the area sown last year. Jute cultivation is no longer profitable. Want of rain at the time of cultivation injuriously affected the area cultivated. The recent showers have materially improved the condition and prospects of the crop. There is some stock of jute in the district. The condition of the crop is fair.
	Santal Parganas.	3,490,400	1,717,900	3,100	1,700	500	Little remaining Pakaur but much in Rajmahal.	First week of June.	The weather and rainfall were not favourable for the growth of the crop. The condition of the crop is fair in Rajmahal but poor in Pakaur. Sowings were late but have been completed. The crop is expected to be worse in comparison with the crop of the last year. All the land intended for growing jute had been prepared for sowing but could not be sown for want of rain; hence the decrease in area.
Orissa ...	Cuttack ...	2,340,307	1,223,600	17,300	18,400	18,000	Very little ...	Last week of April.	The weather and rainfall have not been favourable for the growth of the crop. The condition of the crop is fair. Sowings have been completed. The date of sowing was normal.
	Balasore ...	1,382,631	932,200	2,600	2,480	2,100	Little jute remains in hands of cultivators for their own agricultural use.	Middle of May ...	The weather being favourable the prospect of the crop seems hopeful. Sowings are going on at places.
	Total ...	17,227,665	10,309,300	242,367 or in round numbers 242,400	203,430 or in round numbers 203,400	177,832 or in round numbers 177,800			

(a) Revised by the Collector. The previous figure appears to have included 107 acres of Hibiscus Cannabinus.

* Figures relate to headquarters only.

DEPARTMENT OF LAND RECORDS AND AGRICULTURE, ASSAM.

Preliminary Forecast of Jute Crop in Assam, 1920.

(NOTE.—On an average of the five years ending 1918-19 the area under jute in Assam represents some 3·5 per cent. of the total area under jute in British India.)

1. Character of the season.—The rainfall in February was above the average, except in the lower Assam Valley where it was nearly normal. It was excessive everywhere in March, when it was more than double the average in the principal jute-growing districts. In April the rain was scanty in the Surma Valley and about normal in the Assam Valley, but in May it was in defect almost in all districts. The excessive rain at sowing time tended to diminish the area that would have been put under jute, particularly in Sylhet, Goalpara and Kamrup. Though the weather has changed for the better, the general condition of the crop has not improved and is everywhere reported to be worse than in last year.

2. Area sown.—According to the estimates of the Deputy Commissioners the area sown this year has decreased in every district, except Nowgong, where there is a slight increase owing to immigration from Mymensingh. The total area under the crop is estimated at 125,100 acres, which is 12,200 acres less than the actual area of last year. Unfavourable market results then as well as the unfavourable weather are responsible for the decrease.

3. Stock.—According to the report of the Deputy Commissioners there is much jute in stock from last year in Sylhet, Goalpara and Nowgong.

J. McSWINEY,

Director of Land Records and Agriculture, Assam.

SHILLONG,

The 3rd July 1920.

Statement showing the consolidated acreage figures of jute in Assam, 1920.

* Revised.

APPENDIX I.

Preliminary Forecast of the Jute Crop of Assam for 1920.

District.	Normal area under jute.	Area under jute.		Difference between the figure now estimated for 1920 and the final of 1919.		Whether much, little or no jute remains in the district from the crop of 1919.	Date by which the sowing of the crop generally commenced this year and whether that date was early, normal or late.	Remarks by Deputy Commissioners.
		Final of 1919.	Now estimated for 1920.	Increase.	Decrease.			
1	2	3	4	5	6	7	8	9
	Acres.	Acres.	Acres.	Acres.	Acres.			
Cachar ...	300	400	200	.....	200	None	April : normal ...	The decrease in area as compared with the final figure of last year is due to (1) excessive rain in the latter part of of March and first part of April, (2) fall in the price of jute and (3) the greater necessity for growing the autumn rice crop. The weather has been unfavourable up till now and the outturn is likely to be worse than last year.
Sylhet ...	16,000	26,100	20,200	.....	5,900	Much	Beginning of April : late.	The excessive rainfall at sowing time, the low price of jute last year, and the large quantities of jute remaining unsold account for the decrease of area from last year. The rain during the period has been sometimes heavy and sometimes scanty and thus caused slight damage to the crop. On the whole the weather is not favourable and the outturn is likely to be worse than last year.
Goalpara ...	42,400	60,000*	55,200	.....	4,800	Much	March : normal ...	The wheather was not favourable at sowing time which is the cause of the decrease in area, nor has it been favourable up till now. Insects and hail-storms did some damage. The present condition of the crop is not good and is worse than last year.
Kamrup ...	8,100	17,000*	15,900	.....	1,100	Little	15th March ; early.	The decrease in area as compared with last year's actual is due to excessive rainfall at the time of sowing. The weather has been unfavourable and some damage has been done to the crop by insects. The present condition of the crop is not good and the prospects are worse than in the previous year.
Darrang ...	7,000	10,100*	9,800	.....	300	Some	Middle part of April : normal.	The weather on the whole has not been favourable and the outturn is not better than last year.
Nowgong ...	5,700	18,800*	19,100	300	.....	Much	1st April : normal	The increase in area from the actual of last year is due to extention of cultivation chiefly by the Mymensingh settlers and to some extent by local people, and also due to the favourable weather at sowing time. The weather in April and May was less favourable owing to insufficient rain and the early growth of the crop was retarded to some extent, but the recent rain has done much good. The outturn is therefore expected to be normal or the same as last year.
Sibsagar ...	300	500*	400	.....	100	Little	Middle of March : normal.	The weather has been unfavourable from time of sowing up till now and hence the fallin area from the actual of last year : the outturn also will be a little less than last year.
Lakhimpur ...	200	200*	200	.....	.....	None	1st April : normal	The weather was rainy at the time of sowing and has been indifferent up till now. The present condition of the crop is fair.
Garo Hills ...	4,100	4,200	4,100	.....	100	None	15th April : late	The want of timely rainfall at sowing time is the cause of the decrease in area. The weather has not been favourable to the crop and the present condition is not good. The outturn is likely to be worse than last year.
Total ...	84,100	137,300*	125,100	300	12,500			

* Revised on the basis of crop abstract.

J. C. Roy,
for *Director of Agriculture, Bengal.*

Dacca, *the 21st July 1920.*

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 22nd July 1920.

Summary.—Moderate to heavy rain fell over the greater part of the province. It has facilitated the transplanting of winter paddy and improved the prospects of standing crops generally. More rain, however, is needed. Harvesting of jute and autumn paddy is proceeding in some eastern and northern districts. The average price of common rice for the province has fallen by about 0·22 per cent. as compared with that of the previous week.

Serial No.	District and subdivision.	Rainfall.	PRICE OF COMMON RICE, IN SEERS, PER RUPEE.		Character of the weather, condition of crops, etc.
			This week.	Previous week.	
1	2	3	4	5	6
		Inches.			
1	24-PARGANAS	7·61	5	5	Condition and prospects of jute are good. Effects of weather are favourable to its growth. A good progress has been made in the cultivation of the crop. Fodder and water are sufficient.
	Diamond Harbour.	7·94	4 3/8	4 1/2	
	Barrackpore	(*n*)	(*n*)	4 1/2	
	Barasat ...	8·57	4 1/2	4 1/2	
	Basirhat ...	(*n*)	(*n*)	4 9/16	
2	NADIA ...	1·67	5	5	The rainfall has done good to paddy and jute. The price of rice is almost stationary.
	Kushtia ...	(*n*)	(*n*)	4 1/2	
	Meherpur ...	(*n*)	(*n*)	5	
	Chuadanga,..	(*n*)	(*n*)	5	
	Ranaghat ...	(*n*)	(*n*)	4 1/2	
3	MURSHIDABAD	2·61	5	5	Prospects of standing crops are fair. Transplantation of winter paddy has begun, but the operation is retarded for want of sufficient rain. More rain is wanted. Condition and prospects of jute are fair. Effects of weather are now favourable to its growth. Some damage was done by drought. Weeding continues. Cattle-disease is reported from Burdwan and Gokarna thanas in Kandi subdivision. Fodder is sufficient. No large import of rice; export continues from Jangipur.
	Lalbagh ...	4·52	4 1/2	4 1/2	
	Jangipur ...	2·51	5	5 1/2	
	Kandi ...	2·17	5	5 1/2	
4	JESSORE ...	4·59	5	5	Transplantation of *aman* paddy continues. Harvesting of *aus* paddy is going on. Condition and prospects of jute are favourable. Insect-pests are reported from Jhenidah and Narail subdivisions. Fodder is sufficient. Import or export of rice as usual.
	Jhenidah ...	1·03	5 1/2	4 1/2	
	Magura ...	1·68	4 1/2	4 1/2	
	Narail ...	1·50	5 5 1/2*	5 5 1/2*	
	Bangaon ...	7·74	5	4 11/16	
5	KHULNA ...	3·97	4 1/2	5	Preparation of lands for *aman* paddy is in progress. Condition and prospects of jute and the effects of weather on the crop are good. Cultivation for jute is over; harvesting has not commenced. Fodder and water are sufficient. Cattle-disease is reported from Kaliganj, Morelganj and Rampal police-stations.
	Satkhira ...	3·31	4 15/32 and 5	4 1/2	
	Bagerhat ...	4·72	4 1/2 5 1/2*	4 1/2 5 1/2*	

* Burma rice.

(*n*) Not reported.

Serial No.	District and subdivision.	Rainfall.	Price of common rice, in seers, per rupee.		Character of the weather, condition of crops, etc.
			This week.	Previous week.	
1	2	3	4	5	6
		Inches.			
6	BURDWAN ...	1·64	4½	4½	Weather cloudy and cyclonic. Transplantation of winter paddy is retarded in the Sadar and Kalna subdivisions for want of sufficient rain. Jute is doing well. Export of rice is reported from Kalna and Katwa subdivisions. High prices are affecting labouring and non-agricultural classes.
	Asansol ...	5·53	5¼	5¼	
	Katwa ...	5·46	4 7/8	4 7/8	
	Kalna ...	2·02	4⅜	4½	
7	BIRBHUM ...	2·75	5	5	Transplantation of winter paddy has begun in a few low-lying areas. More rain is urgently wanted. Fodder and water are sufficient. Cattle-disease is reported from thanas Muraroi and Moureswar. A sum of Rs. 1,957 has been advanced as agricultural loans.
	Rampurhat	2·43	5½	5¾	
8	BANKURA ...	5·07	5	5 5/16	Transplantation of paddy continues. Prospects of standing crops are good. No large export of rice or paddy. Cattle-disease is reported from Simlapal and Onda.
	Vishnupur	6·53	5	5 5/16	
9	MIDNAPORE	8·92	5	5	Transplantation of winter paddy continues. Jute and winter paddy have been slightly damaged in the flooded areas of Tamluk and Panskura thanas. Elsewhere effects of weather on the growth of jute are unfavourable. Fodder is sufficient. Cattle-disease is reported from Binpur thana.
	Ghatal ...	5·43	4 13/16	4 13/16	
	Tamluk ...	8·82	4¾	4¾	
	Contai ...	4·67	5	5	
10	HOOGHLY ...	2·86	4½	4½	Effects of weather on the growth of the crops are favourable. Condition and prospects of jute are fair; there has been no damage to the crop and harvesting has not commenced. Fodder is sufficient. Price of rice is steady.
	Serampore ...	3·22	4½	4½	
	Arambagh ...	9·21	5	5	
11	HOWRAH ...	8·13	5	4½	Weather seasonable and favourable to jute. Paddy seedlings are being reared and transplantation has just begun. Standing jute crop is growing well; no damage is reported and condition of the crop is good. Weeding of jute is going on. Fodder is sufficient.
	Ulubaria ...	8·66	4⅜	4⅜	
12	RAJSHAHI (RAMPUR-BOALIA).	1·88	4¾	4 7/8	Prospects of jute and other standing crops are fair. Slight damage to jute by drought is reported. Harvesting of jute has begun in Naogaon subdivision. Fodder is sufficient.
	Naogaon ...	1·52	5¼	5	
	Nator ...	1·36	4½	4½	
13	DINAJPUR ...	0·70	4 13/16	4 15/16	Weather very sultry. Want of rain is very likely to affect jute and *bhadoi* paddy. Fodder is sufficient.
	Thakurgaon	2·31	5½	6	
	Balurghat ...	1·12	5¼	5	
14	JALPAIGURI	6·15	4¾	4½	Transplantation of winter paddy is going on slowly. Prospects and condition of *bhadoi* and winter paddy are not fair for want of sufficient rain. Effects of weather on the growth of jute are favourable. Cattle-disease is reported from places. Fodder is sufficient.
	Alipur ...	0·98	5	5	

Serial No.	District and subdivision.	Rainfall.	PRICE OF COMMON RICE, IN SEERS, PER RUPEE.		Character of the weather, condition of crops, etc.
			This week.	Previous week.	
1	2	3	4	5	6
		Inches.			
15	DARJEELING	7·32	4½	4½	Harvesting of maize has commenced and that of potatoes is going on. *Marua* is being transplanted. Cattle-disease is prevalent at places. Stocks of rice, fodder and water are sufficient.
	Kurseong ...	8·27	4½	4½	
	Siliguri ...	4·95	4½	4½	
	Kalimpong...	4·01	4½	4½	
16	RANGPUR ...	1·18	5	5	Weather very hot. Harvesting of *aus* paddy and jute is going on. Transplantation of winter paddy and steeping of jute are being retarded for want of sufficient rain. More rain is urgently wanted. Condition and prospects of jute are fair. Burma rice is being imported into Saidpur. Price of rice is stationary. Fodder and water are sufficient.
	Nilphamari	1·09	4⅞	4 15/16	
	Kurigram ...	9·12	4¾	4¾	
	Gaibandha ...	0·54	5	5	
17	BOGRA ...	0·45	5¼	5¼	Harvesting of jute and *aus* paddy and transplantation of winter paddy seedlings continue. Prospects of jute are fair.
18	PABNA ...	0·99	4¾	4⅞	Prospects of standing crops are good. Harvesting of *aus* paddy and jute has commenced in some places. More rain is now wanted for transplantation of winter paddy. Condition and prospects of jute are fair; the effects of weather on the growth of the crop are not bad, but insect-pests are damaging the standing plants to a great extent. Fodder is sufficient.
	Sirajganj ...	0·95	4½	4½	
19	MALDA ...	0·62	5	5	Sowing of winter paddy has commenced. Prospects of *bhadoi* paddy are good. Condition of jute is unfavourable. Fodder and water are sufficient.
20	COOCH BEHAR	0·66	5⅛	5⅛	Weather hot and rainy. Harvesting of *bitri* paddy and transplantation of *haimanti* seedlings are going on. Cutting, steeping and washing of jute are in progress. Condition of jute and the effects of weather on it are favourable: no damage to the crop is reported. Fodder is sufficient.
21	DACCA ...	4·74	5 / 5*	4⅞ / 5*	Weather hot with high wind. Rainfall during the week was heavy; it has been favourable to transplanting of paddy. Harvesting of jute continues; prospects are fair. Rice market is almost steady.
	Manikganj ...	1·67	5	4⅞	
	Narayanganj	4·75	4⅜	4⅜	
	Munshiganj (*a*).	(*n*)	5	5	
22	MYMENSINGH	1·54	4¾	4¾	Harvesting of jute and *aus* paddy and transplantation of winter paddy are going on; the effects of weather on jute are good. More rain is wanted in Netrakona and Kishoreganj subdivisions. The growth of jute in *char* lands is being affected badly by flood. Prospects of standing crop are fair. Fodder and water are sufficient. Cattle-disease is reported from Jamalpur and Netrakona subdivisions.
	Jamalpur ...	1·49	4¾	4½	
	Tangail ...	1·53	4 1/16	(*n*)	
	Netrakona ...	2·60	4¾	4⅜	
	Kishorganj...	4·12	4¾	4⅞	

(*n*) Not reported. * Burma rice.

(*a*) Munshiganj being very near to Dacca and Narayanganj, its rainfall statistics are not quoted. To give information regarding the northern part of the district, rainfall figures for Kapasia thana are reported here.

Serial No.	District and subdivision.	Rainfall.	Price of common rice, in seers, per rupee.		Character of the weather, condition of crops, etc.
			This week.	Previous week.	
1	2	3	4	5	6
		Inches.			
23	Faridpur ...	0·41	$4\frac{3}{4}$ / 5^{*}	$4\frac{1}{16}$	The rain has been favourable to jute and paddy. Insects in jute are reported from Rajbari. Harvesting of *aus* paddy and jute is going on. Prospects of jute and paddy are fair. Fodder is sufficient.
	Goalundo ...	1·01	$4\frac{1}{2}$	$4\frac{3}{4}$

LIBERALITY OF THE HON'BLE BABU BROJENDRA KISHORE RAY CHOWDHURY OF GAURIPUR.

No. 1612 Medl., dated Calcutta, the 22nd July 1920.

From—THE HON'BLE MR. A. MARR, I.C.S., Secretary to the Government of Bengal, Finance (Medical) Department,

To—The Commissioner of the Dacca Division.

With reference to your letter No. 3148 J., dated the 28th June 1920, in which you report that the Hon'ble Babu Brojendra Kishore Ray Chaudhuri of Gauripur, in the district of Mymensingh, has made a donation of Rs. 40,000 for the Victory Memorial Hospital Fund in Mymensingh, I am directed to request that you will be so good as to convey to him the thanks of Government for his liberality and public spirit.

DEPARTMENT OF STATISTICS, INDIA

CALCUTTA TRADE FLUCTUATIONS

THE following tables are intended to show the trade by all routes, *i.e.*, by rail, river, canal, road, and sea, of the Calcutta block* in certain selected articles during the two months, April and May, 1920, as compared with the corresponding period of 1919 and 1918. The statistics have been compiled from returns furnished by the Collector of Customs, Calcutta, Railway Audit Offices, Steamer Companies, the Commissioners for the Port of Calcutta, the Collectors of the 24-Parganas and Howrah, and the Assistant Engineer, Calcutta Canals.

General Summary

Imports.—The imports of rice, including paddy†, into Calcutta* by rail, river, canal, road, and sea (coastwise) during the two months, April and May, 1920, amounted to 1,836,000 maunds, as against 4,294,000 maunds in the corresponding period of the preceding year—a decrease of 57 per cent. There was an increase of 13 per cent in the imports of coal and coke (19,956,000 maunds as against 17,679,000 maunds last year). The imports by rail, river, road, and sea (coastwise) of Indian cotton piecegoods showed an increase of 57 per cent, the total value amounting to Rs. 1,79 lakhs as against Rs. 1,14 lakhs in 1919. The quantity of indigo imported during the two months, April and May, 1920, increased from 112 maunds to 3,007 maunds. The imports of raw jute amounted to 664,000 bales as against 398,000 bales, an increase of 67 per cent in the period under report. The importation of gunny bags also increased from 46 million bags to 86 millions. The total imports of oilseeds (linseed and rape and mustard seed) increased by 12 per cent from 1,581,000 maunds to 1,771,000 maunds. The imports of sugar increased by 26 per cent from 133,000 maunds to 167,000 maunds, and those of tea decreased by 60 per cent from 292,000 maunds to 118,000 maunds.

Exports.—The exports of cotton piecegoods, foreign, from Calcutta by all routes during the two months, April and May, 1920, decreased by 13 per cent (Rs. 4,75 lakhs as against Rs. 5,47 lakhs last year). The exports of gunny bags (including the exports by sea to foreign countries) increased from 182 million to 240 million bags, and the shipments of gunny bags to other Indian ports increased from 8 millions to 10 millions in number in the period under review. The quantity of kerosene oil despatched from Calcutta and Budge-Budge by internal routes and by sea (coastwise) increased from 675,000 maunds to 913,000 maunds, or by 35 per cent.

* The Calcutta block consists of the town of Calcutta with Howrah and Kidderpore Docks.
† One maund of paddy is equivalent to 25 seers of rice.

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 29th July 1920.

Summary.—During the week heavy rain fell in the Dacca and Chittagong Divisions and in parts of the Presidency Division. Elsewhere the fall was generally light. Transplantation of winter paddy is proceeding, but more rain is needed to help the operation. Harvesting of jute and autumn paddy continues. The outlook of autumn paddy is generally reported to be satisfactory. Prospects of other standing crops are fair. The average price of common rice for the province has slightly risen as compared with that of the previous week.

Serial No.	District and subdivision.	Rainfall.	Price of common rice, in seers, per rupee.		Character of the weather, condition of crops, etc.
			This week.	Previous week.	
1	2	3	4	5	6
		Inches.			
1	24-Parganas	3·21	4½	5	Condition and prospects of jute are good. The effects of weather on the growth of the crop are favourable. Fodder and water are sufficient.
	Diamond Harbour.	(*n*)	(*n*)	4 3/16	
	Barrackpore	3·04	4½	(*n*)	
	Barasat ...	2·67	4⅜	4⅜	
	Basirhat ...	(*n*)	(*n*)	(*n*)	
2	Nadia ...	5·39	5	5	Transplantation of *aman* paddy has commenced. Prospects of jute and paddy are fair. The effects of weather are mostly favourable. Some damage has been done to jute by insect-pests in thanas Kushtia, Kumarkhali and Daulatpur. Cattle-disease is reported from Haringhata thana.
	Kushtia ...	4·52	4½	(*n*)	
	Meherpur ...	4·70	5 1/16	(*n*)	
	Chuadanga...	4·62	5	(*n*)	
	Ranaghat ...	7·81	4½	(*n*)	
3	Murshidabad	5·25	4⅜	5	Prospects of standing crops are good. Recent rain has facilitated the transplantation of winter paddy. Condition and prospects of jute are fair. The effects of weather are favourable to the growth of jute though the crop was affected in the early stage. Some damage has been done to jute by insects in the Sadar subdivision. Weeding continues. Cattle-disease is reported from Burdwan and Gokarna thanas in Kandi subdivision. Fodder is sufficient. There is no large import. Export continues from Jangipur subdivision. The price of rice is rising.
	Lalbagh ...	5·26	4⅜	4⅜	
	Jangipur ...	4·62	5	5	
	Kandi ...	7·00	5	5	
4	Jessore ...	5·39	5	5	Harvesting of *aus* rice and transplanting of *aman* paddy continue. Condition and prospects of jute are generally favourable. Damage to jute by insect-pests and to other standing crops by flood is reported from some parts of the Narail subdivision. Fodder is sufficient. Import or export of rice as usual.
	Jhenidah ...	(*n*)	(*n*)	5¼	
	Magura ...	(*n*)	(*n*)	4½	
	Narail ...	3·21	4½	5 5¼*	
	Bangaon ...	2·46	5	5	
5	Khulna ...	9·56	4⅜	4½	Preparation of lands for *aman* paddy is in progress. Condition and prospects of jute are good. No damage is reported. Fodder and water are sufficient. Cattle-disease is reported from Paikgacha, Morelganj and Rampal police-stations.
	Satkhira ...	4·03	4¼ and 5	4 13/32 and 5	
	Bagerhat ...	5·97	4¼ 5¼*	4⅜ 5¼*

	Contai ...	3·85	5¾	5	
10	HOOGHLY ...	1·65	5¼	4¼	Effects of weather on the growth of standing crops are favourable. Condition and prospects of jute are fair: there has been no damage to the crop. Harvesting has not commenced. Fodder is sufficient. Price of rice is steady.
	Serampore ...	1·13	4½	4½	
	Arambagh ...	4·14	5	5	
11	HOWRAH ...	1·34	5¼	5	Transplantation of paddy continues. Sugarcane and jute crops are doing well; the condition is good. Weather is favourable to jute. No damage is reported. Fodder is sufficient.
	Uluberia ...	4·15	4½	4⅝	
12	RAJSHAHI (RAMPUR-BOALIA).	4·88	4⅞	4⅞	Prospects of jute and other standing crops are fair. Harvesting of jute in low land is going on. Transplantation of winter rice has commenced. Fodder is sufficient.
	Naogaon ...	3·90	5 1/16	5¼	
	Nator ...	2·53	4½	4½	
13	DINAJPUR ...	5·23	4 3/16	4 3/16	More rain is wanted. No damage to jute by excessive rain or insects is reported. Fodder is sufficient.
	Thakurgaon	2·37	5	5¼	
	Balurghat ...	1·65	5¼	5¼	
14	JALPAIGURI	8·06	4¾	4¾	Prospects and condition of jute are fair. Effects of weather on the growth of jute are favourable. The condition of *bhadoi* and *haimanti* paddy are not favourable for want of sufficient rainfall. No damage has yet been done to the standing crops. Fodder is sufficient.
	Alipur ...	2·43	5	5	

(*n*) Not reported.

Serial No.	District and subdivision.	Rainfall.	Price of common rice, in seers per rupee.		Character of the weather, condition of crops, etc.
			This week.	Previous week.	
1	2	3	4	5	6
		Inches.			
15	DARJEELING	6·62	4½	4½	Condition and effects of weather on jute are good. Maize and potatoes are being harvested. *Marua* is progressing well. Stocks of rice, fodder and water are sufficient. Cattle-disease is prevalent at places.
	Kurseong ...	(*n*)	(*n*)	4½	
	Siliguri ...	11·17	5	4½	
	Kalimpong...	4·68	4½	4½	
16	RANGPUR ...	3·87	5	5	Harvesting of *aus* paddy and transplanting of *aman* paddy are in progress. Cutting of jute is going on. Steeping of jute is retarded for want of rain. More rain is urgently wanted. Condition and prospects of jute are fair. Fodder and water are sufficient.
	Nilphamari	4·92	5	4¾	
	Kurigram ...	2·40	4¾	4¾	
	Gaibandha ...	2·15	5	5	
17	BOGRA ...	2·96	5 1/16	5¼	Transplantation of winter paddy seedlings and harvesting of jute and *aus* paddy continue. More rain is needed for steeping of jute. Prospects of jute otherwise are fair.
18	PABNA ...	1·42	4¾	4¾	Prospects of standing crop are good. More rain is wanted for transplantation of *aman* paddy. Condition and prospects of jute are not good. Effects of weather are not bad, but insect-pests have damaged the standing plants to a great extent. Harvesting of jute and *aus* paddy continues in some places. Fodder is sufficient.
	Sirajganj ...	3·12	4¼	4¼	
19	MALDA ...	3·23	5¼	5	Growth of jute is unfavourable. Transplantation of winter paddy continues. Prospects of *bhadoi* crops are good. Cattle-disease is reported from Nawabganj thana. Fodder is sufficient.
20	COOCH BEHAR	2·88	5 5/16	5¼	Weather hot with occasional rain. Harvesting of *bitri* paddy and transplantation of *haimanti* paddy seedlings are in progress. Effects of weather on jute are favourable. No damage is reported. Cutting, steeping and washing of jute are going on. Fodder is sufficient.
21	DACCA ...	5·99	5 5¼*	5 5*	Weather seasonable. There was sufficient rainfall during the week and is favourable for the growth of paddy and jute on high land. Harvesting of *aus* paddy and jute continues. Prospects of paddy are good, but those of jute are fair. Fodder and water are sufficient.
	Manikganj ...	2·64	5	5	
	Narayanganj	4·68	4⅜	4⅜	
	Munshiganj (*a*).	(*n*)	5¼ 5*	5 ...	
22	MYMENSINGH	2·95	4¼	4¼	Weather seasonable. Harvesting of jute and *aus* paddy and transplantation of winter paddy seedlings are going on. The effects of weather are favourable. More rain is wanted in the Netrakona subdivision. The crops in *char* lands in Jamalpur subdivision have been damaged by flood. Prospects of standing crops are fair. Water and fodder are sufficient. Cattle-disease is reported from Netrakona subdivision.
	Jamalpur ...	3·50	4¾	4¾	
	Tangail ...	(*n*)	(*n*)	4 11/16	
	Netrakona ...	2·47	4¾	4¾	
	Kishorganj...	7·98	4⅛	4⅞	

(*n*) Not reported. * Burma rice.

(*a*) Munshiganj being very near to Dacca and Narayanganj, its rainfall statistics are not quoted. To give information regarding the northern part of the district, rainfall figures for Kapasia thana are reported here.

Serial No.	District and subdivision.	Rainfall.	Price of common rice, in seers, per rupee.		Character of the weather, condition of crops, etc.
			This week.	Previous week.	
1	2	3	4	5	6
		Inches.			
23	Faridpur ...	5·85	4½ 5*	4¾ 5*	The rain has been favourable to standing crops. Insects in jute are reported from Bhanga. *Aus* paddy and jute are being harvested. Prospects of jute and paddy are fair. Fodder is sufficient
	Goalundo ...	2·12	4¾	4¼	
	Madaripur ...	3·78	4¾ 5*	4¾ 5 1/6*	
	Gopalganj (*a*)	6·87	4¼ 5*	4¼ 5*	
24	Bakarganj (Barisal).	10·61	4¼ 5¾*	4¾ 5 5/31*	Prospects of standing crops excepting those of jute in Pirojpur thana are good. Weather rainy and favourable to jute crop. Slight damage to the crop by insect-pests is reported from the Sadar and Pirojpur subdivisions. About four annas jute crop has been harvested. Fodder and water are sufficient. Cattle-disease is reported from Mathbaria thana.
	Pirojpur ...	5·18	4¾	4¾	
	Patuakhali	11·55	5	5	
	Dakshin Shabazpur (Bhola).	9·10	4¼	4¼	
25	Chittagong	9·29	4¼ 5¼*	4¼ 5¼*	Harvesting of *aus* paddy and cultivation of winter paddy are in progress. Prospects of standing crops are fair. Fodder is sufficient. *Panga* salt is selling at 12 seers per rupee at Sadar.
	Cox's Bazar	(*n*)	(*n*)	(*n*)	
26	Tippera ... (Comilla).	5·20	4 7/16 5¾*	4 9/16 5¾*	Weather hot and cloudy. Harvesting of *aus* paddy and jute is going on. Transplantation of *aman* paddy has commenced. Prospects of jute and *aus* paddy are not hopeful. The present weather is good to jute, but owing to drought at the beginning of the season the stalks are in flower and stunted.
	Brahmanbaria.	2·72	4⅞	4⅞	
	Chandpur. ...	6·14	4 13/32 5 85/249*	4 13/32 5 85/249*	
27	Noakhali ...	10·93	4½	4½	Prospects of jute and other standing crops are fair. The effects of weather on jute are favourable. Harvesting of jute and *aus* paddy is in progress. Transplantation of *aman* paddy has commenced. Cattle-disease is reported from Chhagalnava, Companyganj, Senbag, Feni, Parasuram and Sudharam.
	Feni ...	8·55	4 3/16	4 3/16	
28	Chittagong Hill Tracts.	3·35	4	3¼	Prospects of *jhum* crops are not favourable. Ploughing for *aman* paddy continues slowly for want of rain. Stocks of food-grains are insufficient; action is being taken to import Burma rice. Fodder is sufficient. Cattle-disease is still reported from Ramgarh and Mahalcheri thanas.

(*a*) The rainfall at Haridaspur, which is very near to Gopalganj, is shown here.
* Burma rice. (*n*) Not reported.

DEPARTMENT OF AGRICULTURE, BENGAL.

First Forecast of the Cotton Crops of Bengal, 1920-21.

(NOTE.—On an average of the five years ending 1917-18, the area under the cotton crops in Bengal has represented some 0·2 per cent. of the total area under cotton in India.)

There are two crops—early and late. The "early" crop is chiefly grown in the Chittagong Hill Tracts and in the State of Hill Tippera and to a small extent in other districts. The "late" crop is grown in Bankura and Midnapore. As the "late" crop has not yet been sown, this forecast deals only with the "early" crop.

Character of the season.—At the time the crop was sown, the weather was generally unfavourable. Drought in May and in the early part of June in the district of Midnapore and heavy rainfall during April in the State of Hill Tippera retarded generally the sowing and germination of the crop. Elsewhere the conditions were only fair. Subsequently since the latter part of June, moderate rainfall has improved the prospects, and the present condition is generally reported as fair.

Area sown.—The area sown with early cotton is reported to be 68,470 acres this year against 70,272 acres reported in the corresponding forecast of last year.

Of the late crop, no area is reported to have been sown up to date, against 303 acres in the corresponding forecast of last year.

G. EVANS,
Director of Agriculture, Bengal.

DACCA,
The 3rd August 1920.

REPORT ON THE ADMINISTRATION OF THE SALT DEPARTMENT IN BENGAL DURING THE YEAR 1919-20.

NOTIFICATION.

No. 2287-SR.—The 27th July 1920.—The following extracts from the Report of the Commissioner of Excise and Salt, Bengal, on the administration of the Salt Department in the Presidency of Bengal during the year 1919-20 are published for general information.

A. MARR,
Secy. to the Govt. of Bengal.

No. 2339 E., dated Calcutta, the 22nd June 1920.

From—S. C. MUKERJEE, ESQ., I.C.S., Commissioner of Excise and Salt, Bengal,

To—The Secretary to the Government of Bengal, Financial Dept.

I HAVE the honour to submit the following consolidated report on the administration of the Salt Department for the year 1919-20. The report deals with the preventive operations in the saliferous districts of the Presidency, which were under the control of the Commissioner of Excise and Salt, and with the importation and issues of salt under the control of the Customs authorities.

2. **Charge of the Department.**—I was in charge of the Department throughout the year.

CHAPTER I.

General.

3. **Credit system of payment of duty.**—The Collector of Customs, Calcutta, reports that securities to the extent of Rs. 76,33,025 were deposited during the year as compared with Rs. 72,83,000 in 1918-19. The amount of duty debited during the year under the system was Rs. 1,09,48,287 against Rs. 1,03,64,573 in the previous year. There were 59 depositors during the year against 50 in 1918-19, and none of them closed their accounts.

4. **Salt *golas* at Sulkea and Chittagong.**—During the year a portion of the foreshore bank at Sulkea was revetted and extensive repairs were carried out on some of the pontoons, which again gave considerable trouble during the period of strong tides. The administrative approval of Government was accorded to the erection of a new workshop, and the Collector of Customs hopes that the work will not be delayed. A start was made with replacing some of the old gear, purchases of which were suspended during the war; some new salt tubs were purchased and an indent was made on the Director-General of Stores, India Office, for some new steelyards and spare parts. There was no lack of storage accommodation at Chittagong during the year. A revised estimate amounting to Rs. 87,000 was submitted to Government for the removal of the Sadarghat *golas* to Moheshkhal, and it has been sanctioned by the Government of India. The work will be taken in hand as soon as funds are allotted by the Public Works Department.

5. **Consumption of duty-free salt for commercial purposes.**—The quantity of salt delivered free of duty for commercial purposes, or on which a drawback was subsequently allowed for the same reason, amounted to 7,918 maunds as compared with 6,880* maunds in 1918-19.

6. **Manufacture of salt in Bengal.**—As stated in paragraph 6 of last year's report, a license to manufacture salt at Samudrapur in the Contai subdivision of the Midnapore district was granted to a company in Calcutta. Necessary machinery has been set up, but owing to difficulty in obtaining supplies of fresh water in the locality the company was unable to start manufacture during the year.

* Revised figures.

CHAPTER II.

Stocks, Imports and Clearances.

7. **Accounts of stocks and issues.**—The stocks, imports and clearances of salt in and from the ports of Calcutta and Chittagong for the years 1918-19 and 1919-20 are shown below :—

Stocks, imports, etc.	1918-19. Mds.	1919-20. Mds.
Total of all stocks at the commencement of the year	10,75,132*	13,84,159
Total quantity imported during the year.	1,02,08,506*	1,12,61,895
Excess found in the *golas* ...	698*	2,381
Total ...	1,12,84,336*	1,26,48,435
Quantity of duty-paid salt actually issued during the year ...	94,01,428*	1,08,11,746
Quantity which passed free of duty for the manufacture of glazed stoneware, etc.	6,880*	7,918
Quantity of non-duty-paid salt removed under bond to all inland ware-houses	3,66,273	3,78,670
Quantity written off during the year for wastage or otherwise ...	1,25,596	89,053
Total ...	99,00,177*	1,12,87,387
Balance at the close of the year ...	13,84,159*	13,61,048

* Revised figures.

Both the import and clearance figures show considerable increase.

8. **Imports.**— * * * * * * * * The total imports to Calcutta increased by 18·2 per cent. and those to Chittagong decreased by 49·5 per cent. There was a large increase in all qualities of salt imported to Calcutta with the exception of Port Said. Under war conditions, freight was more readily available at Port Said, but during the year under report other varieties of salt were able to obtain more tonnage. The Collector of Customs reports that imports from Spain might have been larger but for the labour troubles at Torrevieja. There were no imports to Chittagong from the United Kingdom except table salt in bottles. The revenue under the Persian Gulf salt is due to an excess quantity in ship's stores. The imports from Aden nearly doubled, the increase being by 2,12,382 maunds, while those from Port Said fell very largely from 9,65,463 maunds to 69,774 maunds only. A quantity of 81,866 maunds of Spanish salt was imported during the year against *nil* in the previous year. Two charter parties fell through owing to strike difficulties at Torrevieja. There was no direct import from Massowah except that of 15,000 maunds of non-duty-paid salt transferred from Calcutta.

Out of the total importation of 1,06,64,717 maunds into the port of Calcutta, 78,26,550 maunds or 73 per cent. were bonded in the Sulkea *golas* during the year as against a percentage of 81 in the previous year. The percentage was smaller owing to larger clearances from board ship during the year ; this decrease in the percentage continued from the previous year.

9. **Sales of imported salt from shipboard and bond.**— * * * * * * * * * *

In Calcutta the sales direct from shipboard show an increase by 68·6 per cent. and those from bond by 7·9 per cent. In Chittagong the sales direct

from shipboard and bond decreased by 32·7 per cent. and 14·5 per cent., respectively. The decrease was due to smaller importations owing to the merchants being unable to secure freight. The requirements of certain districts hitherto supplied from Chittagong were met from Calcutta. There was an increase of 14·5 per cent. in the total sales of imported salt. All the vessels carrying salt to Calcutta were steamers.

10. **Transactions in the *golas*.**—The total transactions at the *golas* in Calcutta and Chittagong for the past five years are given below :—

Year.	Calcutta.	Chittagong.
	Mds.	Mds.
1915-16	1,55,57,771	17,35,807
1916-17	1,45,87,255	15,24,260
1917-18	1,36,05,327	13,64,536
1918-19	1,42,66,818	20,70,799
1919-20	1,52,78,108	13,10 126

* * * * * * *

12. **Inland bonded warehouses.**—There were 6 private bonded warehouses in this Presidency as compared with 8 in the previous year, viz., 2 at Naraingani (Dacca), 1 at Bhairab Bazar (Mymensingh), 1 at Madaripur (Faridpur) and 2 at Jhalakati (Bakarganj). Two *golas* at Chandpur (Tippera) remained closed during the year. The quantity of salt despatched to these 6 inland warehouses from shipboard and *golas* in the port of Calcutta was 2,96,270 maunds as compared with 3,47,073 maunds in 1918-19, showing a decrease by 14·6 per cent. There was an increase of 3,200 maunds or 16·6 per cent. in the quantity of salt despatched to the bonded warehouses in other provinces, the quantities despatched in the year being 8,000 maunds to Chandbally in Bihar and Orissa and 14,400 maunds to Ajmiriganj in Assam against *nil* and 19,200 maunds, respectively, in the previous year.

* * * * * * *

CHAPTER III.

Consumption and Prices.

15. **Consumption.**—The total quantity of salt, which passed into consumption in this Presidency during the year 1919-20, was 78,12,788[c] maunds. This is exclusive of 38,43,550[c] maunds, the net export by rail, road or river, but inclusive of 202 maunds educed from saltpetre and 7,918 maunds issued free of duty for commercial purposes.

16. **Prices of salt in Bengal generally.**— * * * * * * * * * * There was a decrease of 4 annas 8 pies in the average as compared with the previous year. It is reported that since April 1919 the prices ruling in the market were the maximum prices fixed by Government ; these were reduced from 1st January 1920 by Rs. 30 per 100 maunds. All through the year the prices of Kurkatch salt were 4 or 5 rupees below those of the crushed. The average wholesale price per 100 maunds of Liverpool salt was Rs. 172-2-5 against Rs 186-13-4 in the previous year.

[c] Exclusive of figures of import and export through the North-Western Railway for the quarter ending 31st March 1920, which the Director of Statistics has not been able to furnish on account of non-receipt of returns from that Railway owing to strike.

* * * * * * *

The maximum prices at which salt may be sold for delivery at the Sulkea and Chittagong salt *golas* are now fixed at the following rates per 100 maunds :—

	Ex-golas.	
	Sulkea.	Chittagong.
	Rs.	Rs.
Liverpool	158	168
Spanish	153	163
Port Said	150	160
Massowah ...	150	160
Aden, Fine	150	160
Indo-Aden	149	159

At the same time the maximum retail price of salt was fixed at 1 anna and 6 pies per seer in all places in the Presidency and Burdwan Divisions and 1 anna and 9 pies per seer in all places in the Dacca, Chittagong and Rajshahi Divisions except the Chittagong Hill Tracts, where the maximum retail price is fixed at 2 annas per seer, and the Sadar, Kalimpong and Kurseong subdivisions of the district of Darjeeling, where the maximum retail price is fixed at 2 annas and 3 pies per seer.

* * * * * * *

CHAPTER V.

Financial Results.

19. **Receipts and charges.**— * * * *

* * * The receipts show an increase by Rs. 26,81,919 or 24·0 per cent. and the charges by Rs. 15,269 or 4·5 per cent. The net revenue was Rs. 1,35,07,486, which was larger than that of the previous year by Rs. 26,66,650 or 24·6 per cent. The increase in the receipts occurred mainly under head "Import duty on Salt." The charges do not include any share of cost of the Customs Preventive Service, which is largely employed in safeguarding the salt revenue. * * * * *

CHAPTER VI.

Miscellaneous.

20. **Saltpetre refineries and soda factories.**—There were five licensed saltpetre refineries at Manicktola, Sulkea, Kakurgachi, Bahirsura and Baranagar, respectively, during the year against three in the previous year. Two new refineries, viz., one at Bahirsura and one at Baranagar, were opened during the latter part of the year. No license was issued in 1919-20 for the manufacture of sulphate of soda.

The quantity of refined saltpetre produced during the year was 6,984 maunds against 11,701 maunds in the previous year. An explanation of the decrease last year was given in that year's report; the Collector of Excise, Calcutta, reports that the further decrease was due to the cessation of the war and to reduced demand for saltpetre in consequence. The quantity of salt educed in the process of refinement was 275 maunds as compared with 547 maunds in 1918-19 and the quantity of *sitta* (impure salt) left in the course of refinement was 126 maunds against 78 maunds in the previous year. Two hundred and two maunds of educed salt were sold during the year as compared with 568 maunds in 1918-19, the duty realized being Rs. 252-11 as compared with Rs. 710 in the previous year. The license fees realized from the saltpetre refineries amounted to Rs. 250 against Rs. 150 in the previous year.

REVISED SCALES OF PAY OF THE PROVINCIAL JUDICIAL SERVICE.

GOVERNMENT OF BENGAL.

APPOINTMENT DEPARTMENT.

DACCA, THE 31ST JULY 1920.

RESOLUTION—No. 2191 A.D.

The recommendations of the Public Services Commission on the question of pay of the Provincial Judicial Service have been under discussion for some time with the Government of India and the Secretary of State. The Governor in Council now directs that in place of the present graded system of pay, the future emoluments of the service in Bengal shall be as follows:—

MUNSIFS.

Year of service.	Scale of pay per mensem.
	Rs.
1st year (probationers)	275
2nd year (probationers)	300
3rd year (on confirmation)	350
4th year	350
5th year	400
6th year	400
7th year	450
8th year	450
9th year	500
10th year	500
(*Efficiency bar.*)	
11th year	550
12th year	550
13th year	600
14th year	600
15th year	650
16th year	650
17th year and over	700

SUBORDINATE JUDGES.

15th year	750
16th year	750
17th year	750
18th year	750
19th year	750
20th year	750
21st year	800
22nd year	800
23rd year	850

Outside the time-scale, there will be two selection grades for Subordinate Judges containing posts equal together to three per cent. of the total cadre, viz.,—

Five posts on Rs. 1,000 and
Four posts on Rs. 1,200 per mensem.

2. Promotion to the grades on Rs. 1,000 and Rs. 1,200 will be made strictly by selection.

3. The above orders will have effect from the 1st December 1919.

4. Ordered that this Resolution be published in the *Calcutta Gazette* for general information.

By order of the Governor in Council,

H. L. STEPHENSON,

Chief Secy. to the Govt. of Bengal.

Dacca, *the 7th August 1920.*

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 5th August 1920.

Summary.—Light to moderate rain fell generally throughout the province. More rain is required, especially in the northern districts, for the transplantation of winter paddy and for the steeping of jute. Elsewhere field operations are progressing satisfactorily. Some damage to jute by insect-pests is reported from Nadia, Murshidabad, Jessore and Pabna. The prospects of autumn paddy, sugarcane and other standing crops are generally hopeful. The average price of common rice for the province has fallen by about 0·23 per cent., as compared with that of the previous week.

Serial No.	District and subdivision.	Rainfall.	Price of common rice, in seers, per rupee.		Character of the weather, condition of crops, etc.
			This week.	Previous week.	
1	2	3	4	5	6
		Inches.			
1	24-Parganas	5·48	5	4 7/8	Condition and prospects of jute are good. Effects of weather are favourable to its growth. Fodder and water are sufficient.
	Diamond Harbour.	4·52	4 3/16	(*n*)	
	Barrackpore	2·28	4 1/2	4 1/2

DEPARTMENT OF AGRICULTURE, BENGAL.

Forecast of the Summer *til* crop of Bengal, 1920-21.

(NOTE.—On an average of the five years ending 1918-19, the area under *til* in Bengal has represented some 5·0 per cent. of the total area under *til* in British India.)

Character of the season.—The rainfall in February and March was sufficient for sowings, which began at the normal time. The long spell of drought, that followed in the months of April and May, adversely affected the growth of the crop in many districts. Subsequently the rainfall was generally moderate and beneficial. Some damage by drought is reported from parts of the 24-Parganas, Murshidabad, Midnapore and Mymensingh. On the whole the season was unfavourable for the crop.

Acreage.—The total area sown this year with the crop is reported to be 155,300 acres, as against 167,300 acres last year.

Outturn.—From the estimates furnished by the District Officers, the average outturn of the crop for the province works out at 77 per cent. of the normal this year, against 76 per cent. last year. Taking the normal yield at 6⅛ maunds per acre, the gross outturn for the province is estimated at 26,900 tons this year, against 28,600 tons last year, or a decrease of about 6 per cent.

G. EVANS,
Director of Agriculture, Bengal.

DACCA,
The 27th July 1920.

APPENDIX I.

Forecast of the Summer *Til* crop of Bengal, 1920-21.

District.	Estimated normal area under summer *til*.	ESTIMATED AREA UNDER SUMMER *til*.		TAKING 100 TO REPRESENT THE NORMAL, WHAT WOULD BE THE AVERAGE OUTTURN PER ACRE CROPPED.		Date by which sowing generally began this year and whether that date was early, normal or late.	Date by which harvesting generally commenced this year and whether that date was early, normal or late	Remarks by District Officers.
		Last year.	This year.	Last year.	This year.			
1	2	3	4	5	6	7	8	9
	Acres.	Acres.	Acres.					
24-Parganas ...	100	100*	100*	100	42	Middle of April.	Not yet begun	The weather has not been favourable. Damage to the extent of 32 per cent is reported from Basirhat subdivision. The outturn has fallen considerably below the normal owing to want of rain.
Murshidabad ...	1,000	1,700	2,200	75	67	March. Normal.	June. Normal	The increase in area compared with last year was due to favourable weather at sowing time and to high price of oil which induced the cultivators to cultivate more area this year. Unfavourable weather owing to continued drought at the growing stage caused damage to the outturn by about 33 per cent.
Jessore	2,300	1,300	1,600	68	92	February and March. Normal.	Ditto ...	The increase in area was due to favourable weather at sowing time. The outturn has fallen slightly owing to want of rain in April.
Khulna	4,400	600	500	77	67	February. Normal.	Last week of June. Normal.	The decrease in area compared with last year is due to want of timely rain for which the plants could not thrive well, and the outturn has fallen much below the normal.
Burdwan	3,800	2,600	600	58	50	February ...	May to June...	The decrease in area is due to want of timely rain. The weather has been dry which has affected the growth of the crop and has reduced the outturn considerably.
Birbhum	400	400*	400*	67	58	March. Normal.	June. Normal	The weather has not been favourable owing to want of sufficient rain.
Bankura	2,700	1,500	2,000	67	100	Ditto ..	Ditto ...	The increase in area was due to timely rainfall. The weather has been favourable and a normal outturn is expected.
Midnapore	7,800†	7,000	7,300	80	75	March and April. Normal.	May and June. Normal.	The slight increase in area is due to high price of oil. The weather has been fair. Want of timely rain affected the growth. The outturn is below the normal owing to drought.
Hooghly	1,000	900*	900*	85	100	End of February. Normal.	First week of June. Normal.	The weather has been favourable and a normal outturn is expected.
Howrah	200	(3)	(3)	80	80	Beginning of January. Normal.	Beginning of May.	The weather has not been favourable. The outturn is considerably below the normal owing to want of timely rain.
Rajshahi	10,200†	8,10.	7,100	80	75	Middle of March. Normal.	Middle of June. Normal.	Unfavourable weather owing to drought has reduced the outturn this year.
Dinajpur	300	300*	300*	75	66	May. Normal	.....	The weather has not been favourable. For want of timely rain the outturn is likely to fall much below the normal.
Rangpur	200	200*	200*	85	100	March. Normal.	June. Normal	The weather has been favourable on the whole.
Bogra	3,600	1,400	1,400	80	80	Ditto ...	Ditto ...	Scarcity of rain in March and April retarded the growth of the crop and has thus reduced the outturn.
Patna	33,500	21,100	21,300	60	65	Middle of March. Normal.	Middle of June. Normal.	The weather has been a little better than last year.
Malda	400*	..	...	...	...	... ...	.....	Owing to unfavourable weather at sowing time, the crop has not been cultivated this year.
Dacca	5,900†	17,500	5,900	82	93	February and March.	June and July. Normal.	The weather has been characterised by frequent rainfall and the growth of the crop good. The decrease in area this year is due to revision of estimates on the basis of settlement records.
Mymensingh ...	112,800	76,400	76,400	76	76	Middle of March. Normal.	Middle of June. Normal.	The weather has not been favourable owing to drought which caused some damage in Tangail and Kishorganj.

* Conventional area. † Revised on the basis of settlement figures.

District.	Estimated normal area under summer till.	ESTIMATED AREA UNDER SUMMER till.		TAKING 100 TO REPRESENT THE NORMAL WHAT WOULD BE THE AVERAGE OUTTURN PER ACRE CROPPED.		Date by which sowing generally began this year, and whether that date was early, normal or late.	Date by which harvesting generally commenced this year, and whether that date was early, normal or late.	Remarks by District Officers.
		Last year.	This year.	Last year.	This year.			
1	2	3	4	5	6	7	8	9
	Acres.	Acres.	Acres.					
Faridpur	11,300	11,600	11,600	96	87	February and March. Normal	June. Normal	The weather was favourable at sowing time but was not so subsequently owing to heavy rain.
Bakarganj	7,600	5,000	5,500	128	100	January. Normal.	Middle of April. Normal.	The weather was favourable and the outturn has been normal.
Chittagong ...	300	300*	300*	100	100	March. Normal.	June. Normal	The weather has been favourable.
Tippera	11,600	9,300	9,200	70	67	Ditto ...	Ditto ...	The weather has not been favourable. Drought and untimely rain have affected the outturn both in the Sadar and Brahmanbaria subdivisions to the extent of about six annas. The increase in area is due to high prices obtained for oilseeds last year.
Noakhali	300	300	300	60	88	February. Normal.	Ditto ...	The weather has been favourable. Want of seasonable rain has caused the outturn to fall below the normal.
Total Bengal ...	221,700†	167,300	165,300	76	77

DEPARTMENT OF AGRICULTURE, BENGAL.

First Forecast of the Sugarcane crop of Bengal 1920-21.

(NOTE.—On an average of the five years ending 1918-19, the area under sugarcane in Bengal has represented some 8·7 per cent. of the total area under sugarcane in British India.)

Character of the season.—In the Eastern Bengal districts the weather at planting time was generally favourable, but subsequently during the months of April and May, scarcity of rain affected the growth of the plants to some extent In Northern and Western Bengal, the planting time in most districts was generally from March to May, but conditions were not very favourable owing to drought and consequent lack of soil-moisture. During the last two months, however, moderate rainfall has improved the prospects of the crop throughout the Presidency and the present outlook is reported to be generally satisfactory.

Area planted.—The total area planted with sugarcane for the province is reported to be 216,900 acres this year, against 221,100 acres in the corresponding forecast of last year.

G. EVANS,

Director of Agriculture, Bengal.

DACCA,

The 6th August 1920.

First forecast of the sugarcane crop of Bengal, 1920-21.

District.	Estimated normal area under sugarcane.	ESTIMATED AREA UNDER SUGARCANE.		Date by which the planting of sette generally commenced this year, and whether that date was early, normal or late.	Remarks by District Officers.
		Last year.	This year.		
1	2	3	4	5	6
	Acres.	Acres.	Acres.		
24-Parganas ...	5,000	4,840	4,700	Beginning of April. Normal.	The increase in area was due to the high price of sugar and to favourable weather condition at planting time. Subsequently the weather was unfavourable to the growth of the plants owing to drought.
Nadia	7,900	6,100	6,200	Middle of January. Normal.	The increase in area is due to high price of sugar. The weather is favourable.
Murshidabad ...	3,600	3,800	3,900	November to May ...	The increase in area is due to high price of *gur*. The weather was fair at sowing time, but subsequent drought greatly affected the growth of the crop. Recent rain has, however, improved the condition of the crop a little.
Jessore	3,900	3,100	3,900	February and March.	The decrease in area was due to want of rain at the time of planting. Subsequently the weather has been favourable and the growth of the crop has been fair.
Khulna	1,600	1,000	1,000	February. Normal ...	The weather has not been favourable. Want of rain has retarded the growth of the crop.
Burdwan	25,800	18,100	18,800	April to May. Normal	The increase in area is due to high price of *gur*. The weather has not been favourable. The crop suffered for want of moisture. The recent rainfall is improving the prospects.
Birbhum	9,000	11,000	9,000	May. Normal ...	The decrease in area was due to want of rain at planting time. Subsequently the weather has been favourable.
Bankura	15,000	10,500	11,000	End of May. Late ...	The increase in area is due to high price of *gur*. Owing to late rainfall, the planting was delayed; since then the weather has been fair. The rainfall in June was very favourable to the growth of the crop.
Midnapore	6,800	4,300	6,100	March and April. Normal.	The increase in area is due to high price of *gur*. The weather was not favourable at planting time. Subsequently it has been favourable.
Hooghly	7,300	4,900	4,900	Serampore and Arambagh Subdivision—March: normal. Sadar subdivision—Beginning of April: normal.	Owing to want of timely rain the weather has not been favourable.
Howrah	8,500	5,200	5,000	January. Normal ...	The weather was not favourable at planting time but subsequently it turned favourable and improved the condition to a great extent.
Rajshahi	7,500*	13,800	8,400	End of January. Normal.	The decrease in area as compared with that of last year is due to revision of estimates and to unfavourable weather at planting time. Present weather is fair.
Dinajpur	25,000	20,600	26,600	January to March. Normal.	The weather has been fair.

* Revised on the basis of settlement figures.

District.	Estimated normal area under sugarcane.	ESTIMATED AREA UNDER SUGARCANE.		Date by which the planting of setts generally commenced this year, and whether that date was early, normal or late.	Remarks by District Officers.

CONSTITUTION OF A BOARD TO EXAMINE ALL IMPORTANT PROJECTS WHICH ARE LIKELY TO RESTRICT THE FREE FLOW OF FLOOD WATER.

GOVERNMENT OF BENGAL.

Irrigation Department.

RESOLUTION.

No. 3210 I.,

CALCUTTA, THE 7TH AUGUST 1920.

READ—

(1) Resolution No. 373 T-I., by the Government of Bengal, Irrigation Department, dated the 9th October 1916.

(2) Press communique by the Irrigation Department, dated the 17th February 1917.

(3) Resolution No. 4133 I., by the Irrigation Department, dated the 9th September 1919.

BY Bengal Government notification No. 1360 T.-R., dated the 2nd November 1914. Major Hirst, Director of Surveys, Bengal and Assam, was placed on special duty to enquire into the condition of the Upper Hooghly and its feeders. On receipt of the report in June 1916 the Governor in Council decided to appoint a committee of practical men to advise Government upon the steps which should be taken to carry out systematic observations of the changes in these rivers and also, if possible, to improve their condition as navigable channels and as feeders for the Lower Hooghly. This committee was appointed in February 1917, and they submitted their report to Government in August 1919.

The recommendations of the committee are divided into three main heads, viz:—

(A) The preparation and co-ordination of records for the investigation of the progress of deterioration in the river Hooghly and its feeders,

(B) Practical measures for the conservation and improvement of the feeders of the river Hooghly, and

(C) Administrative control of the connected river system.

In connection with the latter the committee state that considering further the vital importance of the conservation of the deltaic rivers in the interests of drainage, irrigation, sanitation and transport, and the risk of deterioration to which they are exposed in the event of undue restriction of the spill areas of the feeder rivers of the Hooghly, they are of opinion that a Board should be constituted by the Government of Bengal to examine all important projects which are likely to restrict the free flow of flood water and report to Government before such projects are sanctioned.

The Governor in Council has been pleased to accept the recommendations of the committee and has now decided to appoint a permanent Board whose duty it will be to examine all important projects concerning either drainage, irrigation, sanitation or transport (by rail, road or waterways), which are likely to restrict the free flow of flood water, and report to Government in the department concerned before such projects are sanctioned.

The personnel of this committee will be constituted as below:—

President.

The Chief Engineer, Irrigation Department, Bengal.

Members.

A representative of the Sanitary Department.

A representative of the Agricultural Department.

A member to be nominated by the Bengal Chamber of Commerce.

A member to be nominated by the Managing Agents, India General Navigation and Railway Company, and the Agents of the Rivers Steam Navigation Company acting jointly.

The Under-Secretary to the Government of Bengal in the Irrigation Department will act as Secretary to the Board, and the records will be kept in the Bengal Secretariat. The Chief Engineer, Irrigation Department, will decide what schemes should be referred to the Board.

ORDER—Ordered that this Resolution be published in the *Calcutta Gazette* and that a copy thereof be submitted to the Government of India, Public Works Department, for information.

Ordered also that copies of the Resolution be forwarded to the Secretary, Railway Board, the Revenue, the Municipal and the Public Works (Railway) Departments of this Government, the Secretary, Bengal Chamber of Commerce, and the Managing Agents, Steamer Companies (India General Navigation and Railway Company and Rivers Steam Navigation Company), Calcutta, for information.

By order of the Governor in Council,

F. A. A. COWLEY,

Secy. to the Govt. of Bengal.

REPORT ON THE WORKING OF THE LICENSED WAREHOUSE AND FIRE BRIGADE ACT, I OF 1893.

NOTIFICATION.

No. 2302M.—The 9th August 1920.—The following is published for general information, under section 41 of the Licensed Warehouse and Fire Brigade Act, 1893 (Bengal Act I of 1893).

L. S. S. O'MALLEY,

Secretary to the Government of Bengal.

No. 1861G., dated Howrah, the 10th July 1920.

Memo. by—R. F. LODGE, ESQ., District Magistrate, Howrah.

COPY, with copies of enclosures in duplicate, forwarded to the Commissioner of the Burdwan Division with reference to his memorandum No. 760M., dated the 6th July 1920, for information.

No. 1109G., dated Howrah, the 8th July 1920.

From—BABU CHARU CHANDRA SINHA, M.A., B.L., Chairman, Howrah Municipality.

To—The Magistrate of Howrah.

As requested in your letter No. 1527G., dated the 17th June 1920, I have the honour to submit herewith the statements showing the warehouses licensed under the Fire Brigade Act I of 1893 and receipts and disbursements on account of the same for the year 1919-20. The former statement has been prepared in accordance with the instructions contained in the Government of Bengal, Municipal Department, No. 470M., dated the 14th February 1917, to the Commissioner of the Burdwan Division, a copy of which was forwarded under his memorandum No. $\frac{137\text{-M.}}{\text{XXIII-8}}$, dated the 16th February 1917.

The collection of fees works out to be 86 per cent. of the current demand and 95 per cent. of the arrear demand, as against 90 per cent. of the current demand and 55 per cent. of the arrear demand reported for the year 1918-19. The demand for the year 1919-20 amounted to Rs. 29,183 and the collection to Rs. 25,055, as against the demand of Rs. 20,739 and the collection of Rs. 18,753 for the year 1918-19.

The contribution which the Commissioners were called upon to pay for the maintenance of the Fire Brigade amounted to Rs. 57,327. The rates leviable under section 10 of the Act had to be enhanced in respect of all warehouses as defined by section 2(*8*) of the Act to the maximum prescribed under the Act.

The direction contained in the first proviso to section 10 of the Act was followed.

No. 73-M., dated Calcutta, the 1st July 1920.

From—The Hon'ble Mr. J. R. Blackwood, I.C.S., Commissioner, Presidency Division,

To—The Secretary to the Government of Bengal, Municipal Department.

I have the honour to submit herewith copies of the reports on the working of the Licensed Jute Warehouse and Fire Brigade Act, I (B.C.) of 1893, for the year ending the 31st March 1920, in Cossipore-Chitpur, Maniktola and Garden Reach Municipalities.

No. 661, dated Calcutta, the 4th June 1920.

From—Babu Hem Chandra De, M.A., Chairman Cossipore-Chitpur Municipality,

To—The Magistrate of the 24-Parganas, Alipore.

With reference to your letter No. M. 262-1-20, dated the 5th May 1920, I have the honour to submit the following report on the working of the Licensed Warehouses and Fire Brigade Act for the year 1919-20 together with the statements of receipts and disbursements and of licensed warehouses in the prescribed form.

2. The rate of the license fee levied on the warehouses in the year of report was 7½ per cent. on the annual valuations of warehouses as in the previous year.

3. The total receipts from the fees during the year amounted to Rs. 31,838-13 as shown in the Statement I. The demand of the Commissioner of Police for the year on account of contribution towards the cost of maintenance of the metropolitan fire brigade payable by this municipality was Rs. 65,517. But the municipal commissioners, being unable to provide so much as that, paid Rs. 48,690 only during the year of report and promised to pay the balance of Rs. 16,827 in the following year. As out of Rs. 48,690 a sum of Rs. 31,838-13 was raised from the jute warehouse fees as stated above, the balance of Rs. 16,851-3 was paid from the General Fund.

4. No rates were levied under section 25 (*1*) (*a*), (*b*) and (*c*) of the Act during the year of report.

5. A sum of Rs. 54 was received from the Police Magistrate, Sealdah, during the year of report as fines imposed under the Act.

6. The Statement II will show the warehouses licensed during the year of report.

STATEMENT I.

Statement of Receipts and Disbursements.

Opening Balance on 1st April 1919—Nil.

No. 856, dated Calcutta, the 1st June 1920.

From—Babu Upendra Chandra Banerjee, M.A., B.L., Chairman, Maniktala Municipality,

To—The Magistrate of the 24-Parganas, Alipore.

With reference to your letter No. M.262-1-20, dated the 5th May 1920, I have the honour to submit the Annual Report for the year 1919-20, on the working of Jute Warehouse and Fire Brigade Act during the said year.

(1) The share of expenditure allotted to this municipality by the Commissioner of Police was Rs. 8,190 which was discharged in two instalments.

(2) The revenue during the year of report amounted to Rs. 4,280-12. Besides this a sum of Rs. 6-12 was also realised as fines and penalties under the Act.

(3) License fees were levied on jute warehouses at the rate of 4 per cent. and 8 per cent. on the annual value of the holdings and at 10 per cent. on trades of other descriptions.

(4) The jute godowns and firewood, hay and straw depôts are mostly situated near the Circular canal which bound the municipality on all sides. The Surah Jute Mills and the jute pressing mill of Messrs. Landale Clarke are the two mills situated within this municipality.

(5) The following statements in the prescribed form are annexed hereto:—

(*a*) A statement showing the receipts and disbursements for the year 1919-20.

(*b*) A statement showing the number and locality of jute warehouses.

(*c*) A statement showing the number of warehouses and licenses issued during the year 1919-20 as compared with those issued during the year 1918-19.

(*d*) A statement showing the number of warehouses abolished during the year 1919-20.

(*e*) A statement showing the warehouses started during the year 1919-20.

STATEMENT I.

MANIKTALA MUNICIPALITY.

Statement showing the receipts and disbursements for the year 1919-20.

Opening debit balance on the 1st April 1919—Rs. 1,518-6.

A sum of Rs. 29-6-6 was wrongly credited by adjustment under the head. This mistake has since been detected and the correct figures have been shown in Statement I. It is requested that Form II of the annual account may be corrected by adding Rs. 29-6-6 under head "Tax on Profession and Trades" and deducting the same from the head under "Jute Warehouse fees."

Disbursements, 1919-20.

Muraripukur Road ...	38 and 38-1.

No. 116 G.M., dated Calcutta, the 4th June 1920.

From—Mr. Unsud Dowla, Vice-Chairman, Garden Reach Municipality,

To—The Magistrate of the 24-Parganas, Alipore.

With reference to your letter No. M. 262-1-20, dated the 5th ultimo, I have the honour to report as follows on the working of the Licensed Jute Warehouse and Fire Brigade Act in this municipality for the year 1919-20 and to submit Statements I and II in the prescribed form.

2. During the year under report the total income from jute warehouse fees and from rate under section 25 (*b*) of the Fire Brigade Act as shown in Statement I was Rs. 4,755-7 against Rs. 3,755-2 in the previous year. The amount of contribution paid to the Fire Brigade Fund was Rs. 12,284 against Rs. 7,622 in 1918-19.

In levying the jute warehouse fees the limitations prescribed by the provisos under section 10 of the Fire Brigade Act were strictly followed.

3. The rates at which the fees were levied were 8 per cent. on the annual value of large warehouses, 10 per cent. on the annual value of wood and straw depôts, and ½ per cent. on the annual value of all bustee lands with huts, if any, on them. A list of licensed warehouses within this municipality during the year under review is given in Statement II.

STATEMENT I.

Statements of Receipts and Disbursements.

Opening balance on 1st April 1919—Nil.

(a) The difference of Rs. 90 more is due to tollage for April 1920 being as Rs. 22,019 instead of Rs. 22,009.

CALCUTTA,
The 10th August 1920.

G. J. ST. C. SEDGLEY,
Under-Secy. to the Govt. of Bengal.

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 12th August 1920.

Summary.—During the week rainfall was heavy in most districts of West Bengal; elsewhere it was generally light. Transplanting of winter paddy seedlings and cutting and steeping of jute are proceeding, but their progress is somewhat slow in Eastern and Northern Bengal for want of adequate rainfall. Reaping of autumn paddy continues and a satisfactory outturn is anticipated. Some damage to jute by insect-pests continues to be reported from parts of Nadia, Jessore and Pabna. Winter paddy and jute have also been slightly damaged by floods in Midnapore. The prospects of jute are fair and those of sugarcane and deep-water paddy are promising. The average price of common rice for the province has fallen by about 0;19 per cent. as compared with that of the previous week.

Serial No.	District and subdivision.	Rainfall.	Price of common rice, in seers, per rupee.		Character of the weather, condition of crops, etc.
			This week.	Previous week.	
1	2	3	4	5	6
		Inches.			
1	24-Parganas	9·88	5	5	Condition and prospects of jute are good. The effects of weather on the growth of the crop are favourable. Fodder and water are sufficient. Burma rice is being sold in some places in Barasat subdivision.
	Diamond Harbour.	(*n*)	(*n*)	4 13/16	
	Barrackpore	5·06	4½	4½

	Serampore ...	3·52	4⅜	4½	
	Arambagh ...	(n)	(n)	5	
11	HOWRAH ...	11·36	5⅛	5⅛	Transplantation of paddy continues. Standing jute crops are doing well; the condition is fair. Weather is favourable to jute. No damage is reported. Harvesting of jute has just begun. Condition of sugarcane is good. Fodder is sufficient.
	Uluberia ...	16·99	4½	4½	
12	RAJSHAHI (RAMPUR-BOALIA).	0·67	5	4⅞	Prospects of jute and other standing crops are fair. Harvesting of jute and *aus* paddy continues. No damage is reported. Transplantation of winter rice is being hampered for want of more rain. Fodder is sufficient.
	Naogaon ...	0·93	4 7/16	5 1/16	
	Nator ...	0·70	4½	4½	
13	DINAJPUR ...	0·50	4½	4 13/16	Weather cloudy. More rain is badly needed for transplantation of winter paddy. Harvesting of jute and *bhadoi* paddy has commenced. Condition and prospects of jute are fair. Steeping of jute is being retarded for insufficient rain. Cattle-disease is reported from Balurghat, Gangarampur and Porsha police-stations. Fodder and water are sufficient.
	Thakurgaon	0·62	5	5	
	Balurghat ...	Nil	5⅜	5⅜	
14	JALPAIGURI	2·34	4¾	4¾	Prospects and condition of autumn paddy and jute are fair. Effects of weather are not satisfactory for want of sufficient rain. No damage has yet been done to them. Fodder is sufficient.
	Alipur ...	3·69	5	5	

* Burma rice.

(n) Not reported.

Serial No.	District and subdivision.	Rainfall.	PRICE OF COMMON RICE, IN SEERS PER RUPEE. This week.	Previous week.	Character of the weather, condition of crops, etc.
1	2	3	4	5	6
		Inches.			
15	DARJEELING	5·01	4½	4½	Condition and effects of weather on jute are good. No damage is reported. Maize and potatoes are being harvested. *Marua* is progressing well. Stocks of rice, fodder and water are sufficient. Cattle-disease is prevalent at places.
	Kurseong ...	7·48	5	4½	
	Siliguri ...	4·98	5	(*n*)	
	Kalimpong...	1·46	4½	4½	
16	RANGPUR ...	2·08	4⅞	4 1/16	Harvesting of *aus* paddy is almost finished. Harvesting of jute is retarded for want of rain. More rain is urgently needed for steeping of jute and transplantation of winter paddy. Condition and prospects of jute are fair. Fodder and water are sufficient. Cattle-disease is reported from Hatibandha police-station.
	Nilphamari	1·20	5	5	
	Kurigram ...	1·25	4¾	4¾	
	Gaibandha ...	0·33	5	5	
17	BOGRA ...	0·69	4⅝	5 1/16	Harvesting of jute continues. Transplantation of winter paddy and steeping of jute are being retarded and transplanted paddy is withering in places for want of heavy rainfall.
18	PABNA ...	2·28	4¾	4¾	Prospects of standing crop are good. Condition and prospects of jute are not good. Rainfall is not yet quite sufficient for transplantation of winter paddy. Insect-pests have greatly stunted the growth of jute plants. Harvesting of jute and *aus* paddy continues. Fodder is sufficient.
	Sirajganj ...	0·89	4¾	4¾	
19	MALDA ...	0·39	5	5	Transplantation of winter paddy is being retarded for want of sufficient rain. Harvesting of *bhadoi* paddy has commenced. Prospects and condition of jute are not favourable. Fodder is sufficient.
20	COOCH BEHAR	6·64	5⅛	5 3/16	Weather hot with occasional rain. Harvesting of *bitri* paddy and transplantation of *haimanti* paddy seedlings are in progress. Effects of weather on jute are favourable. No damage is reported. Cutting steeping and washing of jute are going on. Fodder is sufficient.
21	DACCA ...	1·12	5 5*	5 5*	Weather generally sunny with occasional showers and not very favourable to the transplantation of *aman* paddy which is going on. Harvesting of *aus* paddy and jute in high lands continues. Prospects of paddy are good, but those of jute are fair. Rice market is almost steady.
	Manikganj ...	1·34	5	5⅛	
	Narayanganj	2·22	4⅜	4⅜	
	Munshiganj (*a*).	(*n*)	5¼ 5*	5¼	
22	MYMENSINGH	0·92	4¾	4¾	Harvesting of jute and *aus* paddy is going on. Transplantation of winter paddy is not progressing for want of rain. No damage of any kind to jute is reported. More rain is badly wanted. Prospects of standing crops are fair. Water and fodder are sufficient. Cattle-disease is reported from Netrakona and Kishoreganj subdivisions.
	Jamalpur ...	0·23	4¾	4¾	
	Tangail ...	(*n*)	(*n*)	(*n*)	
	Netrakona ...	1·31	5	5	
	Kishorganj...	0·92	4¾	4⅞	

* Burma rice. (*n*) Not reported.

(*a*) Munshiganj being very near to Dacca and Narayanganj, its rainfall statistics are not quoted. To give information regarding the northern part of the district, rainfall figures for Kapasia thana are reported here.

REPORTS ON THE WORKING OF THE SHIPPING OFFICES IN BENGAL FOR THE YEAR 1919-20.

NOTIFICATION.

The 23rd July 1920.

No. 77 Marines.—The following annual reports on the working of the shipping offices in Bengal for the year 1919-20 are published for general information.

C. B. BAYLEY,
Deputy Secy. to the Govt. of Bengal.

No. S.-2396, dated Calcutta, the 6th July 1920.

From—The Shipping Master, Calcutta,
To—The Secretary to the Government of Bengal, Marine Department.

I have the honour to submit herewith for the information of Government the Annual Report of the Calcutta Shipping Office for the official year 1919-1920.

Shipment and discharge.—A comparative statement of the number of seamen shipped and discharged under European and Indian articles for the years 1918-19 and 1919-20 is given below, from which it will be seen that there is a slight decrease in the number of seamen shipped and discharged under

European articles but a considerable increase in the number of seamen shipped and discharged under Indian articles.

Shipped.

Articles.			1918-19.	1919-20.	Increase.	Decrease.
European	...	...	936	575	...	361
Indian	...	...	35,403	44,466	9,063	...
Total		...	36,339	45,041	9,063	361

Discharged.

Articles.			1918-19.	1919-20.	Increase.	Decrease.
European	...	...	1,746	1,005	...	741
Indian	...	...	25,439	34,232	8,793	...
Total		...	27,185	35,237	8,793	741

Shipment of Eurasians on European articles.—There were 89 Eurasians shipped on European articles and 322 were shipped on Indian articles, as compared with 66 and 193 of the previous year.

Shipment of Chinese on Chinese articles.—The number of Chinese seamen shipped and discharged under Chinese articles during the year under report is as follows:—

Year.			Shipped.	Discharged.
1919-20	...	...	498	331

Shipment of seamen at Consulates.—The figures below represent the number of seamen of various nationalities shipped and discharged at the Consulates, details of which are shown in Appendix II.

These figures are not included in Appendix I:—

Nationalities.		Shipped.	Discharged.	Nationalities.		Shipped.	Discharged.
Africans	...	1	...	Norwegians	...	6	4
Arabs	...	4	...	Russians	...	1	...
Frenchmen	...	2	3	Swedes	...	1	...
Italians	...	4	3	Japanese	...	191	219
Indians	...	6	...	Unknown	...	40	34
Australians	...	1	...			—	—
Chinese	...	1	1	Total	...	259	264
Dutchmen	...	1	...			—	—

Desertions and failure to join.—The number of seamen on European articles who deserted and failed to join was 24, and the number on Indian articles 408. The majority were replaced by substitutes.

Repatriation of distressed seamen.—The total number of distressed seamen repatriated during the year was 108, of whom 68 were repatriated owing to illness, 16 under mutual consent, 6 on termination of agreement, 6 on account of injury, 1 owing to having been shipwrecked, and 11 on account of venereal diseases.

Relief to seamen in Government Work House.—The Government Work House afforded relief to 7 seamen at a cost of Rs. 120-12. Of these, 2 left the home on receiving money, 1 absconded, 1 was sent away being a Malayan, 1 obtained employment, 1 was taken over by the Caledonian Society, and 1 was taken over by a missionary society.

Relief to seamen in Sailor's Home.—Twenty-seven destitute seamen were admitted into the Sailors' Home and a loss of Rs. 543 was sustained owing to the seamen being unable to pay their board.

Relief to seamen in the Alms House of the District Charitable Society.—Seventeen seamen were relieved in the Alms House of the District Charitable Society at a cost of Rs. 1,669-8.

Payments of Balance of wages to seamen ex-enemy vessels.—During the year Rs. 1,08,510 was paid to the crews of enemy vessels for balance of wages. Rupees 1,08,206 was charged against Government and Rs. 304 was debited to the Board of Trade.

Compensation to seamen of sunken vessels for loss of effects granted by Government and Imperial Indian Relief Fund.—Rupees 2,055 was paid by the Government of Bengal for the loss of effects to the surviving members of

the crews of vessels sunk by enemy action, and Rs. 3,215 was paid by the Imperial Indian Relief Fund through this office as further compensation.

Relief granted to dependants of seamen who were interned in Germany.—The amount of relief granted to the dependants of seamen interned in Germany by the Imperial Indian Relief Fund through this office amounted to Rs. 572.

Administration of trust funds.—Appendix III shows the transactions during the year of funds held in trust under different heads.

Stamped papers to the value of Rs. 120 were used on account of securities in disposing of the estates of deceased Indian seamen.

The balance of accumulated funds at the commencement of the year was Rs. 1,05,070 and the receipts during the year Rs. 1,37,769. The payment from the funds amounted to Rs. 1,34,627, and Rs. 5,199 lapsed to Government, leaving the balance of Rs. 1,03,013 in deposit at the close of the year.

Transactions with the Board of Trade.—Rupees 56,323 represents the transactions with the Board of Trade. Out of this, a sum of Rs. 304 was paid on account of balance of wages to seamen of enemy vessels and Rs. 13,837 was paid to seamen under the Board of Trade Scheme for loss of effects through enemy action.

European seamen's money orders.—The sum of £62 was remitted by seamen to their relatives in the United Kingdom, as compared with £366 of the previous year.

Financial results.—The figures below give the financial results for the last five years:—

Year.	Receipts.	Disbursements.	Savings.
	Rs.	Rs.	Rs.
1915-16 ...	94,319	57,669	36,650
1916-17 ...	94,074	69,238	24,736
1917-18 ...	76,929	58,855	18,074
1918-19 ...	86,356	60,250	26,106
1919-20 ...	1,26,938	84,438	42,500

A comparison of the savings of the present and previous year shows an increase of Rs. 16,394, due to more fees and other receipts received during the year.

Receipts and expenditure.—Appendix IV shows details of particulars of receipts and expenditure of the year.

Photographs for Continuous Discharge Certificates.—The system of having photographs affixed to Continuous Discharge Certificates has proved very helpful in identifying lascars and so preventing men from using the Continuous Discharge Certificates of others. During the official year under report 16,000 photographs were issued at a cost of Rs. 10,000.

Government pensions granted to injured seamen and to the dependants of seamen killed through hostile action.—The Shipping Office has been involved in a considerable amount of extra work in dealing with pensions to injured seamen and the dependants of seamen *ex* 96 vessels sunk through hostile action. In each case a Form A (War Risks Seamen's Compensation) has to be correctly filled in, and these have to be sometimes returned to the different enquiring officers, two or three times (District Magistrates, etc.) before the forms are complete for submission to Government. When Government sanction is obtained a provisional advance of pension is granted. In cases of residents of Calcutta, each individual has to be examined and his or her receipt obtained.

Administrative changes.—During the year under report Captain D. F. Vines. R.I.M., held the post of Shipping Master for the major portion of the time and was latterly succeeded by Captain E. Stocken, R.I.M. The post of Assistant Port Officer and Deputy Shipping Master was held by Mr. S. H. Reaks, M.B.E., and he was succeeded by Lieutenant Commander H. W. B. Livesay, O.B.E., R.I.M., in June 1919. Temporary Lieutenant Commander, E. Whayman, late R.I.M., has been appointed as Assistant Shipping Master, Kidderpore, from December 1919.

No. 29 S., dated Chittagong, the 20th May 1920.

From—The Shipping Master, Chittagong,
To—The Commissioner of the Chittagong Division.

I have the honour to submit herewith the Annual Administration Report of the Shipping Office for the financial year 1919-20, together with Appendices I to III.

2. **Financial results.**—The amount received during the year was Rs. 1,040 and that expended was Rs. 659. The accompanying statement I shows the particulars of receipts and expenditure of the past two years with explanation of the principal fluctuations.

3. **Trust funds.**—The opening balance of the year under review was Rs. 2,304 and receipts Rs. 94,231; or Rs. 29,604 less than that of the previous year; the payments were Rs. 92,520, leaving a balance of Rs. 4,015 at the close of the year as shown in statement II annexed.

4. **Seamen shipped and discharged.**—The number of seamen of all nationalities shipped and discharged during the year under report, was 148 and 755 respectively, against 174 and 693 in the previous year, as shown in the statement III annexed.

5. **Inspection of vessels.**—The ships that arrived at this port during the year 1919-20 numbered 41 (excluding regular coasting steamers), against 28 of the previous year; of these three were manned solely by Europeans, two by Japanese, six by mixed crews of Europeans, Asiatics and Indians, and the rest were manned exclusively by natives of India. All the foreign-going ships were inspected by the Port Health Officer.

6. **Condition of seamen.**—There were 30 seamen admitted into the Chittagong General Hospital, against, 16 during the preceding year. Of the total admissions, 29 were discharged as cured, 1 discharged otherwise. There were no cases of scurvy or death resulting from bad or insufficient food on board ships during the year under report.

7. **Seamen's money order.**—No remittance of wages was made to the United Kingdom by means of seamen's money order.

8. **Deserters.**—Three lascars deserted during the year, against twelve of the previous year. There were no deserters among European seamen.

9. **Deaths.**—There was no mortality among the seafaring community at this port during the year under report.

10. **Offences.**—No cases were tried by the Magistrate under the Indian Merchant Shipping Act, I of 1859, during the year ending 31st March 1920.

STATEMENT I.

Showing the financial results of the working of the Shipping Office for the year ending 31st March 1920.

Heads of receipts.	1919-20.	1918-19.	Increase.	Decrease.	Heads of expenditure.	1919-20.	1918-19.	Increase.	Decrease
	Rs.	Rs.	Rs.	Rs.		Rs.	Rs.	Rs.	Rs.
Shipping fees	132	116	16	...	Pay, acting and leave allowance of Shipping Clerk	405	383	22‡	...
Discharging fees	754	660	94*	...	Pay of a peon	94	94	...	...
Value of forms	19	11	8	...	Grain compensation allowance	9	3	6	...
Fines and forfeiture ...	119	1,154	...	1,035†	War allowance ...	45	13	32	...
Overtime fees	16	16	...	...	Contingencies	90	71	19	...
					Overtime fees	16	16	...	...
Total ...	1,040	1,957	118	1,035	Total ...	659	580	79	...

* The increase of discharging fees is due to the greater number of vessels having been paid off.
† The decrease under the head "Fines and Forfeitures" is due to the small number of crew having been fined by the Masters of vessels.
‡ The increase under this head is due to the periodical increments of Shipping Clerk's pay.

STATEMENT II.

MONTHLY WEATHER AND CROP REPORT OF BENGAL FOR JULY 1920.

1. **Character of the season.**—During the month the rainfall was above the average in eleven districts and elsewhere below normal. The fall was in marked defect in Mymensingh, Chittagong Hill Tracts, Cooch Behar and in the North Bengal districts. The usual rainfall statement is appended.

2. **Progress of agricultural operations.**—Harvesting of jute and autumn paddy was in progress in the northern and eastern districts, but some difficulty was felt in parts of North Bengal in the steeping of jute, due to lowness of river floods. Transplantation of winter paddy seedlings continued; but the progress was retarded in the early part of the month owing to want of adequate rainfall. Towards the end good rain facilitated operations. Transplanting, so far, is somewhat behind hand.

3. **State of standing crops.**—The condition of jute was fair and that of autumn paddy, sugarcane and other standing crops was generally satisfactory.

4. **Prospects and probable outturn.**—A satisfactory outturn of autumn paddy is anticipated. The present outlook of deep-water paddy in Eastern Bengal is generally reported hopeful. More rain is needed for improving the prospects of transplanted paddy.

5. **Damage to standing crops.**—Slight damage by disease and pests was reported to have been caused to the jute crop in parts of Nadia, Murshidabad, Jessore, Pabna, Faridpur and Bakarganj. The standing crops in the Tamluk subdivision of the Midnapore district have also been damaged by floods. Extent of damage has not yet been reported.

6. **Condition of agricultural stock.**—Stray cases of cattle-disease were reported from fifteen districts of the province.

7. **Failure of pasturage and fodder.**—The supply of fodder was reported to be generally sufficient throughout the province.

8. **Prices of food-grains.**—During the second fortnight of the month under review, the price of common rice of the cheapest quality rose in eleven districts, fell in seven and remained stationary in the rest of the province. It ranged from 3 seers 12 chittacks per rupee at the Chittagong Hill Tracts to 5 seers 11 chittacks a rupee at Tippera.

9. **Condition of agricultural people.**—The condition of the agricultural population was satisfactory.

G. EVANS,
Director of Agriculture, Bengal.

DACCA,
The 15th August 1920.

Statement showing the normal and actual rainfall in each district during July 1920.

CALCUTTA, *the 14th August 1920.*

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 19th August 1920.

Summary.—During the week rainfall was unevenly distributed, the fall being heavy over the greater part of Northern Bengal and in Mymensingh district and generally light to moderate elsewhere. The recent rainfall has facilitated field operations, especially in North Bengal, and has improved the prospects of standing crops generally. Harvesting of autumn paddy and jute is well advanced in Eastern Bengal. Damage to jute and paddy by floods continues to be reported from Midnapore and to jute by insects from Nadia, Murshidabad, Jessore and Pabna. The average price of common rice for the Province has fallen by about 0·26 per cent. as compared with that of the previous week.

Serial No.	District and subdivision.	Rainfall.	Price of common rice, in seers, per rupee.		Character of the weather, condition of crops, etc.
			This week.	Previous week.	
1	2	3	4	5	6
		Inches.			
1	24-Parganas	1·62	5	5	Condition and prospects of jute are good. Effects of weather are favourable to its growth. Fodder and water are sufficient. Harvesting of jute has commenced. Burma rice is being sold in some places in Barasat subdivision. Transplantation of *aman* paddy is going on.
	Diamond Harbour.	1·15	4¾	(*n*)

Condition and prospects of jute are fair, there has been no damage to the crop and harvesting has commenced in the Serampore subdivision. Fodder is sufficient. Price of rice is steady.
	Serampore ...	0·44	4⅞	4⅞	
	Arambagh ...	2·14	5	(*x*)	
11	HOWRAH ...	1·41	5¼	5⅛	Weather hot and favourable to jute. Transplantation of paddy and harvesting of jute continues. Sugarcane is doing well. Condition of standing jute crop is fair. No damage is reported. Fodder is sufficient.
	Ulularia ...	0·70	4¼	4¼	
12	RAJSHAHI (RAMPUR-BOALIA).	3·25	5	5	Prospects of jute and other standing crops are fair. Harvesting of jute and *aus* paddy continues. No damage to jute is reported. More rain is wanted. Transplantation of winter rice continues Fodder is sufficient.
	Naogaon ...	3·85	4 7/16	4 7/16	
	Nator ...	3·82	4⅞	4½	
13	DINAJPUR ...	6·25	4⅞	4½	More rain is needed. Harvesting of jute and *bhadoi* paddy continues. Prospects of standing crops are fair. Fodder is sufficient. Cattle-disease is reported from Porsha, Gangarampur, Biral and Balurghat thanas.
	Thakurgaon	6·80	4	5	
	Balurghat ...	5·22	5½	5⅝	
14	JALPAIGURI	17·38	4½	4⅜	Prospects and condition of *bhadoi* paddy and jute are fair. Effects of weather on the growth of crops are favourable. The recent rain has been favourable for winter paddy. Fodder is sufficient.
	Alipur ...	21·74	5	5	

* Burma rice.

(*x*) Not reported.

Serial No.	District and subdivision.	Rainfall.	Price of common rice, in seers, per rupee.		Character of the weather, condition of crops, etc.
			This week.	Previous week.	
1	2	3	4	5	6
		Inches.			
15	DARJEELING	3·05	5½	4½	Condition and effects of weather on jute are good. No damage. Harvesting has commenced. Transplanting of *aman* paddy is in progress. Harvesting of maize and potatoes is going on. *Marua* and hill paddy are progressing well. Cattle-disease is prevalent at places. Stocks of rice, fodder and water are sufficient.
	Kurseong ...	9·28	4¾	5	
	Siliguri ...	12·83	5	5	
	Kalimpong...	2·07	4½	4½	
16	RANGPUR ...	11·18	5	4¾	Weather cloudy. The recent rain has facilitated agricultural operations. Harvesting of *aus* paddy is finished. Transplantation of winter paddy and steeping of jute are going on. Condition and prospects of jute are fair. Price of rice is stationary. Fodder and water are sufficient. Cattle-disease is reported from Nilphamari subdivision.
	Nilphamari	10·88	5	5	
	Kurigram ...	8·13	4¾	4¾	
	Gaibandha ...	7·90	5	5	
17	BOGRA ...	6·24	4½	4½	Harvesting of jute and *aus* paddy and transplantation of winter paddy seedlings continue. The recent rain has helped the transplantation operation of paddy but more rain is wanted for steeping of jute.
18	PABNA ...	3·34	4¾	4¾	Harvesting of *aus* paddy and steeping of jute continue. Rainfall is not yet quite sufficient for transplantation of winter paddy. Condition and prospects of jute are not good. The growth of the standing jute plants was retarded by insect-pests due merely to drought at the beginning of the season. Fodder is sufficient.
	Sirajganj ...	4·00	4½	4½	
19	MALDA ...	2·74	5	5	Transplantation of winter paddy continues Harvesting of *bhadoi* paddy and jute have commenced. Prospects of jute are not favourable. Fodder is sufficient.
20	COOCH BEHAR	31·43	5 1/16	5½	Weather cloudy and rainy. Transplantation of *haimantie* paddy seedlings and cutting, steeping and washing of jute are being retarded to some extent in places by heavy rains. No damage to jute is reported except in low-lying tracts in Dinhata subdivision. Fodder is sufficient.
21	DACCA ...	3·14	5 / 5*	5 / 5*	Weather seasonable and favourable to the transplantation of *aman* paddy, which is going on. Harvesting of jute continues. Prospects of paddy are good. but those of jute are fair. Rice market is stationary.
	Manikganj ...	2·84	5½	5	
	Narayanganj	2·35	4¾	4¾	
	Munshiganj (a).	(n)	4¾ / 5*	5½ / 5*	
22	MYMENSINGH	4·87	4¾	4¾	Weather cloudy with occasional showers. Harvesting of jute and *aus* paddy and transplantation of winter paddy are still going on. The recent rain is beneficial to the growth of paddy and has facilitated the steeping of jute. No damage of any kind to jute is reported. Prospects of standing crop are fair. Fodder and water are sufficient
	Jamalpur ...	9·38	4¾	4¾	
	Tangail ...	(n)	(n)	(n)	
	Netrakona ...	10·42	4½	5	
	Kishorganj...	10·66	4¾	4¾	

* Burma rice. (n) Not reported.

(a) Munshiganj being very near to Dacca and Narayanganj, its rainfall statistics are not quoted. To give information regarding the northern part of the district, rainfall figures for Kaparia thana are reported here.

REVISED SCALES OF PAY OF THE PROVINCIAL EDUCATIONAL SERVICE.

GOVERNMENT OF BENGAL.

GENERAL DEPARTMENT.

Education.

DACCA, THE 20TH AUGUST 1920.

RESOLUTION—No. 588 T.-Edn.

The Government of Bengal have been authorised by the Government of India to settle the grading of the Provincial Educational Service within the limits of pay fixed by the Secretary of State, viz., a maximum of Rs. 800 a month and a minimum of Rs. 250 a month. After careful consideration the Governor in Council has sanctioned the following scale of pay which will have retrospective effect from 1st December 1919:—

Year of service.	Scale of pay per mensem.
	Rs.
1st year (on probation)	250
2nd year (on probation)	250
3rd year (on confirmation)	300
4th year	300
5th year	340
6th year	340
7th year	380
8th year	380
9th year	420
10th year	420
11th year	460
12th year	460
(*Efficiency bar.*)	
13th year	500
14th year	500
15th year	550
16th year	550
17th year	600
18th year	600
19th year	650
20th year	650
(*Efficiency bar.*)	
21st year	700
22nd year	700
23rd year	750
24th year	750
25th year and over	800

The above orders apply to men's appointments only, and orders will issue separately regarding the revision of the scale of pay for ladies' appointments in the Provincial Educational Service.

ORDER.—Ordered that this Resolution be published in the *Calcutta Gazette* for general information.

By order of the Governor in Council,

L. S. S. O'MALLEY,

Secy. to the Govt. of Bengal.

LIBERALITY OF BABU HARENDRA KUMAR RAY CHAUDHURI.

No. 1528 Edn., dated Calcutta, the 19th August 1920.

From—The Hon'ble MR. L. S. S. O'MALLEY, I.C.S., Secy. to the Govt. of Bengal, General (Education) Dept.,

To—The Commissioner of the Dacca Division.

With reference to your letter No. 3494 J., of the 30th June 1920, I am directed to request that you will be so good as to convey the thanks of Government to Babu Harendra Kumar Ray Chaudhuri of Baliati in the district of Dacca for his liberality and public spirit in making a donation of Rs. 40,000 to the Baliati Iswar Chandra High English School.

Printed at the Printing Office, and published by the Book Depôt of the Bengal Secretariat, Writers' Buildings, in the City of Calcutta, on the 25th August 1920.

DEPARTMENT OF STATISTICS, INDIA.

CALCUTTA TRADE FLUCTUATIONS.

THE following tables are intended to show the trade by all routes, *i.e.*, by rail, river, canal, road, and sea, of the Calcutta block* in certain selected articles during the three months, April to June, 1920, as compared with the corresponding period of 1919 and 1918. The statistics have been compiled from returns furnished by the Collector of Customs, Calcutta, Railway Audit Offices, Steamer Companies, the Commissioners for the Port of Calcutta, the Collectors of the 24-Parganas and Howrah, and the Assistant Engineer, Calcutta Canals.

General Summary.

Imports.—The imports of rice, including paddy†, into Calcutta* by rail, river, canal, road, and sea (coastwise) during the three months, April to June, 1920, amounted to 2,713,000 maunds, as against 6,212,000 maunds in the corresponding period of the preceding year,—a decrease of 56 per cent. There was an increase of 19 per cent in the imports of coal and coke (30,814,000

* The Calcutta block consists of the town of Calcutta with Howrah and Kidderpore Docks.
† One maund of paddy is equivalent to 25 seers of rice.

maunds as against 26,002,000 maunds last year). The value of the imports by rail, river, road, and sea (coastwise) of Indian cotton piecegoods showed an increase of 15 per cent, the total value amounting to Rs. 2,42 lakhs as against Rs. 2,10 lakhs in 1919. The quantity of indigo imported during the three months, April to June, 1920, increased from 398 maunds to 3,007 maunds. The imports of raw jute amounted to 1,044,000 bales as against 651,000 bales,—an increase of 60 per cent. The importations of gunny bags also increased from 85 million bags to 133 millions. The total imports of oilseeds (linseed and rape and mustard seed) decreased by 2 per cent from 2,615,000 maunds to 2,566,000 maunds and those of sugar increased by 51 per cent from 168,000 maunds to 254,000 maunds. The imports of tea decreased by 45 per cent from 456,000 maunds to 251,000 maunds.

Exports.—The exports of cotton piecegoods, foreign, from Calcutta* by all routes during the three months, April to June, 1920, decreased by 11 per cent (Rs. 6,56 lakhs as against Rs. 7,33 lakhs last year). The exports of gunny bags (including the exports by sea to foreign countries) increased from 267 million bags to 343 millions; and the shipments of gunny bags to other Indian ports also showed an increase from 11 to 13 millions in number in the period under review. The quantity of kerosene oil despatched from Calcutta and Budge-Budge by internal routes and by sea (coastwise) increased from 1,277,000 maunds to 1,367,000 maunds, or by 7 per cent.

* The Calcutta block consists of the town of Calcutta with Howrah and Kidderpore Docks.

TABLE I

Trade of Calcutta in certain selected articles in the three months, April to June, 1920, compared with the corresponding months of 1919.

CALCUTTA,
The 24th August 1920.

CHAS. A. BENTLEY,
Sanitary Commissioner for Bengal.

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 26th August 1920.

Summary.—During the week seasonable rain fell generally throughout the Province. More rain is wanted for transplantation of winter paddy seedlings and for steeping and washing of jute. Harvesting of jute, though late, is proceeding normally everywhere and that of *aus* paddy is nearing completion. The condition and prospects of standing crops, so far, are reported to be satisfactory. The average price of common rice for the Province has risen by about 0·27 per cent. as compared with that of the previous week.

Serial No.	District and subdivision.	Rainfall.	Price of common rice, in seers, per rupee.		Character of the weather, condition of crops, etc.
			This week.	Previous week.	
1	2	3	4	5	6
		Inches.			
1	24-Parganas	1·90	5	5	Condition and prospects of jute are good. The effects of weather on the growth of the crop are favourable. Transplantation of *aman* paddy and harvesting of jute continue. Fodder and water are sufficient. Burma rice is being sold in some places in Barasat subdivision.
	Diamond Harbour.	1·30	4⅞	4⅞	
	Barrackpore	3·92	4½	4½

	Contai ...	3·69	4¾	4¾	
10	HOOGHLY ...	7·27	4½ / 4⅞ to $5\frac{5}{16}$*	$4\frac{15}{16}$ / $4\frac{7}{8}$ to $5\frac{5}{16}$*	Effects of weather on the growth of standing crops are favourable. Condition and prospects of jute are fair; there has been no damage to the crop. Harvesting has commenced at places. Fodder is sufficient.
	Serampore ...	2·58	4¾	4¾	
	Arambagh ...	4·48	4½	5	
11	HOWRAH ...	2·66	5¼	5¼	Transplantation of paddy continues. Standing jute crops are doing well. Weather is favourable to jute. No damage is reported. Harvesting of jute continues. Condition of sugarcane is good. Fodder is sufficient.
	Uluberia ...	2·82	4½	4½	
12	RAJSHAHI (RAMPUR-BOALIA).	0·59	5	5	Prospects of jute and other standing crops are not satisfactory. Harvesting of jute and *aus* paddy continues. Transplantation of winter rice has commenced, but is being hampered for want of more rain. Fodder is sufficient.
	Naogaon ...	2·13	$4\frac{7}{16}$	$4\frac{7}{16}$	
	Nator ...	0·39	5	4¾	
13	DINAJPUR ...	1·29	4¾	4¾	More rain is wanted. Harvesting of jute and *bhadoi* paddy is in progress. Prospects of standing crops are fair. Steeping of jute is being retarded for insufficient rain. Cattle-disease is reported from Balurghat, Gangarampur, Hemtabad and Porsha police-stations. Fodder is sufficient.
	Thakurgaon	5·04	4½	4	
	Balurghat ...	1·61	5½	5½	
14	JALPAIGURI	1·83	4½	4½	Prospects and condition of autumn paddy and jute are fair. Effects of weather on the growth of crops are favourable. No damage has been done to them. Fodder is sufficient.
	Alipur ...	(n)	(n)	5	

* Burma rice. | (n) Not reported.

Serial No.	District and subdivision.	Rainfall.	PRICE OF COMMON RICE, IN SEERS, PER RUPEE.		Character of the weather, condition of crops, etc.
			This week.	Previous week.	
1	2	3	4	5	6
		Inches.			
15	DARJEELING	0·83	4½	5½	Maize and potatoes are being harvested. *Marua* and paddy are progressing well. Stocks of rice, fodder and water are sufficient. Cattle-disease is prevalent at places.
	Kurseong ...	2·89	4¾	4¾	
	Siliguri ...	(*n*)	(*n*)	5	
	Kalimpong...	0·79	4½	4½	
16	RANGPUR ...	2·19	4¾	5	Transplantation of winter paddy and cutting, steeping and washing of jute are in progress. Condition and prospects of jute are fair. Fodder and water are sufficient. Cattle-disease is reported from Nilphamari thana.
	Nilphamari	1·34	5	5	
	Kurigram ...	5·95	4¾	4¾	
	Gaibandha ...	4·10	5	5	
17	BOGRA ...	2·92	4¼	4⅞	Harvesting of jute and transplantation of winter paddy continue. More rain is wanted. Prospects of jute are fair except where damage has already been caused.
18	PABNA ...	2·64	4¾	4¾	Harvesting of *aus* paddy and steeping of jute continue. More rain is wanted for transplanting of winter paddy. Condition and prospects of jute are not good. The growth of standing jute plants was retarded by insect-pests due chiefly to drought in the beginning. Fodder is sufficient.
	Sirajganj ...	1·62	4¼	4¼	
19	MALDA ...	1·44	5	5	Transplantation of winter paddy continues. Harvesting of *bhadoi* paddy and jute has commenced. Prospects of jute are not favourable. Fodder is sufficient. Cattle-disease is reported from Gomestapur thana.
20	COOCH BEHAR	12·00	5	5 1/16	Effects of weather on jute are favourable. No damage is reported. Cutting, steeping and washing of jute are going on. Fodder is sufficient.
21	DACCA ...	7·79	4¾ / 5*	5 / 5*	Weather seasonable and favourable to the standing crops. Transplantation of winter rice is going on. The river level is rising. Prospects of paddy are good, but those of jute are fair.
	Manikganj ...	2·65	4¾	5¼	
	Narayanganj	4·83	4⅜	4⅜	
	Munshiganj (*a*).	(*n*)	4¾ / 5*	4¾ / 5*	
22	MYMENSINGH	0·70	4⅝	4⅝	Harvesting of jute and transplantation of winter paddy continue. The recent rain is beneficial to the growth of winter paddy. The recent rise of river water is damaging the paddy plants on *char* lands in the Jamalpur subdivision. Prospects of standing crops are fair. Outturn of *aus* paddy is below normal in Netrakona subdivision. Water and fodder are sufficient.
	Jamalpur ...	2·20	4¾	4¾	
	Tangail ...	3·10	4 1/16	(*n*)	
	Netrakona ...	3·09	4⅜	4¼	
	Kishorganj...	2·01	4¼	4¾	

* Burma rice. | (*n*) Not reported.

(*a*) Munshiganj being very near to Dacca and Narayanganj, its rainfall statistics are not quoted. To give information regarding the northern part of the district, rainfall figures for Kapasia thana are reported here.

Serial No.	District and subdivision.	Rainfall.	Price of common rice, in seers, per rupee.		Character of the weather, condition of crops, etc.
			This week.	Previous week.	
1	2	3	4	5	6
		Inches.			
23	Faridpur ...	2·77	4⅝ / 5*	4⅝ / 5*	*Aus* paddy and jute are still being harvested. Prospects of jute are fair and those for paddy are good. Fodder is sufficient.
	Goalundo ...	0·94	4 1/16 / 5⅓*	4⅜	
	Madaripur ...	3·32	4½ / 5*	5 / 5*	
	Gopalganj (*a*)	0·41	4½ / 5*	4½ / 5*	
24	Bakarganj (Barisal).	3·43	4½ / 5½*	4 15/16 / 5¼*	Condition and prospects of standing crops are good and those of jute are fair. No damage to jute crop is reported from flood or insect-pests. About fourteen annas jute crop has been harvested. Fodder and water are sufficient.
	Pirojpur ...	2·80	4½	4 11/32	
	Patuakhali	4·93	4½	4½	
	Dakshin Shabazpur (Bhola).	4·50	5	4 5/16	
25	Chittagong	3·41	4½ / 5½*	4½ / 5½*	Harvesting of *aus* paddy is almost completed and transplantation of winter paddy is in progress. Prospects of standing crops are fair. Fodder is sufficient. *Panga* salt is selling at 11 and 8 seers per rupee at Sadar and Cox's Bazar respectively.
	Cox's Bazar	7·39	5	5	
26	Tippera ... (Comilla).	1·95	4½	4½	Weather hot and cloudy. Harvesting of *aus* paddy and jute and transplantation of winter paddy are going on. Condition of jute is not good. Difficulty is felt for steeping of jute for want of sufficient rain. Price of rice is rising. Cattle-disease is reported from Brahmanbaria subdivision.
	Brahmanbaria.	2·12	4 7/16	4 7/16	
	Chandpur ...	3·13	4 / 4 28/33*	4 13/37 / 5 35/249*	
27	Noakhali ...	2·14	5	5	Harvesting of autumn paddy and jute is nearly completed, and transplantation of winter paddy continues. Cattle-disease is reported in Feni, Chhagalnaya, Pasuram, Sudharam, Companiganj, Senbag and Begamganj.
	Feni ...	8·52	4¾	4¾	
28	Chittagong Hill Tracts.	2·95	5	5	Prospects of standing crops are fair. Harvesting of *aus* paddy continues; outturn is fair. Transplantation of winter paddy is in progress. Sufficient quantity of Burma rice has been imported. Fodder is sufficient.

(*a*) The rainfall at Haridaspur, which is very near to Gopalganj, is shown here.
* Burma rice.

LIBERALITY OF RAJA MANMATHA NATH RAY CHAUDHURI.

No. 381 T.-Medl., dated Dacca, the 19th August 1920.

From—The Hon'ble Mr. A. MARR, I.C.S., Secretary to the Government of Bengal, Financial (Medical) Department,

To—The Commissioner of the Dacca Division.

As Raja Manmatha Nath Ray Chaudhuri of Santosh, in the district of Mymensingh, has paid in full his donation of Rs. 25,000 towards the improvement of the Mitford Hospital, Dacca, I am to request that you will be so good as to convey to him the thanks of Government for his liberality and public spirit.

RESOLUTION ON THE REPORT OF THE DEPARTMENT OF FISHERIES, BENGAL AND BIHAR AND ORISSA, FOR THE YEAR ENDING THE 31ST MARCH 1920.

GOVERNMENT OF BENGAL.

REVENUE DEPARTMENT.

Fishery Branch.

CALCUTTA, THE 3RD SEPTEMBER 1920.

RESOLUTION NO. 7519 Fis.

READ—

The Report of the Department of Fisheries, Bengal and Bihar and Orissa, for the year ending the 31st March 1920.

DR. BAINI PRASHAD, Superintendent of Fisheries, officiated for Mr. Southwell as Director of Fisheries during the year under review, when he left the department to take up an appointment in the Zoological Survey of India. Mr. Southwell whilst on leave resigned his appointment at the close of the year. Mr. B. Das, Superintendent of Fisheries, unfortunately died at Cuttack on the 24th September 1919. The department thus lost the whole of its permanent superior staff during the year. Steps have been taken to recruit a qualified Director of Fisheries, and one Superintendent of Fisheries has already been appointed.

2. This state of affairs proved a severe handicap to the department. Scientific research work suffered owing to the time taken up in ordinary administrative work; and all projects for the development of the department were kept in abeyance pending the then expected return of Mr. Southwell. The year however saw the introduction of the experiment of District Fishery Officers, which was tried in the three districts of Dacca, Khulna and Puri. These officers were mainly employed in making a complete survey of fisheries and in the initiation of co-operative societies amongst fishermen. They have made a satisfactory start. Two more such officers have now been appointed.

3. *Hilsa* investigations during the year were brought to an abrupt close by the cyclone of the 24th September 1919. But it is satisfactory to note that the problem of the breeding of carp in confined waters is reported to be in process of being solved. The scheme for the establishment of a centre for investigations in the culture of carp, which was referred to in the resolution on the working of the department for 1918-19, is under the consideration of Government. During the carp season of the year under report the total number of selected fry supplied to the public by the department amounted to 880,500 against 524,000 supplied during the year 1918-19. This includes 100,000 supplied free of cost to fishermen in the district of Bankura during the famine. The fry supplied by the Department appears to be gaining in popularity, but much depends upon the treatment afterwards. Purchasers would therefore be well advised to follow the advice of the department contained in a brochure issued by it regarding such treatment (Bulletin No. 13—"Notes on Carp Culture in Bengal, Bihar and Orissa."). These and other bulletins are issued gratis by the Fishery Department. The principal bulletin issued in the year under report is entitled "Notes on Estuarine Fisheries in the Sundarbans" by Mr. Southwell, also issued gratis.

4. Seven new co-operative societies of fishermen were established during the year, four in Bengal and three in Bihar and Orissa. Six of these societies were organised by the District Fishery Officers. The total number of societies in existence at the end of the year was 32 in Bengal and 7 in Bihar and Orissa.

5. The statistics of fish traffic into Calcutta during the year under report (312,975 maunds) show an increase of imports over the past five years except the year 1917 when 317,149 maunds were imported. A bulletin on the subject has been issued by the Department.

6. The Governor in Council has pleasure in acknowledging the services of Dr. Baini Prashad and his assistants in the difficult conditions of the year. He regrets the loss to the department of the scientific attainments of Dr. Baini Prashad. His Excellency in Council also takes this opportunity of expressing his gratitude to Mr. Southwell for the good work he has done for the department and regret at his resignation.

By order of the Governor in Council,

M. C. McALPIN,

Secy. to the Govt. of Bengal.

TEMPORARY ALLOWANCES TO MINISTERIAL OFFICERS IN BENGAL.

GOVERNMENT OF BENGAL.

FINANCIAL DEPARTMENT.

Financial Branch.

CALCUTTA, THE 1ST SEPTEMBER 1920.

RESOLUTION.—No. 13631 F.

ON the recommendation of this Government the Government of India have sanctioned temporary allowances on the following scale to all ministerial officers in the Presidency of Bengal on account of the high cost of living with effect from the 1st April 1920.—

(1) For officers on salary not exceeding Rs. 50 per mensem—30 per cent. of salary.

(2) For officers on salary exceeding Rs. 50, but not exceeding Rs. 100 per mensem—20 per cent. of salary with a minimum of Rs. 15 a month.

(3) For officers on salary exceeding Rs. 100 per mensem—15 per cent. of salary subject to a minimum of Rs. 20 and a maximum of Rs. 50 a month.

For the purpose of calculating the allowances salary should be as defined in article 38 (*c*) of the Civil Service Regulations and personal allowances should be held to be included in it, but duty allowances should be excluded.

2. The above scheme will not apply automatically to establishments which have been reorganised since the 1st April 1915 and in which the pay was fixed with modern economic conditions in view. Such cases will be separately reviewed, and it will be decided whether in view of the present orders, any allowance is admissible.

3. The scheme will apply to the ministerial establishments of the High Court of Bengal, the Customs and other Imperial Departments under the direct control of the Government of Bengal

4. Ordered that this resolution be published in the *Calcutta Gazette* for general information.

By order of the Governor in Council,

A. MARR,

Secy. to the Govt. of Bengal.

REPORT ON THE STATE OF THE SALT MARKET FOR THE FIRST QUARTER OF THE YEAR 1920-21.

GOVERNMENT OF BENGAL.

FINANCIAL DEPARTMENT.

Separate Revenue Branch (Salt).

No. 2686S.R.

Dated Calcutta, the 26th August 1920.

THE following report on the state of the salt market for the first quarter of the year 1920-21, comprising the months of April, May and June 1920, in the Presidency of Bengal, is published for general information.

2. The quantity of salt of every description cleared during the quarter amounted to 3,186,199 maunds (including 2,497,061 maunds issued under the credit system), as compared with 2,983,385 maunds (including 2,006,703 maunds issued under the credit system) in the previous quarter and 2,071,412 maunds (including 1,506,424 maunds issued under the credit system) in the corresponding quarter of the previous year. The net amount of duty levied was Rs. 38,78,916 (including Rs. 31,65,311 adjusted under the credit system), as against Rs. 34,20,812 (including Rs. 26,02,253 adjusted under the credit system) in the previous quarter, and Rs. 24,72,946 (including Rs. 17,71,330 adjusted under the credit system) in the corresponding quarter of the previous year.

3. The subjoined Table I shows in detail the importations into the Port of Calcutta and the total clearances of sea-imported salt during the quarter, compared with the figures of the corresponding quarters of the two previous years:—

Table I.

Whence imported.	1918-19.		1919-20		1920-21.

Total	2,061,966	2,050,609	1,456,025	1,701,891	2,411,016	2,844,823*

* Inclusive of 2,497,061 maunds of salt issued under the credit system.

Compared with the corresponding quarter of the previous year and the same quarter of 1918-19, importations were more by 65·6 and 16·9 per cent., and clearances by 67·16 and 38·7 per cent., respectively. As compared with the corresponding period of the previous year, the increased imports from from the United Kingdom, Port Said, Aden and Massowah and decreased import from Spain are noticeable.

4. Table II shows the quantity of sea-imported salt remaining in the warehouses at the close of the quarter as compared with the preceding four quarters :—

Table II.

Where stored.	First quarter of 1919-20.	Second quarter of 1919-20.	Third quarter of 1919-20.	Fourth quarter of 1919-20.	First quarter of 1920-21.

5. The figures showing the despatches of salt from Calcutta by different routes during the quarter under report will be published as usual in the *Calcutta Gazette* by the Director of Statistics with the Government of India when they are available.

6. The quantity of salt despatched during the quarter by the East Indian Railway to stations beyond Buxar was *nil*, as in the previous quarter and in the corresponding quarter of the previous year.

7. The quantity of saltpetre salt excised in the refineries of Bengal during the quarter was *nil*, as in the previous quarter and in the first quarter of the previous year.

8. No information was available concerning the shipments of Liverpool salt during the quarter for the Port of Calcutta.

9. Table III shows the average wholesale prices* per 100 maunds of Liverpool and other descriptions of salt at the Port of Calcutta during each fortnight of the quarter :—

As compared with the corresponding quarter of the previous year, the quantities admitted into bond and cleared from bond and shipboard were more by 411·8 and less by 7·6 per cent., respectively.

By order of the Governor in Council,

A. MARR,

Secretary to the Govt. of Bengal.

RESOLUTION REGARDING PAY AND PROMOTION OF UPPER SUBORDINATES SELECTED FOR THE BENGAL ENGINEERING SERVICE.

GOVERNMENT OF BENGAL.

PUBLIC WORKS DEPARTMENT.

Establishment.

CALCUTTA, THE 30TH AUGUST 1920.

RESOLUTION—No. 2546 E.

READ—

The Government of India, Public Works Department resolution No. 192 E.A., dated the 1st April 1920.

In paragraph I of the Government of India resolution it is laid down that the Public Works Department will in future be organized in the following three services:—

(*i*) The Indian Service of Engineers.
(*ii*) The "Provincial" Engineering Service.
(*iii*) The "Subordinate" Engineering Service.

In paragraph III of the same resolution the maximum pay of the Provincial Service has been fixed at Rs. 750, with an efficiency bar at Rs. 550. It is left to the Government of Bengal to prescribe the initial and intermediate rates of pay.

In paragraph IV it is laid down that the Provincial Service in Bengal will be designated the "Bengal Engineering Service."

In paragraph VI the local Government is authorised to make appointments from the permanent Upper Subordinate Establishment to the new service on certain conditions.

The Governor in Council is pleased therefore to fix the scale of pay of the Bengal Engineering Service, in accordance with these orders on the following continuous time-scale of Rs. 250—20—550—25—750, with an efficiency bar at Rs. 550.

Further, in accordance with the authorisation given in paragraph VI of the Government of India resolution, the Governor in Council is pleased to appoint the following officers of the Upper Subordinate Establishment to the new Bengal Engineering Service as Assistant Engineers on the pay stated against the name of each officer:—

		Rs.
1.	Mr. W. J. Traise	750
2.	Rai Sahib Krishnadhan Banerji	675
3.	Babu Ananga Mohan Pal	675
4.	Rai Sahib Ashutosh Guha	600
5.	Babu Nanda Lal Dey	600
6.	Babu Jatindra Nath Roy	600
7.	Babu Prithwiraj Mukherji	575
8.	Lieutenant T. Cuerden	530
9.	Babu Phanindra Nath Mukherji	530
10.	Mr. A. L. P. White	410
11.	Babu Probodh Chandra Basu	410
12.	Babu Bhupati Banerji	410
13.	Babu Mon Mohan Sen Gupta	410
14.	Babu Manindra Nath Sadhu	410
15.	Babu Ramani Mohan Singh	330
16.	Babu Angsujit Mukherji	290

These appointments will have effect from the 1st February 1920, but are subject to revision and reconsideration, should this prove necessary, when all conditions governing the new service can be brought fully into operation.

ORDERED that this resolution be forwarded to all Superintending Engineers; the Director of Public Instruction, Bengal; the Principal, Bengal Engineering College; the Principal, Dacca School of Engineering, and the Accountant-General, Bengal, for information, and also that it be published in the *Calcutta Gazette*.

F. A. A. COWLEY,
Secy. to the Govt. of Bengal.

RESOLUTION ON THE REPORT ON POLICE ADMINISTRATION IN THE BENGAL PRESIDENCY FOR THE YEAR 1919.

GOVERNMENT OF BENGAL.

POLITICAL DEPARTMENT.

Police.

CALCUTTA, THE 2ND SEPTEMBER 1920.

RESOLUTION—No. 3629 P.J.

READ—

The report on Police administration in the Bengal Presidency for the year 1919.

Read also—

The report for the year 1918 and the resolution of Government recorded thereon.

THE prevailing note of the report is the lament that financial stringency is hampering the work of the department in all directions, and preventing the expansion and increased efficiency which is demanded by progressive standards of provincial development. The Police Department cannot afford to stand still, but the increased cost of living, of equipment and of building threatens a retrogression unless the fact is accepted that the services rendered to the community by the department are worth paying for, and it is false economy to stunt its growth. It is urged that inadequate pay, apart from the risk of the depletion of the force through falling off in recruitment and increase in desertions and resignations, brings in its train deterioration of quality, physique, health and morale, while inadequate clothing and unsuitable lodging make themselves felt in a high sick rate. The postponement of the opening of new centres and of increasing the staff and reserves involves the overworking of the existing force. These evils can only be remedied by increased expenditure, and it will have to be faced in the near future. The department has only in late years begun to make up leeway; but the pace must be regulated with due consideration of the needs of the province in other directions and of its resources, and the immediate removal of all difficulties cannot be hoped for.

The past year has shown evidence of progress which, if slow, is steady; the expenditure on the force has risen by Rs. 10 lakhs and on buildings from Rs. 18 to 22 lakhs. During the year the pay of officers of the Imperial Service was revised in accordance with the recommendations of the Royal Commission on the Public Services in India; the pay of sergeants was increased; while proposals for improving the pay and prospects of head constables received the sanction of the Secretary of State. Writer head constables will in future be called assistant sub-inspectors, and half the annual vacancies in the rank of sub-inspector will be filled by promotion from this new grade. Proposals have been submitted to the Secretary of State for the formation of a probationary grade of sub-inspectors on the pay and allowances of the lowest grade so that it will not be necessary in future to place officers, while still on training, in responsible charges. This should result in a general improvement in the quality of the work, which has hitherto had to be delegated to untrained men, and will at the same time, by relieving the leave reserve from other calls, enable leave to be given more freely. An Additional Superintendent of Police was sanctioned for the district of Burdwan with independent power to deal with the crime of the Asansol subdivision; the revised scale of the ordinary reserve of head constables and constables, sanction to which was received late in 1918, was

partially introduced; and five new police-stations were established, but no less than 34 proposals for opening up new investigating centres are still awaiting funds.

2. The most important question, and the one which has given the Inspector-General the greatest anxiety, is that of improving the conditions of service especially in the subordinate ranks. The number of vacancies in the rank of constables, which was 500 in the preceding year, rose to over 900 at the close of the year, and there was a marked increase in the number of casualties; 343 men deserted during the year, 445 men were discharged, 318 dismissed and 1,170 resigned. There can be only one explanation of these figures, viz., that the work and pay are not sufficiently attractive to compete with other employments available to the class from which recruitment is made. Since the close of the year grain compensation allowance on a sliding scale of Rs. 1-8 to 3 has been allowed to constables, and this has given some relief; but it is a temporary expedient and the question of the conditions of service of these ranks will have to be re-examined. Proposals to this end have recently been submitted by the Inspector-General of Police.

3. The Governor in Council is glad to record that though, in view of economic distress and of widespread industrial unrest, the past year has been a difficult one from the point of view of police administration, the work of the Bengal police has maintained a good standard of efficiency. Appreciation has been expressed by Their Excellencies the Viceroy and the Com-Commander-in-Chief of the services of the officers and men of the Bengal Military Police who volunteered to serve with Indian units abroad in the war. The utility of the river police patrols has been acknowledged by the various Chambers of Commerce, and the services which the force rendered in relief work after the cyclone in Eastern Bengal in September have been eulogised by the officers in charge of the relief operations.

4. During the year co-operation rendered to the police by the general public in the suppression of crime was more in evidence. Joint patrols, union watch committees and village defence parties are phenomena of recent growth. The Governor in Council is gratified by the work done by the town volunteers of Hooghly, and by similar work at Chinsura, Serampore, Brahmanbaria, and in the Diamond Harbour and Sadar subdivisions of the 24-Parganas, and trusts that this spirit of co-operation will rapidly spread elsewhere.

5. The health of the force slightly improved as compared with the previous year, and the admissions into hospital fell from 13,365 to 12,349, while the death-rate was lower. The previous year, however, was particularly unhealthy owing to outbreaks of influenza, and the figures for 1919, which are in excess of those of 1917, cannot be regarded as satisfactory. The local officers attribute the sick rate largely to inadequacy of pay, deficient equipment in the way of boots, coats and mackintoshes, and unsuitable buildings.

6. There was a satisfactory increase in the number of men rewarded during the year, but the percentage of departmental punishment, though lower than in the preceding year, continued high, being 26 per cent. of the actual strength.

7. The proportion of officers and men judicially punished increased from 1·3 per cent. of the force in 1918 to 1·4. Of 529 criminal cases against the police which were disposed of during the year, only 92 ended in conviction. In seven cases allegations of torture were made, but in no instance was the charge established. The majority of the convictions were for wrongful confinement. Of 46 civil suits instituted against members of the force during the year, 29 were dismissed, 2 were decreed and 15 were pending at the close of the year.

8. The reports on the village police are on the whole encouraging, but the percentage of punishments inflicted is regrettably high, while the rewarding of good work is apparently neglected in some districts. The matter merits particular attention. The Bengal Village Self-Government Bill has passed into law and better results may now be hoped for.

9. The total cost of the department rose from rupees one crore and 5 lakhs to one crore and 15 lakhs. The revision of the pay of the Imperial Service officers contributed to the increase. Rupees 22 lakhs were spent on buildings, as compared with Rs. 18 lakhs in the previous year, but the cyclone of September 1919 largely counterbalanced this improvement, and money urgently needed for further improvement has had to be diverted to making good the damage done.

10. There was a small increase to the total volume of cognizable crime. The provincial total of serious crime was 73,926 cases against 65,302 cases in the previous year, and most of the more serious heads, except riot and murder, show an increase. This was large in the districts of the Burdwan and Rajshahi ranges, economic distress, floods and the cyclone being the main causes.

11. Success attended the application of the preventive sections of the Code of Criminal Procedure. The Inspector-Genral of Police is, however, of opinion that something more is needed, and urges the adoption of the system of " preventive detention " as practised in the United Kingdom and prescribed by the Prevention of Crime Act, 1908. The Governor in Council proposes to await the recorded opinion of the Jails Committee on this question.

12. Revolutionary crime still further decreased. There were two such dacoities in the year, as compared with three in 1918 and 9 in 1917. Under the terms of the King's Proclamation clemency was shown to persons placed under restraint in connection with offences against the State. All those interned under the Defence of India Rules and the greater number of the State prisoners were released after the close of the year.

13. Mr. C. W. C. Plowden, C.I.E., held charge of the department till the 13th April 1919 when he was succeeded by Mr. R. B. Hyde. The Governor in Council desires to express his thanks to these officers for their capable administration. He also takes this opportunity to place on record his appreciation of the work of the force, both officers and men, in a year of peculiar difficulty.

Ordered that copies of the Resolution be forwarded to the Inspector-General of Police, the Commissioner of Police, Calcutta, and all Commissioners of Divisions for information.

Ordered also that the Resolution be published in the *Calcutta Gazette*.

By order of the Governor in Council,

H. L. STEPHENSON,

Chief Secy. to the Govt. of Bengal.

REVISED SCALES OF PAY OF THE PROVINCIAL AGRICULTURAL SERVICE.

GOVERNMENT OF BENGAL.

REVENUE DEPARTMENT.

Agriculture.

CALCUTTA, THE 3RD SEPTEMBER 1920.

RESOLUTION—No. 7555-AGRI.

THE Government of Bengal have been authorised by the Government of India to settle the grading of the Provincial Agricultural Service within the limits of pay fixed by the Secretary of State, viz., a maximum of Rs. 750 a month and a minimum of Rs. 250 a month, with a probationary rate of Rs. 200 a month. After careful consideration the Governor in Council has decided to adopt the scale of pay sanctioned by the Secretary of State for the Provincial Forest Service and has sanctioned the following scale of pay which will have restrospective effect from the 1st December 1919:—

Year of service.	Scale of pay per mensem.
	Rs.
Probationary period	200
1st year (on confirmation)	250
2nd year	270
3rd year	290
4th year	310
5th year	330
6th year	350
7th year	370
8th year	390
9th year	410
10th year	430
11th year	450
12th year	470
13th year	490
14th year	510
15th year ..	530
16th year	550
(Efficiency bar.)	
17th year	570
18th year	590
19th year	610
20th year	630
21st year	650
22nd year	620
23rd year	690
24th year	710
25th year	730
26th year and over	750

The probationary period will in future be two years.

ORDER.—Ordered that this Resolution be published in the *Calcutta Gazette* for general information.

By order of the Governor in Council,

M. C. MCALPIN,
Secy. to the Govt. of Bengal.

CALCUTTA,
The 2nd September 1920.

G. J. ST. C. SEDGLEY,
Under-Secy. to the Govt. of Bengal.

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 2nd September 1920.

Summary.—Seasonable rain again fell this week throughout the Province, facilitating the steeping and washing of jute and transplantation of winter paddy. More rain is, however, still wanted in parts of Western Bengal. Weeding of winter paddy has commenced. Harvesting of autumn paddy is nearly completed, but that of jute is still going on. The average price of common rice for the province has risen by about 0·10 per cent. as compared with that of the previous week.

Serial No.	District and subdivision.	Rainfall.	Price of common rice, in seers per rupee.		Character of the weather, condition of crops, etc.
			This week.	Previous week.	
1	2	3	4	5	6
		Inches.			
1	24-Parganas	1·98	5	5	Condition and prospects of jute are good. Effects of weather are favourable to its growth. Harvesting continues fairly. Fodder and water are sufficient. Harvesting of *aus* paddy continues. Transplantation of *aman* paddy and harvesting of *aus* paddy are going on.

RESOLUTION ON THE ADMINISTRATION REPORT OF THE COMMISSIONERS FOR THE PORT OF CHITTAGONG FOR THE YEAR 1919-20.

GOVERNMENT OF BENGAL.

Marine Department.

CALCUTTA, THE 11TH SEPTEMBER, 1920.

RESOLUTION—No. 2310 Marine.

READ—

The Administration Report of the Commissioners for the Port of Chittagong for the year 1919-20.

Income.—The ordinary receipts of the Port Fund during the year under review amounted to Rs. 5,41,713 (exclusive of the ordinary Government

grant of Rs. 1,50,000 for the improvement of the Port), as against Rs. 2,28,310 of the preceding year. Further grants were made by Government of Rs. 3,25,000 for revetment work and of Rs. 8,00,000 for the purchase of the Dredger "Pelican." This latter grant has not been utilized as the *Pelican* was found unsuitable for the Port.

The increase was mainly due to the general improvement of trade following the termination of the war.

Expenditure.—The ordinary expenditure of the Port Fund for the year amounted to Rs. 6,51,538 as against Rs. 4,60,263 of the previous year. The increase was mainly due to an all-round increase of pay of the Port Commissioners' employees, the grant of a bonus of a month's pay to clerks, repairs to the Commissioners' buildings, increased cost of stores and the purchase of a new motor launch for River Survey work. The capital expenditure from the Port Fund during the year amounted to Rs. 2,62,348.

Assets and Liabilities.—The value of the Port Commissioners' properties, as estimated on the 31st March 1920, stands at Rs. 50,61,491, and the liabilities, excluding loans from Government for revtment work, at Rs. 1,27,942. The increased rates of river dues, mooring and unmooring charges, port dues, etc., which were adopted during the previous year as a war measure continued during the year.

Dredging Report.—The dredger *Karnafuli I*, was twice under repairs during the year. She worked at the Outer and Inner Bars for 156 days dredging 7,172,200 cubic feet.

Outer Bar.—An average depth of 9 feet 9 inches was maintained throughout the year. The dredger was employed for 84 days on this bar.

Inner Bar.—An average depth of 9 feet 10 inches was maintained during the year. The dredger was at work for 72 days on this bar.

River Survey.—The annual surveys were carried out from the mouth of the river to 6 miles above Sadarghat. These surveys showed a marked improvement in the navigable channels.

The river survey was carried on continuously throughout the year, 101,818 soundings having been taken over a length of 776·61 miles, the largest on record.

Revetment.—Slight repairs were necessary in places in the old revetment.

Light-houses.—The Kutubdia and the Norman's Point, Light-houses, towers, lanterns and clockwork remained in good order.

Light vessels.—The Light vessel *Sarsuti* underwent a general overhaul during the year. The total cost of maintaining the vessel amounted to Rs. 19,717.

Shipping.—The total number of ocean-going vessels, inland steamers and sailing vessels which entered the Port was 842 as against 709 during the previous year.

Two preliminary enquiries into cases of shipping casualties were held by the Port Officer.

Trade.—The total value of foreign and coasting sea-borne trade shows an improvement of over 62 per cent. over that of the previous year.

Sanitation.—The general health of the Port was good.

Future Administration of the Port.—It has been decided to place the port of Chittagong under the direct control of the Assam Bengal Railway, and the necessary legislation to give effect to this decision is now under the consideration of the Government of India.

General.—The duties of the Port Officer were carried on up to the 30th June 1919, by the Collector of Customs and the Senior Harbour Master in addition to their own duties. Commander H. M. K. Moilliet, O.B.E., R.I.M., took up the appointment of Port Officer from the 1st July 1919.

Mr. K. C. De, Commissioner of the Chittagong Division, was Chairman of the Trust throughout the year.

By order of the Governor in Council,

C. B. BAYLEY,

Deputy Secy. to the Govt. of Bengal.

*New gauge fixed at Rajmahal from 1st June 1910 in place of the gauge at Sahebganj. The zero of gauge at Rajmahal again 56·46 ft. above M.S.-L. from 10th February 1916 to 15th June 1918. From the 16th June 1918 to 6th April 1919 it. April 1919 it is 56·319 ft. above M.S.-L.

†To compare the reduced levels shown in these monthly printed statements before and after the 1st June 1903, 5·78 ft. October 1909).

(a) A new gauge fixed at Monghyr on 16th July 1914.

(b) From the 1st November 1915 the zero of gauge was 2·48 ft. above M.S.-L. Previous to that the zero was at M.S.-L zero is 1·509 ft. above M.S.-L.

(c) From the 25th January 1916 to 4th April 1919 the zero of gauge at Berhampore was 80·99 ft. above M.S.-L. From

(d) From the 26th October 1916 a temporary wooden gauge with its zero at 49·00 ft. above M.S.-L. was erected at 3rd June 1919. From 4th June 1919 the zero is 1·51 ft. above M.S.-L.

(e) Gauge shifted from Sabik Goalundo to Fakirabad from 30th June 1919.

The 9th September 1920.

J. C. Roy,
Director of Agriculture, Bengal.

Dacca, *the 7th September 1920*

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 9th September 1920.

Summary.—During the week moderate to heavy rain fell in North and East Bengal but it was light elsewhere. More rain is required in parts of Western Bengal for the transplanting of winter paddy and for the growth of standing crops. Harvesting of autumn paddy is nearing completion. Cutting, steeping and washing of jute and transplantation of winter paddy still continue. Weeding of winter paddy is in progress. Prospects of standing crops have been improved by the recent rain. The average price of common rice for the Province has risen by about 0·21 per cent. as compared with that of the previous week.

Serial No.	District and subdivision.	Rainfall.	Price of common rice, in seers, per rupee.		Character of the weather, condition of crops, etc.
			This week.	Previous week.	
	2	3	4	5	6
		Inches.			
1	24-Parganas	1·74	5	5	Prospects of jute are good. Effects of weather are favourable to its growth. Fodder and water are sufficient. Harvesting of jute continues fairly. Harvesting of *aus* paddy continues. Transplantation of *aman* paddy is nearly completed.

REPORT ON THE WORKING OF THE LICENSED WAREHOUSE AND FIRE-BRIGADE ACT FOR THE YEAR 1919-20.

NOTIFICATION.

No. 314T.M.—The 9th September 1920.—The following is published for general information, under section 41 of the Licensed Warehouse and Fire-Brigade Act, 1893 (Bengal Act I of 1893).

L. S. S. O'MALLEY,
Secy. to the Govt. of Bengal.

No. S.2160, dated Calcutta, the 24th August 1920.

From—The Hon'ble Mr. J. DONALD, C.I.E., I.C.S., Chairman of the Corporation of Calcutta.

To—The Secretary to the Government of Bengal, Municipal Dept.

I HAVE the honour to submit the following report under section 41 of Act I (B.C.) of 1893, for the year 1919-20.

2. During the year under report, the fees under sections 10 and 24 of the said Act were levied at 10 per cent. on the annual valuation of warehouses, as in the preceding year.

A statement showing the receipts and disbursements of the Licensed Warehouse Fund and a list of jute and other licensed warehouses for the year 1919-20 in a consecutive form are appended.

Licensed Warehouse (Fire Brigade) Fund.

Statement of Receipts and Disbursements during the year 1919-20.

DEPARTMENT OF AGRICULTURE, BENGAL.

Monthly Weather and Crop Report of Bengal for August 1920.

I. **Character of the season.**—During the month under report the rainfall was above the normal in 13 districts only; elsewhere the fall was defective. It was markedly so in Faridpur, Bakarganj, Noakhali, Rajshahi and Dinajpur. The usual rainfall statement is appended.

II. **Progress of agricultural operations.**—Harvesting of jute and transplantation of winter paddy was in progress, but the operations were hampered in some districts of North Bengal owing to inadequate rainfall and low river levels. In the flood-affected areas of the Midnapore district retransplantation of winter paddy continued where the water had subsided sufficiently. The harvesting of broad-cast *aus* paddy has been almost completed.

III. **State of standing crops.**—The condition of jute was reported to be generally fair throughout the province and that of autumn paddy, sugarcane and other standing crops favourable.

IV. **Prospects and probable outturn.**—The outturn of autumn paddy has been satisfactory. The prospects of winter paddy, sugarcane and other standing crops are generally hopeful, with the exception of jute which is fair only.

V. **Damage to standing crops.**—Some damage by insect-pests to jute and other standing crops was reported from parts of Nadia, Murshidabad, Jessore, Bakarganj and Pabna. Slight damage was also caused by rise of the river to transplanted winter paddy in some char-lands of the Mymensingh and Jessore districts. Portions of the Midnapore district were affected by floods and transplanted paddy and other standing crops were damaged to a considerable extent in the affected areas.

VI. **Condition of agricultural stock.**—Sporadic cases of cattle-disease were reported from 14 districts of the province.

VII. **Failure of pasturage and fodder.**—No scarcity of fodder was reported from any part of the province.

VIII. **Prices of food-grains.**—During the second half of the month under review the price of common rice rose in 6 districts, fell in 4 and remained stationary in the rest of the province. It ranged from 4 seers 4 chitaks per rupee at Darjeeling to 6 seers at Birbhum.

IX. **Condition of agricultural people.**—The condition of the agricultural population was fair.

G. EVANS,
Director of Agriculture, Bengal.

CAMP CALCUTTA,
The 17th September 1920.

CALCUTTA,
The 4th / 17th September 1920.

CHAS. A. BENTLEY,
Sanitary Commissioner for Bengal.

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 16th September 1920.

Summary.—During the week heavy rain fell in North and East Bengal; the fall was generally light to moderate elsewhere. More rain is needed in some West Bengal districts for the transplantation of paddy seedlings and for the growth of other standing crops. Harvesting of autumn paddy is nearly over. Weeding of winter paddy is proceeding. Cutting, steeping and washing of jute and transplanting of winter paddy are still going on in places. Floods have caused some damage to standing crops in parts of Rangpur, Bogra and Mymensingh. Prospects of standing crops are good. The average price of common rice for the Province has risen by about 0·56 per cent. as compared with that of previous week.

Serial No.	District and subdivision.	Rainfall.	Price of common rice, in seers, per rupee.		Character of the weather, condition of crops, etc.

		Inches.			
23	FARIDPUR ...	5·64	4½ 5¼*	4 5/16 5*	The recent rain has been favourable to crops. Harvesting of sugarcane and jute is going on. Prospects of paddy are good and those of jute are fair. Fodder is sufficient.
	Goalundo ... (Rajbari).	2·48	4½	4¼	
	Madaripur ...	4·91	4¼	4⅜ 4¾*	
	Gopalganj (a)	5·81	4¼	4¼ 5*	
24	BAKARGANJ (BARISAL).	6·04	4½ 5¼‡ 5⅛*	4½ 5⅛*	Weather foul. Prospects of standing crops are good. Fodder and water are sufficient.
	Pirojpur ...	7·23	4⅜	4⅜	
	Patuakhali	7·16	4½ 5⅜*	4	
	Dakshin Shabazpur (Bhola).	9·27	4 7/16 5⅛*	4 7/16	
25	CHITTAGONG	1·73	4½ 5½*	4½ 5½*	Transplantation of winter paddy is nearly finished. Prospects of standing crops are fair. Fodder is sufficient. *Panga* salt is selling at 11 and 8 seers per rupee at Sadar and Cox's Bazar respectively.
	Cox's Bazar	4·50	5	5	
26	TIPPERA ... (COMILLA).	6·16	4⅜ 5⅜*	4	Weather rainy. Harvesting of *aus* paddy and jute is nearing completion. Transplantation of *aman* paddy is going on. Transplanted winter rice has been partly damaged by the excessive rainfall. Condition and prospects of jute are not good.
	Brahmanbaria.	4·44	4 3/7 5⅓*	3 3/7 5 12/61*	
	Chandpur ...	6·42	4 4/15 4 7/8‡*	4 4 28/33*	
27	NOAKHALI ...	9·70	4½	4¾	Weather rainy. Harvesting of *aus* paddy is completed. Transplantation of *aman* paddy continues. Cattle-disease is reported from Chhagalnava Pashuram Companyganj and Senbagh.
	Feni ...	8·88	4 5/16	5 5/16	
28	CHITTAGONG HILL TRACTS.	1·60	6† 5*	5	Weather rainy. Prospects of standing crops are fair. Harvesting of *jhum* paddy begins; outturn is fair. Transplantation of winter paddy is in progress. Burma rice is being imported. Fodder is sufficient.

* Burma rice. † *Jhum* rice.

‡ New *aus* rice

(a) The rainfall at Haridaspur, which is very near to Gopalganj, is shown here.

J. C. ROY,

for *Director of Agriculture, Bengal.*

DACCA, *the 18th September 1920.*

FINAL FORECAST OF THE JUTE CROP, 1920.

Consolidated statement for Bengal, Bihar and Orissa, and Assam.

Area.—The estimated area for the three Provinces is 2,502,273 acres, a decrease of 336,602 acres on last year's figures.

Yield.—It is estimated that the crop will yield 5,962,192 bales of jute, a decrease of 2,578,558 bales on last year's returns.

Remarks.—Last year's estimates for Bihar and Orissa and Assam have been revised by the respective local Departments.

The consolidated figures are as follows:—

Province.	Area in Acres.			Yield in Bales.		
	1919.	1920.	Difference.	1919.	1920.	Difference.
Bengal (including Cooch Behar).	2,498,145	2,205,323	– 292,822	7,637,630	5,304,836	– 2,332,794
Bihar and Orissa ...	203,430	178,750	– 24,680	570,720*†	398,356†	– 172,364
Assam	137,300*	118,200	– 19,100	332,400*	259,000	– 73,400
Total ...	2,838,875	2,502,273	– 336,602	8,540,750	5,962,192	– 2,578,558

* Revised. † Including Nepal.

The Departmental Final Forecasts for each of the three Provinces are appended.

G. EVANS,
Director of Agriculture, Bengal.

CALCUTTA,
The 21st September 1920.

* Revised.

DEPARTMENT OF AGRICULTURE, BENGAL.

Final Forecast of the Jute Crop of Bengal for 1920.

(Note.—On an average of the five years ending 1918-19 the area under jute to which this forecast relates represents 88·2 per cent. of the total area under jute in British India.)

Season.—The outstanding feature of the season is that the rainfall was very unevenly distributed throughout the Presidency both at the time of sowing and during the period of growth. The beginning of March was too wet in Eastern and Northern Bengal, and April and May, on the other hand, proved to be too dry for Western Bengal. Consequently the sowings which began at the usual time finished very late, the operations being delayed a good deal all through these months. For these reasons the early sown crop was so much affected in places that a large area had to be re-sown later. Good weather conditions, however, prevailed during June. This helped for a time the growth of the crop and enabled further sowings to be made in parts of Western Bengal. A weak monsoon over the greater part of the Province during July and August had an injurious effect on the crop which flowered prematurely and consequently became stunted in growth. Good rain in August saved the *deshi* crop in Western Bengal. Lack of sufficient water for retting of jute was also felt at the beginning, but this difficulty was removed by abundant rainfall at the beginning of September. The season, on the whole, was not favourable to the crop.

Condition of the crop.—Owing to the unfavourable season the crop outturn is a fair one in Western Bengal, but moderate only in parts of Northern and Eastern Bengal.

Acreage.—The area under jute is returned at 2,205,323 acres, a decrease of 292,822 acres or 11·7 per cent. as compared with last year's final figures. The decrease is ascribed chiefly to (1) unfavourable weather conditions, (2) low price of jute and the uncertainty of future prices, (3) the high price of paddy, sugar and other foodstuffs which induced cultivators to substitute these crops.

Outturn.—As in previous years, the percentage figures are calculated on the basis of Divisional normals, which remain as follows:—Dacca and Chittagong 3·7 each, Rajshahi 3·5, Presidency and Burdwan 3·2 bales per acre.

The total outturn of the Bengal crop is returned at 5,304,836 bales of 400 lbs. against 7,637,630 bales in last year's forecast, a decrease of 2,332,794 bales.

G. EVANS,

Director of Agriculture, Bengal.

CALCUTTA,

The 21st September 1920.

APPENDIX I.

Final Forecast of the Jute Crop of Bengal, 1920.

DISTRICT.	ESTIMATED AREA UNDER JUTE.		ESTIMATED OUTTURN AS A PERCENTAGE OF THE NORMAL YIELD PER UNIT OF AREA.		ESTIMATED TOTAL YIELD.		Date by which harvesting generally commenced, and whether that date was early, normal or late.	REMARKS BY DISTRICT OFFICERS
	Last year.	This year.	Last year.	This year.	Last year.	This year.		
1	2	3	4	5	6	7	8	9
	Acres.	Acres.			Bales.	Bales.		
24-Parganas ...	63,509	47,712	83	64·3	167,512	128,277	Middle of August. Normal.	The decrease in area is due to want of timely rainfall, the rise in the price of rice and sugarcane and the low price of jute.
Nadia ...	67,105	58,163	71	66	154,834	123,439	August. Normal ...	The decrease in area as compared with last year is due to low price of jute and high price of rice. The outturn is below the normal owing to damage of the crop by insects.
Murshidabad	20,826	15,111	94	112	62,455	53,922	End of August. Late	The decrease in area as compared with last year is due to uncertainty of the jute market and the relative rise in the prices of food-grains. Weather conditions have been favourable for the crop throughout the district and hence the outturn is better than last year.
Jessore ...	84,637	59,350	88	84	239,644	180,164	Last week of August. Rather late.	The increase in area as compared with the figure shown in the preliminary forecast is due to revised figures submitted by the Subdivisional Officers after further enquiry. The falling off in the outturn is due to unseasonable and indifferent rainfall and the presence of insect-pests in certain parts of the district.
Khulna ...	21,668	9,880	99	78	62,659	24,606	August. Normal ...	Late sowing and unfavourable weather conditions retarded growth of the crop.
Burdwan ...	6,630	5,791	89	101·87	18,904	18,671	Third week of August. Normal.	Unfavourable market last year and want of sufficient rain during sowing season account for the reduction of area this year; but the yield has made this up.
Midnapore ...	11,948	7,963	81·25	74	31,074	18,937	September. Late ...	The decrease in area is due to want of rain at sowing time. Unfavourable weather and the floods of July and August account for the falling off in outturn.
Hooghly ...	30,362	26,259	93·75	91·15	92,668	76,606	Last week of August	The decrease in area as compared with that of last year is due to— (i) High price of paddy. (ii) Deficient rainfall at sowing time. (iii) Uncertain and low prices of jute.
Howrah ...	9,830	9,674	94·81	90	27,384	27,868	Last week of August. Normal.	The weather has been fairly favourable for the growth of the crop.
Rajshahi ...	73,697	80,407	88	60	227,038	170,149	Late in July for low lands and early in September for high lands. Late.	Increase in area is due to an expectation of a good market of jute. The weather was unfavourable from the beginning. The outturn is much lower than last year.
Dinajpur ...	60,978	65,619	91·7	58·5	195,923	134,355	Middle of August ...	The increase in area is due to an expectation of a good market as the amount of carry over of old jute in this district was very small. The decrease as compared with the preliminary forecast is due to the fact that most of the jute fields which did not yield a crop on account of unfavourable weather were ploughed up for paddy transplantation. The yield falls much below the divisional normal owing to insufficient rain.
Jalpaiguri ...	49,306	55,289	101	80	174,296	154,809	Middle of August. Normal.	The crop was stunted in growth owing to accumulation of water in the fields in its early stage and consequently the outturn was low. The decrease in area as compared with the preliminary forecast is due to revision of estimates after careful checking.
Darjeeling ...	2,215	2,803	103	106	8,000	9,530	First week of August. Normal.	Weather condition was favourable on the whole. Crop slightly better than last year.
Rangpur ...	207,664	241,464	103	75	754,076	653,817	August. Late ...	The crop was adversely affected by want of rain in the early part of the season. The decrease in area as compared with the first forecast is due to revision of estimates after careful checking.

DISTRICT.	ESTIMATED AREA UNDER JUTE.		ESTIMATED OUTTURN AS A PERCENTAGE OF THE NORMAL YIELD PER UNIT OF AREA.		ESTIMATED TOTAL YIELD.		Date by which harvesting generally commenced, and whether that date was early, normal or late.	REMARKS BY DISTRICT OFFICERS.
	Last year.	This year.	Last year.	This year.	Last year.	This year.		
1	2	3	4	5	6	7	8	9
	Acres.	Acres.			Bales.	Bales.		
Bogra ...	69,946	74,730	90	67	196,846	149,460	Middle of July. Normal.	The low outturn is due to want of timely rains and damage by hailstones in certain parts of the district. This year's acreage has been revised after careful checking.
Pabna ...	103,010	96,138	88	67	317,270	226,116	Middle of July. Normal.	The low outturn is due to unfavourable weather. Some damage was done by insect-pests.
Malda ...	26,600	19,000	66	52·86	61,180	35,150	Middle of August. Late.	The increase of area by 3,000 acres over the preliminary forecast is due to the fact that figures from defaulting unions have now been included in the present forecast. The weather was unfavourable at the time of sowing and weeding which affected growth of the crop. Difficulty had been felt in steeping jute for want of sufficient rains but this has been removed by the recent rains and floods.
Dacca ...	283,517	244,211	85	70	879,677	628,176	Middle of July. Normal.	For want of timely rainfall the early sown crop did not thrive well. The outturn is therefore poor.
Mymensingh ...	628,044	538,851	87	63	2,021,460	1,258,975	End of July. Normal	The decrease in area is due to the rise in the price of paddy and fall in the price of jute last year. The crop was affected by long drought and hailstorms after sowing. Want of rain later on retarded the growth of the plants which flowered early. Difficulty was also felt in steeping jute. Hence a poor outturn.
Faridpur ...	258,400	219,100	84	79	801,040	643,334	Middle of July. Normal.	Outturn falling below the normal is due to drought in April and May.
Bakarganj ...	56,633	37,633	77	73	161,476	101,797	July. Early	The reasons for the low outturn are— (1) A long spell of dry weather in April and May retarded the growth of the crop and also caused premature flowering. (2) Early harvesting of the crop.
Chittagong ...	200	200	81	106	660	791	Last week of August	Weather was seasonable.
Tippera ...	266,641	218,280	80	50	783,126	403,906	First week of July. Early.	Owing to a dull jute market last year and considerable quantity of jute remaining unsold in the hands of cultivators and middlemen, a smaller area has been sown this year. Excessive rainfall in March and April last destroyed jute seedlings in low-lying places and left too much moisture in the fields for the seeds subsequently sown to have a healthy growth. The long spell of drought that followed also injuriously affected the crop. Thirdly owing to insufficiency of flood water harvesting was retarded for a time.
Noakhali ...	54,500	36,144	65	49	130,800	66,619	Beginning of July. Early.	The decrease in area as compared with last year is due to large quantity of old stock, low price of jute and high price of paddy. The area as estimated now is based on the result of local inquiry made since the submission of the preliminary forecast. The cultivation and growth of the crop was adversely affected by the heavy rainfall at sowing time and continued drought afterwards.

NOTE.—The figures given above are the averages for all the rain registering stations in each district.

DEPARTMENT OF AGRICULTURE, BIHAR AND ORISSA.

Final Forecast of the Jute Crop of Bihar and Orissa, 1920.

(Note.—On an average of the five years ending 1918-19, the area under jute to which the Bihar and Orissa forecast relates, represents about 8·3 per cent. of the total area under jute in British India.)

Acreage.—The final district returns of the seven jute-growing districts of the province show an area under jute of 178,750 acres or in round numbers 178,800 acres, as compared with 177,800 acres reported in the preliminary forecast, 1920, and 203,400 acres last year. The decrease in area was mainly in Purnea, where it was attributed to the rise in the price of paddy and fall in the price of jute. Insufficient rainfall at the time of sowing restricted sowings in Champaran and the Santal Parganas.

Weather conditions.—In March the rainfall was above the normal in all jute districts. But in April to June it was below the normal everywhere. In July the rainfall was below normal in Purnea, Bhagalpur and Muzaffarpur and above normal in Cuttack, Balasore, Champaran and the Santal Parganas. In August it was below the normal in all jute districts excepting Balasore, where it was above normal. The short rainfall in Purnea throughout the season has affected the crop and water is also wanting in parts of the district for retting the crop. Some damage was done by floods in Cuttack and Balasore. The season has not been favourable for the crop this year on the whole.

Outturn.—In the important districts of Purnea and Cuttack the outturn of the crop has been reported as 60 and 75 per cent., respectively. Champaran reports a normal crop. Balasore, Muzaffarpur, Bhagalpur and the Santal Parganas report 90, 66, 70 and 72 per cent., respectively.

On the basis of the area and percentage outturn reported by the District Officers and taking three bales as the normal outturn per acre, the total gross outturn of the crop for the Province this year comes to 334,485 bales or in round numbers 334,500 bales against 512,500 bales, the revised figure for last year.

The average import of raw jute into this province from Nepal during the last three years was equivalent to 63,871 bales. This figure added to the figure for the province arrived at gives a total for Bihar and Orissa of 398,356 bales or in round numbers 398,400 bales.

A. C. DOBBS,

Director of Agriculture,
Bihar and Orissa.

RANCHI,

The 13th September 1920.

APPENDIX I.

Final Forecast of the Jute Crop of Bihar and Orissa for 1920.

Division.	District.	Total area of the district.	Estimated total area under cultivation.	Estimated normal area under jute. (This figure has been arrived at by taking the average of 10 years immediately preceding the year to which this forecast relates.)	Estimated area under jute.		Estimated outturn as a percentage of a normal yield per unit of area.		Estimated total yield.		Date by which harvesting generally commenced, and whether that date was early, normal or late.	Remarks by District Officers.
					Last year (1919).	This year (1920).	Last year (1919).	Last year (1920).	Last year (1919).	This year (1920).		
1	2	3	4	5	6	7	8	9	10	11	12	13
		Acres.	Acres.	Acres.	Acres.	Acres.			Bales.	Bales.		
Tirhut ...	Champaran ...	2,259,840	1,430,200	1,900	2,400	1,400	95	100	6,840	4,200	Not yet commenced in Sadar. It commenced in August in Bettiah.	The weather and rainfall were not favourable. The rainfall during July and August improved the condition of the crop and a normal outturn is expected. The date of harvesting was normal.
	Muzaffarpur ...	1,942,394	1,627,000	1,700	2,200	2,200	92	66	6,072	4,356	August. Normal	
Bhagalpur ...	Bhagalpur ...	2,661,020	1,684,100	1,287	1,150	1,150	77	70	2,656	2,415	August and September.	
	Purnea ...	3,198,153	1,694,400	214,500	175,000	153,000	83	60	435,750	275,400	Beginning of August.	The condition of the crop was not favourable in the beginning of the season owing to scanty rainfall in May. The showers of June, however, improved the prospect of the crop. But the deficient rain in August, so far, affected the outturn of the crop and also retarded the steeping of the plant in many places. The decrease in the area sown is due to fall in the price of jute. The date of harvesting was a little late.
	Santal Parganas ...	3,410,400	1,701,800	3,100	1,700	900	100	72	5,100	1,944	Latter part of August.	The decrease in area is noticeable in Pakaur, where the area sown is 100 acres against 800 acres in last year. The Subdivisional Officer explains that this is due to want of rain during the first and second week of June. Rainfall being late the plants did not thrive and hence the outturn is poorer in comparison with that of last year.
Orissa ...	Cuttack ...	2,349,307	1,223,500	17,300	18,500	18,000	89 (a)	75	49,396 (a)	40,500	First week of August which is normal.	The weather was at first very favourable for a bumper crop all over the district but prolonged high floods during July and August damaged the crops in the Jajpur subdivision very seriously, and elsewhere also in varying extent; hence the total figure for the district is low.
	Balasore ...	1,332,621	933,200	2,600	3,480	2,100	80	90	6,696	5,670	Not yet begun ...	The weather conditions were favourable. The general prospect was hopeful. The decrease in area than last year and decrease in outturn than normal are due to floods which destroyed the crops on the banks of the rivers.
	Total ...	17,222,645	10,296,200	242,357 or in round numbers 242,400.	203,430 or in round numbers 203,400.	178,750 or in round numbers 178,800.	84	62·4	512,509 or in round numbers 512,500.	334,485 or in round numbers 334,500.		

(a) Revised by the Collector.

DEPARTMENT OF LAND RECORDS AND AGRICULTURE, ASSAM.

Final Forecast of the Jute Crop of Assam, 1920.

(Note.—On the average of the five years ending 1918, the area under jute in Assam represents some 3·5 per cent. of the total area under jute in British India.)

1. **Season.**—As indicated in the preliminary forecast, excessive rain at the sowing time diminished the area sown and the dry weather of April and May was unfavourable for growth. The weather in June and July improved prospects, but too much damage had been done already.

2. **Area.**—The area under jute as reported by the Deputy Commissioners is 118,200 acres against the final figure of 137,300 acres of last year and 125,100 acres shown in the preliminary forecast of this year. The decrease is due to unfavourable weather conditions and low prices. Five districts have revised the areas reported in the preliminary forecast.

3. **Outturn.**—The percentage of outturn is estimated to be 66 of the normal against 73 (revised) in last year.

On the basis of the area and percentage outturn and taking 3·3 bales of 400 lbs. as the normal yield per acre, the total gross yield of the Assam crop this year comes to 259,000 bales against 332,400 bales, the revised figure for last year, or a decrease of 22 per cent.

J. McSWINEY,

Director of Land Records and Agriculture, Assam.

SHILLONG,

The 18th September 1920.

APPENDIX I.

Final Forecast of the Jute Crop of Assam, 1920.

DISTRICT.	Estimated normal area under jute.	ESTIMATED AREA UNDER JUTE.		ESTIMATED OUTTURN AS A PERCENTAGE OF THE NORMAL YIELD PER UNIT OF AREA.		ESTIMATED TOTAL IN BALES OF 400 LBS.		Date by which the harvesting was commenced and whether that date was early, normal or late.	REMARKS BY DEPUTY COMMISSIONERS.
		Last year (actual).*	This year.	Last year.	This year.	Last year.*	This year.		
1	2	3	4	5	6	7	8	9	10
	Acres.	Acres.	Acres.						
Cachar ...	800	400	200	90	60	1,200	400	August. Normal ...	There was heavy rainfat the sowing time. The weather was not favourable for the growth of the crop.
Sylhet ...	16,000	26,100	14,200	68	60	58,600	28,200	Beginning of September. Late.	The decrease in area as compared with the actual of last year is due partly to excessive rain at the time of sowing and partly to the low price of jute which has been replaced by rice in many places. The weather has been unfavourable.
Goalpara ...	42,400	60,000	55,000	61	50	120,800	90,700	Latter part of June. Early.	The decrease in area is due to the fact that a very large stock remained last year with the cultivators on account of the low price. The weather was unfavourable at sowing time and it continued so throughout the season; floods and hailstorms damaged the crop to some extent.
Kamrup ...	6,100	17,000	15,100	90	70	53,200	34,900	First week of August. Normal.	The weather was not favourable at sowing time on account of incessant rain but subsequently improved somewhat. Some damage was done by floods and insects.
Darrang ...	7,000	10,100	10,100	80	95	26,800	31,600	August. Normal ...	The character of weather in Sadar was good but was unfavourable in Mangaldai subdivision where some damage was caused by flood.
Nowgong ...	5,700	18,800	18,900	90	95	55,800	59,300	1st July. Early ...	The slight increase in area is due to ordinary extension of cultivation. The weather was not too favourable to the crop. Some damage was caused by drought and insect-pests.
Sibsagar ...	800	500	400	95	70	1,500	1,000	20th August. Normal	The weather has been unfavourable throughout the season. The decrease in outturn is chiefly due to rain after sowing.
Lakh impur	200	200	200	95	95	600	600	15th September. Normal.	The character of weather has been fair except that there was heavy rain at sowing time and hence the outturn is estimated to be slightly below normal.
Garo Hills (plains).	4,100	4,200	4,100	100	90	13,000	12,300	15th July. Normal ...	The weather was unfavourable at sowing time but from June to August was generally favourable.
Total ...	84,100	137,300*	118,200	73*	66	313,400*	259,000		

* On the basis of actual final figures.

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 23rd September 1920.

Summary.—During the week the fall was scanty except in some districts in Northern Bengal. More rain is wanted for winter paddy. Transplantation of winter paddy and steeping of jute continues. Prospects of standing crops and jute are fair. Some damages to crops by flood is reported from certain districts in Northern Bengal. The average price of common rice has fallen by about 0·6 per cent. as compared with that of the previous week.

Serial No.	District and subdivision.	Rainfall.	Price of common rice, in seers, per rupee.		Character of the weather, condition of crops, etc.
			This week.	Previous week.	
1	2	3	4	5	6
		Inches.			
1	24-Parganas	2·93	5	5	Condition and prospects of jute are good. Effects of weather are favourable to its growth. Transplantation of *aman* paddy and harvesting of *aus* paddy and jute are nearly finished. Fodder and water are sufficient.
	Diamond Harbour.	0·03	4½	4 1/16

	Serampore ...	1·31	4¾	4¾	
	Arambagh ...	0·15	5⅓	5⅓	
11	HOWRAH ...	(*n*)	5⅛	5⅛	Weather seasonable. Harvesting of jute Continues. Condition of sugarcane and paddy is fair. Fodder is sufficient.
	Uluberia ..	Nil	4½	4½	
12	RAJSHAHI (RAMPUR-BOALIA).	0·17	4⅜	4⅜	Prospects of jute and other standing crops are fair. Transplantation of winter rice and harvesting of jute continue. Standing crops have been partly damaged by flood in Naogaon subdivision. Fodder is sufficient.
	Naogaon ...	1·07	4½	4⅞	
	Nator ...	0·14	4¾	4¾	
13	DINAJPUR ...	0·50	$4\frac{3}{16}$	$4\frac{3}{16}$	Weather fair and seasonable. More rain is still needed. Harvesting of jute continues. Flood has subsided. Some damage to crops on low lands is reported and detailed enquiry is in hand. Fodder is sufficient.
	Thakurgaon	5·24	4	4	
	Balurghat ...	0·92	5	5	
14	JALPAIGURI	7·66	(*n*)	4¼	Prospects and condition of *bhadoi* paddy and jute are fair. Effects of weather on the growth of crops are favourable. Harvesting of jute is going on. Fodder is sufficient.
	Alipur ...	11·84	5	Nil	

* Burma rice.

(*n*) Not reported.

Serial No.	District and subdivision.	Rainfall.	PRICE OF COMMON RICE, IN SEERS, PER RUPEE. This week.	Previous week.	Character of the weather, condition of crops, etc.
1	2	3	4	5	6
		Inches.			
15	DARJEELING	2·24	4½	4½	Harvesting of maize and potatoes is going on. Cardamom and paddy are progressing. Cattle-disease is prevalent at places. Stocks of rice, fodder and water are sufficient.
	Kurseong ...	(*n*)	(*n*)	4½	
	Siliguri ...	(*n*)	(*n*)	(*n*)	
	Kalimpong...	0·54	5	4½	
16	RANGPUR ...	5·09	4½	4½	Weather seasonable. Transplantation of winter paddy and harvesting of jute are going on. Condition and prospects of crops are fair. Some damage caused to paddy in low lying tracts by the recent heavy rain. Cattle-disease is reported from Hatibandha thana. Flood is subsiding. No loss of life or cattle is reported. Price of rice is stationary. Fodder and water are sufficient.
	Nilphamari	8·71	5	4⅝	
	Kurigram ...	9·89	4½	4½	
	Gaibandha ...	3·68	4½	4½	
17	BOGRA ...	1·47	4⅞	4⅞	Harvesting of jute and *aus* paddy concontinues. Some damage is caused by flood to late transplanted paddy in eastern and western side of the district, and further transplantation is stopped.
18	PABNA ...	0·02	4½	4½	The prospects of standing crops excepting those of jute are good. Fodder is sufficient.
	Sirajganj ...	(*n*)	(*n*)	4¼	
19	MALDA ...	Nil	5	5	Harvesting of *bhadoi* crops and steeping of jute continue. Fodder is sufficient.
20	COOCH BEHAR	9·79	4 9/16	4 9/16	Weather hot with occasional rains. Transplantation of *haimanti* seedlings is almost finished. Cutting, steeping and washing of jute are continuing; effects of weather on the crop are favourable. No damage to jute is reported. Condition of standing crops is favourable. Fodder is sufficient. Burma rice is not available.
21	DACCA ...	Nil	4½ 5*	4½ 5*	Weather is sunny and hot and beneficial to the drying of jute and transplantation of paddy. Harvesting of jute is nearly finished. Water level is now receding. This would benefit the standing crops. Rice market is steady. Prospects of paddy and jute are fair. Burma rice is not available at Munshiganj.
	Manikganj ...	Nil	4½	(*n*)	
	Narayanganj	1·92	4½	4½	
	Munshiganj (*a*).	0·80	4½	4½ 5*	
22	MYMENSINGH	2·76	4½	4½	Weather hot. Harvesting of *aus* paddy is finised but that of jute is still going on. Effects of weather are favourable on crops. No damage of any kind. Prospects of standing crops are fair. Fodder and water are sufficient.
	Jamalpur ...	0·69	4⅝	4⅝	
	Tangail ...	Nil	4½	4 9/16	
	Netrakona ...	3·33	4½	4 7/16	
	Kishorganj...	0·65	4½	4½	

* Burma rice. | (*n*) Not reported.

(*a*) Munshiganj being very near to Dacca and Narayanganj, its rainfall statistics are not quoted. To give information regarding the northern part of the district, rainfall figures for Kapasia thana are reported here.

DEPARTMENT OF AGRICULTURE, BENGAL.

Second Forecast of the Cotton Corps of Bengal, 1920-21.

[***Note.*** *— On an average of the five years ending 1918-19, the area under the cotton crops in Bengal has represented some 0·3 per cent. of the total area under cotton in India.*]

THERE are two crops—early and late. The "early" crop is chiefly grown in the Chittagong Hill Tracts and in the State of Hill Tippera and to a small extent in other districts. The "late" crop is grown in Bankura and Midnapóre.

Character of the Season.—As reported in the first forecast the weather was generally unfavourable for the early crop both at the time of sowing and during the period of growth. Its present prospects are reported to be fair. The late crop is progressing well and its condition is promising.

Area sown.—The area sown with early cotton is reported to be 68,448 acres this year against 69,280 acres reported in the corresponding forecast of last year.

Of the late crop, 307 acres are reported to have been sown up to date, against 758 acres in the corresponding forecast of last year.

G. EVANS,
Director of Agriculture, Bengal.

DACCA, *the 1st October 1920.*

DEPARTMENT OF AGRICULTURE, BENGAL.

Preliminary Forecast of the *Bhadoi* Crops of Bengal, 1920-21.

NOTE.—On an average of the five years ending 1918-19, the area under autumn rice in Bengal has represented some 8·3 per cent. of the total area under rice in British India.

Character of the Season.—Crop sowings generally commenced at the normal time in the eastern and northern districts, where the operations, however, were somewhat retarded by the excessive rain in March. The rain fall in April and May was insufficient for ploughing and sowing operations, especially in some west Bengal districts. But in eastern and northern Bengal there was adequate moisture in the soil, especially in the low-lying tracts, and the operations proceeded satisfactorily and were almost finished by the end of May, although a little more rain would have benefitted the growth of the crops. During the first part of June, the crops generally suffered from the continued drought, but the rainfall in subsequent months improved the situation. Considerable damage is reported to have been caused by drought in Birbhum, Dinajpur, Pabna, Malda and Tippera and by flood in July in parts of Midnapore. On the whole the season may be regarded as a fair one.

Acreage.—The total area sown with the different *bhadoi* crops this year is reported to be 5,922,000 acres against 5,991,900 acres and 5,827,800 acres respectively in the corresponding and final forecasts of last year. Of this the area under autumn rice is estimated at 5,088,200 acres this year, against 5,123,300 acres and 4,961,600 acres respectively in the corresponding and final forecasts of last year.

Outturn.—According to the district officers' estimates, the outturn of the different *bhadoi* crops for the province works out to 84 per cent. of the normal against 84 and 85 per cent. reported respectively in the corresponding and final forecasts of the last year. Autumn rice, the most important of the *bhadoi* crops, shows an outturn of 85 per cent. for the province this year, against 86 and 87 per cent. reported respectively in the corresponding and final forecasts of last year.

G. EVANS,
Director of Agriculture, Bengal.

DACCA,
The 25th September 1920.

APPENDIX.

Preliminary Forecast of the *Bhadoi* Crops of Bengal, 1920-21.

Districts.	Names of crops.	Estimated normal area under each crop.	Estimated area under each crop.		Estimated outturn as a percentage of the normal yield per unit of area.		Date by which the sowing of each crop was begun this year, and whether that date was early, normal or late.	Remarks by District Officers.
			Last year.	This year.	Last year.	This year.		
		Acres.	Acres.	Acres.				
24-PARGANAS.	*Bhadoi* paddy (autumn rice).	73,400	63,500	64,200	83	1 00	Middle of April to June. Late.	The increase in area is due to high price of rice. The weather has been favourable. The outturn is reported to have been affected owing to want of rain in the Diamond Harbour subdivision at the sowing time.
	Indian-corn (maize) ...	...	100	100	83	67		
	Other *bhadoi* cereals ...	3,600	1,700	1,700	75	75		
	Other *bhadoi* pulses ...

	Bhadoi fruits and vegetables, including root-crops.	6,400	2,400	2,300	58	75		
	Other *bhadoi* food-crops	5,900	2,100	2,200	67	75		
	Bhadoi fodder crops other than jowar, bajra, marua and maize.	1,800	3,100	4,000	67	83		
	Bhadoi fibres other than jute.	...	200	100	67	75		
	Mulberry	(80)	...	...	..	...		
	Bhadoi non-food crops other than fodder and fibres.	8,900	15,700	13,500	67	92		
	Total ...	523,900	494,800	525,100	97	91		
MURSHIDABAD.	*Bhadoi* paddy (autumn rice).	229,700	190,400	193,800	92	83	April to June. Generally late.	The increase in area in case of *bhadoi* paddy was due to rise in the price of food-stuffs and the decrease in others to absence of rain at the beginning. Owing to drought at the beginning, the sowing of the crops was late and the growth retarded but subsequent rainfall improved the condition. Owing to drought at sowing time and to flood in some areas, the crops are reported to have been damaged by about 18 per cent.
	Jowar	100	...	100	...	75		
	Bajra	500	200	100	92	42

	Bhadoi non-food crops other than fodder and fibres.	12,100	800	800	100	100		
	Total ...	445,000	362,000	392,900	83	100		
KHULNA.	*Bhadoi* paddy (autumn rice).	17,800	22,900	20,800	83	92	.....	The decrease in area compared with last year was due to want of rainfall at sowing time. The weather has been favourable
	Other *bhadoi* cereals ...	200	100	100	83	100		
	Other *bhadoi* pulses ...	600	600	500	83	100		
	Bhadoi fruits and vegetables, including root-crops.	14,500	12,900	12,900	75	92		
	Bhadoi non-food crops other than fodder and fibres.	200	100	100	100	100		
	Total ...	33,700	36,400	34,400	80	93		
BURDWAN.	*Bhadoi* paddy (autumn rice).	140,000	121,300	113,100	100	92	June. Normal ...	The decrease in area is due to want of timely rainfall. The weather was not favourable at sowing time, but subsequently it turned favourable.
	Mandua, marua or ragi.	...	(50)	...	83	...		
	Indian-corn (maize) ...	3,000	1,200	1,000	100	100	End of June. Late.	
	Other *bhadoi* cereals ...	1,000	600	600	75	83	May.	
	Other *bhadoi* pulses ...	1,200	1,000	1,200	83	83		
	Bhadoi fruits and vegetables, including root-crops.	3,000	2,700	2,700	83	75	June.	
	Other *bhadoi* food-crops	1,700	1,000	1,000	83	75		
	Bhadoi fodder-crops other than jowar, bajra, marua and maize.	200	200	200	83	83		
	Bhadoi fibres other than jute.	6,000	5,000	5,100	93	83	May.	
	Mulberry	100	..	...	...	...		
	Bhadoi non-food crops other than fodder and fibres.	4,000	2,000	2,600	83	75		
	Total ...	160,200	135,000	127,500	100	92		
BIRBHUM.	*Bhadoi* paddy (autumn rice).	144,100	138,100	126,000	92	75	June. Normal ...	The decrease in area was due to insufficient rainfall. The weather was not favourable. Insufficient rainfall has caused the outturn to fall much below the normal.
	Indian corn (maize) ...	1,900	1,900	1,500	92	67		
	Other *bhadoi* cereals ...	1,400	1,200	1,200	100	67		
	Bhadoi fruits and vegetables including root crops.	10,000	10,000	8,000	83	67		
	Mulberry	1,000	100	100	83	67		
	Bhadoi non-food crops other than fodder and fibres.	2,800	2,800	2,500	100	83		
	Total ...	161,200	149,100	139,300	92	75		

District.	Names of crops.	Estimated normal area under each crop.	Estimated area under each crop.		Estimated outturn as a percentage of the normal yield per unit of area.		Date by which the sowing of each crop was begun this year and whether that date was early, normal or late.	Remarks by District Officers.
			Last year.	This year.	Last year.	This year.		
		Acres.	Acres.	Acres.				
BANKURA.	*Bhadoi* paddy (autumn rice.)	21,900	6,000	5,500	108	100	Beginning of July. Late.	The decrease in area was due to insufficient rainfall in April, May and June. Late sowing as a consequence of late rain was followed by excessive rain in July and August which affected the healthy growth of plants except in case of paddy and fibres. The outturn is below the normal owing to unequal distribution of rainfall.
	Bajra	800	700	700	108	83		
	Mandua, marua or ragi	1,100	900	800	108	83		
	Indian corn (maize) ...	3,400	4,000	3,000	108	83		
	Other *bhadoi* cereals ...	2,000	1,500	1,100	108	83		
	Other *bhadoi* pulses ...	2,000	1,500	1,200	108	83		
	Bhadoi fruits and vegetables, including root-crops.	2,000	1,800	1,800	100	83		
	Other *bhadoi* food-crops	3,700	4,000	3,700	100	83		
	Bhadoi fibres other than jute	800	1,000	800	108	100		
	Bhadoi non-food crops other than fodder and fibres.	1,200	1,800	1,200	100	82		
	Total ...	43,900	22,900	19,600	105	88		
MIDNAPORE.	*Bhadoi* paddy (autumn rice)	265,400	210,700	242,300			April to June. Normal.	The decrease in area under cereals, pulses, fruits and vegetables, and non-food crops was due to insufficient rainfall at sowing time. The increase on other heads was due to expansion of cultivation. The weather has not been favourable. The recent flood has damaged the crop by about ■ per cent.
	Jowar	800	500	600				
	Bajra	1,200	500	700				
	Indian corn (maize) ...	8,000	5,000	6,500				
	Indigo	100	...	...				
	Other *bhadoi* cereals ...	10,100	10,500	7,200				
	Other *bhadoi* pulses ...	29,200	3,400	1,800				
	Bhadoi fruits and vegetables, including root-crops.	26,000	7,800	6,300	83	67		
	Other *bhadoi* food-crops.	7,400	5,900	8,000				
	Bhadoi fodder crops other than jowar, bajra, marua and maize.	500	900	1,100				
	Bhadoi fibres other than jute.	1,100	1,600	800				
	Mulberry	400*	200	300				
	Bhadoi non-food crops other than fodder and fibres.	400	2,800	2,700				
	Total ...	350,700	284,600	278,300	83	67		
HOOGHLY.	*Bhadoi* paddy (autumn rice.)	45,800	27,100	29,200	90	88	Sadar subdivision—By the end of May and June. Normal. Serampur subdivision—By the end of June. Normal. Arambagh subdivision—By the end of May. Late.	The increase in area under *bhadoi* paddy is due to high price of food-stuffs and to bad harvest of winter paddy last year. The weather has not been favourable. There was want of rain at sowing time, but heavy rainfall afterwards has caused some damage. In the Arambagh subdivision the crops were damaged by heavy rain to the extent of about 50 per cent.
	Indian corn (maize) ...	200	100	100	80	117		
	Other *bhadoi* cereals ...	600	400	400	100	92		
	Other *bhadoi* pulses ...		200	200	100	100

			Last year.	This year.	Last year.	This year.		
		Acres.	Acres.	Acres.				
BOGRA.	*Bhadoi* paddy (autumn rice).	140,000	125,000	120,000	90	80	March to May. Normal.	The decrease in area is due to the fact that last year's area was especially large owing to failure of crops during the preceding year. The weather was favourable at sowing time, but subsequently it became unfavourable owing to absence of rain. Hence the outturn is below the normal.
	Jowar	...	100	100	90	80

DEPARTMENT OF AGRICULTURE, BENGAL.

First Forecast of the Winter Rice Crop of Bengal, 1920-21.

[Note.—On an average of the five years ending 1918-19, the area under Winter Rice in Bengal has represented some 19·7 per cent. of the total area under rice in British India.]

Two crops, agriculturally distinct, are returned in the winter rice forecasts, one the broadcasted deep-water rice found mostly in Eastern Bengal and sown from the beginning of March onwards, the other and more important crop being transplanted from seed-beds in July and August. Early rainfall (not sufficient to cause flooding) suits the sowing of the broadcast crop and of seed-beds for the transplanted varieties. Good general rainfall in July and August permits of a large area of the transplanted crop being planted, while plentiful showers in October secure a full crop in those districts where the soil is, on account of its high situation or of its comparative porosity, not ideally suitable for paddy cultivation. Both crops are harvested about the same time, the main crop being generally cut in December.

Character of the season.—The rainfall in February and March was in excess of the normal and was sufficient for the preparatory tillage. Operations, however, were hampered in many places owing to scantiness of rainfall in April, May and the first part of June. The sowing of broadcast winter paddy and of seeds in nurseries commenced from April. The long spell of drought that prevailed up till the first part of June retarded the germination and growth of the crop in many parts, especially on high lands in some West Bengal districts. Moderate rain that fell in the latter part of June and in July and the slow rise of rivers generally improved the growth of the broadcast crop, but proved insufficient for the transplantation, of seedlings in many places, especially in the northern and some western districts. The deficiency of rainfall in July was, however, made up by the sufficient rainfall in August when a large area was put under transplantation, and the prospects of the broadcast crop since then have improved greatly. Damage by excessive rain and flood is reported from parts of Jessore, Hooghly, Howrah, Bogra, Dinajpur and Tippera. The disastrous floods in the Midnapore district caused damage to the extent of about 2 annas. The outlook, on the whole, may be regarded as favourable.

Acreage.—According to the figures returned by district officers the total area under the winter rice crop is 15,319,500 acres, as compared with 15,379,400 and 15,606,100 acres in the corresponding and final forecasts of last year. The decrease is to be attributed chiefly to want of rain at sowing time.

Outturn.—From the summary of the district returns appended it will be seen that six districts expect a normal crop; sixteen districts report a crop between 75 to 94, and the remaining five districts return between 50 to 67 per cent. of the normal. According to the above estimates, the provincial outturn works out to 83 per cent. as against 89 per cent. of the normal respectively in the first and final forecasts of last year. The averaging of district estimates for the first forecast has, however, not always proved a trustworthy means of arriving at the real provincial figures, as most of the outturn figures are based on the assumption of weather conditions prevailing at the time the reports were sent in. There is still time for the outturn of the transplanted crop to be affected by weather, and as a matter of fact the heavy rainfall of mid-September has greatly benefited the crop.

G. EVANS,
Director of Agriculture, Bengal.

DACCA,
The 25th September 1920.

APPENDIX I.

First Forecast of the Winter Rice Crop of Bengal, 1920-21.

District.	Estimated normal area under winter rice.	Estimated area under winter rice.		Estimated outturn as a percentage of the normal yield per unit of area.		Date by which the sowing of broad casted winter rice commenced this year, and whether that date was early, normal or late.	Date by which the transplanting of winter rice commenced this year, and whether that date was early, normal or late.	Remarks by District Officers.
		Last year (1919-20.)	This year (1920-21.)	Last year.	This year.			
	Acres.	Acres.	Acres.					
24-Parganas ...	1,041,500	836,100	818,900	92	83	April ; normal	July ; normal	The decrease in area sown is due to want of timely rain. Though unfavourable at the beginning the weather has been favourable on the whole.
Nadia ...	186,800	180,100	165,200	67	67	April ; normal	July ; normal	The increase in area is due to the fact that this year's area is based on the actuals of the four thanas of the Sadar subdivision as furnished by the Settlement Officers for 1918. The weather was not favourable at the sowing time. The outturn is expected to fall below the normal for want of timely rainfall.
Murshidabad ...	351,400	316,700	290,900	83	83	Middle of June ; late.	Middle of August ; late.	The decrease in area is due to want of rain in the beginning which retarded the progress of transplantation, but conditions have now improved.
Jessore ...	468,100	455,800	459,100	[illegible]	83	April ; normal	Latter part of June and July ; rather late.	The increase in area is due to decrease in jute cultivation. The weather has been favourable for broad cast *aman* but rather unfavourable for the transplanted *aman*. About 3 annas of the crop have been damaged by flood in the Narail subdivision and 2 annas for want of rain in July.
Khulna ...	826,300	702,900	710,500	[illegible]	92	June ; normal	Middle of July ; normal.	The increase in area is due to favourable weather at the sowing time. Some damage has been done by drought in places.
Burdwan ...	874,800	736,000	667,700	[illegible]	83	Beginning of June to middle of August ; late.	Middle of July to middle of August ; late	The decrease in area shown is due to want of timely rainfall. The weather was not favourable at the outset but has subsequently been favourable.
Birbhum ...	604,600	601,500	563,000	92	75	June ; late ...	Latter part of July ; late.	The decrease in area sown is due to want of timely rainfall. The weather has not been very favourable. Hence the outturn is below the normal.
Bankura ...	510,600	525,000	525,000	125	100	.....	Middle of July ; late.	Monsoon commenced late. Good rainfall since the time of transplantion has helped the growth of the crop.
Midnapore ...	1,537,100	1,549,200	1,624,800	83	75	June ; normal	July and August ; late.	The drought at the beginning is likely to affect the growth of the crop to a certain extent. About 2 annas of the crop have been damaged by floods in the Tamluk and Ghatal subdivisions.
Hooghly ...	276,700	206,400	209,300	70	75	In Sadar subdivision, June and July ; late. In Serampur beginning of July ; normal. In Arambagh end of June ; late.	In Sadar, July and August ; late. In Serampur, middle of July ; normal. In Arambagh end of July ; late.	The increase in area sown is due to the high price of rice. Want of timely rain delayed transplantation in places and slight damage has also been caused by flood in the Arambagh subdivision.
Howrah ...	125,300	119,500	119,400	83	67	Middle of June ; normal.	Middle of July ; normal.	The weather at the sowing time was unfavourable owing to drought, and excessive rain later on caused some damage. Hence the low outturn.
Rajshahi ...	833,700*	696,200	650,000	92	83	April ; normal	Latter part of July ; normal.	The decrease in area as compared with that of last year is due to want of timely rainfall. For want of timely rain both the broadcast and transplanted paddy could not thrive. The fields have not been inundated ; hence the outturn is expected to fall below normal..
Dinajpur ...	1,120,300	1,029,000	784,500	80	58	...	Middle of August ; late.	The decrease in area sown is due to want of timely rainfall. The weather has not been favourable. Continued drought has hindered the transplantation. Hence the outturn is expected to be much below the normal.

* Revised on the basis of settlement records.

District.	Estimated normal area under winter rice.	Estimated area under winter rice.		Estimated outturn as a percentage of the normal yield per unit of area.		Date by which the sowing of broadcasted winter rice commenced this year, and whether that date was early, normal or late.	Date by which the transplanting of winter rice commenced this year, and whether that date was early, normal or late.	Remarks by District Officers.
		Last year (1919-20.)	This year (1920-21.)	Last year.	This year.			
	Acres.	Acres.	Acres.					
Jalpaiguri ...	488,700*	417,500	434,600	75	75	...	July; normal	The increase in area this year is due to the fact that this year's figure has been taken from the last settlement report. For want of sufficient rain, the outturn is expected to fall below the normal.
Darjeeling ...	65,200	35,600	35,600	100	100	April; normal	First week of July.	The weather has been favourable.
Rangpur ...	822,800	600,000	548,000	75	60	May; normal	Beginning of July; late.	The decrease in area sown is due to the scanty rainfall. The weather was unfavourable at first but has turned favourable since August. The transplantation is still going on.
Bogra ...	503,000	447,000	445,000	90	75	End of March; normal.	End of July; late.	Owing to want of rain during the period of growth and to flood in the eastern part of the district, the outturn is anticipated to fall below the normal.
Pabna ...	566,000	382,500	401,600	80	75	Latter part of April; late.	Middle of August; late.	The increase in area sown is due to high price of rice and to low price of jute. The weather was favourable at the sowing time but subsequently the continued drought retarded the growth of the crop. Later on the rainfall, however, has improved the prospects of the crop to some extent. About 3 annas of the crop have been damaged by drought and want of flood in some places.
Malda ...	336,200	303,000	296,300	117	60	Latter part of June; normal.	July; a little late.	The decrease in the area sown is due to want of timely rain. The weather was not favourable since sowing time up till the latter part of August. Scanty rain till August retarded the transplantation and growth of the crop. Hence the low outturn.
Dacca ...	647,900	655,300	659,300	85	100	End of March to April; normal.	July; normal	The increase in area is due to the decrease in the area under jute. The weather has been favourable for the growth of the crop.
Mymensingh ...	1,136,700	969,700	969,700	93	80	First part of April; normal.	End of July; normal.	The weather has not been favourable. More rain was wanted during the sowing time, and the crop has not therefore thriven well. Roughly estimated, about 20 per cent. of the crop has been affected by drought.
Faridpur ...	770,100	734,100	745,200	68	94	March and beginning of April; normal.	...	The increase in the area sown is due to decrease in area under jute. The growth of the crop has been affected by insufficient rain.
Bakarganj ...	1,200,000	1,342,500	1,346,100	125	100	April and May; normal.	End of July; a little late.	The increase in area sown is due to reclamation of the Sundarbans. The weather was favourable at the sowing time but insufficient rain in July and August has affected the growth of the young seedlings and declared the transplantation which is still going on. The outturn is expected to be normal.
Chittagong ...	418,400	420,600	421,300	92	100	May to July; normal.	July to August normal.	The increase in area sown is due to the extension of cultivation. The weather has been favourable. The outturn is expected to be normal.
Tippera ...	724,800	806,500	786,500	92	75	April; normal.	August; normal.	The weather was dry at the time of sowing but now it has turned favourable. Some damage has been done to the crop by sudden rise of water owing to heavy rainfall.
Noakhali ...	610,000	600,000	630,000	85	100	Ditto ...	July and August; normal.	The increase in the area sown is due to decrease in the jute area. Weather was unfavourable at the time of sowing but subsequently the rainfall has improved the prospects of the crop.
Chittagong Hill Tracts.	47,600	46,000	45,000	56	50	Last week of July; late.	Last week of August; late.	The decrease in area sown is due to unfavourable weather and insufficient rainfall. The weather at present is favourable.
Total Bengal ...	16,907,800	15,406,100	15,319,600	89	83			

*Revised on the basis of the average of last five years.

N.B.—As the weekly statement has been introduced from the 10th January 1920 according to Government of Bengal, Municipal Department, letter No. 1258San., dated the 20th December 1919, the figures for the column "Total of corresponding week of the previous year" are not available and therefore this column is omitted from the statement.

* Including deaths from Influenza.

CALCUTTA,
The 1st October 1920.

CHAS. A. BENTLEY,
Sanitary Commissioner for Bengal.

DEPARTMENT OF STATISTICS, INDIA.

CALCUTTA TRADE FLUCTUATIONS.

THE following tables are intended to show the trade by all routes, *i.e.*, by rail, river, canal, road, and sea, of the Calcutta block* in certain selected articles during the months of April to July, 1920, as compared with the corresponding period of 1919 and 1918. The statistics have been compiled from returns furnished by the Collector of Customs, Calcutta, Railway Audit Offices, Steamer Companies, the Commissioners for the Port of Calcutta, the Collectors of the 24-Parganas and Howrah, and the Assistant Engineer, Calcutta Canals.

General Summary.

Imports.—The imports of rice, including paddy†, into Calcutta by rail, river, canal, road, and sea (coastwise) during the months of April to July, 1920, amounted to 3,690,000 maunds, as against 8,119,000 maunds in the corresponding period of the preceding year,—a decrease of 54 per cent. There was an increase of 29 per cent in the imports of coal and coke (43,028,000 maunds as against 33,381,000 maunds last year). The imports by rail, river, road, and sea (coastwise) of Indian cotton piecegoods showed an increase of 28 per cent, the total value amounting to Rs. 396 lakhs as against Rs. 310 lakhs in 1919. The quantity of indigo imported during the months of April to July, 1920, increased from 972 maunds to 3,108 maunds. The imports of raw jute amounted to 1,263,000 bales as against 868,000 bales—an increase of 45 per cent. The importations of gunny bags also showed an increase from 128 million bags to 167 millions. The total imports of oilseeds (linseed and rape and mustard seed) decreased by 10 per cent from 3,728,000 maunds to 3,352,000 maunds. The imports of sugar increased by 60 per cent from 201,000 maunds to 322,000 maunds and those of tea decreased by 25 per cent from 726,000 maunds to 542,000 maunds.

Exports.—The value of the exports of cotton piecegoods, foreign, from Calcutta by all routes during the months of April to July, 1920, Rs. 873 lakhs was almost the same as in the corresponding period of the preceding year. The exports of gunny bags (including the exports by sea to foreign countries) increased from 354 million bags to 457 millions; the shipments of gunny bags to other Indian ports also showed an increase from 14 to 17 millions in number in the period under review. The quantity of kerosene oil despatched from Calcutta and Budge-Budge by internal routes and by sea (coastwise) increased from 1,873,000 maunds to 1,875,000 maunds.

* The Calcutta block consists of the town of Calcutta with Howrah and Kidderpore Docks.
† One maund of paddy is equivalent to 25 seers of rice.

TABLE I

DEPARTMENT OF STATISTICS, INDIA,
October 2, 1920.

D. N. GHOSH,
Offg. Director of Statistics.

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 30th September 1920.

Summary.—During the week light scattered showers fell over the greater part of the province. More rain is urgently needed in West Bengal for winter paddy. Elsewhere prospects, so far, are generally reported to be satisfactory. Flood-water has subsided rapidly in North Bengal. The extent of damage was not so great as was anticipated. Preparatory tillage for spring crops has commenced in certain districts. The average price of common rice for the province has fallen by about 1·9 per cent. as compared with that of the previous week.

Serial No.	District and subdivision.	Rainfall.	Price of common rice, in seers per rupee.		Character of the weather, condition of crops, etc.
			This week.	Previous week.

RESOLUTION ON THE ANNUAL REPORTS OF THE VETERINARY COLLEGE AND OF THE CIVIL VETERINARY DEPARTMENT, BENGAL, FOR THE YEAR 1919-20.

GOVERNMENT OF BENGAL.

REVENUE DEPARTMENT.

Agriculture.

CALCUTTA, THE 9TH OCTOBER 1920.

RESOLUTION—No. 9179Agri.

READ—

The annual reports of the Veterinary College and of the Civil Veterinary Department, Bengal, for the year 1919-20.

COLONEL A. SMITH, Principal, Bengal Veterinary College, held charge of the College throughout the year. Mr. P. J. Kerr joined the College as Second Imperial Officer towards the close of the year on the 26th March 1920. Colonel A. Smith also held charge of the Civil Veterinary Department on

account of the absence of the Superintendent on deputation to military duty, up to the 20th July 1919, when he was relieved of his additional duties by Mr. A. D. MacGregor.

2. The number of students at the Bengal Veterinary College at the end of the session was 158, of which number 64 belonged to Bengal, 56 to Bihar and Orissa and the rest to other provinces. Owing to 14 students leaving the College, there was a slight fall in the number of students, as compared with the preceding year's figure, which was 165; but there was a larger number of better qualified students. During the year 32 students graduated from the College, of whom nine belonged to Bengal. All the new graduates have been employed as veterinary assistants.

3. Though too much importance should not be attached to the comparison, the report of the Civil Veterinary Department shows a small decrease in the mortality of animals from contagious diseases during the year, the total number of deaths reported being 14,898 as against 15,569 in the previous year. There was, however, a noticeable increase in mortality from rinderpest, the number of deaths from which was 12,178 as against 10,772 in the previous year. This increase is primarily due to heavy outbreaks in the Tippera district. There were in all 537 outbreaks of rinderpest, hæmorrhagic septicæmia, and anthrax and 84,896 animals were inoculated as against 67,083 animals in 426 outbreaks in the previous year. The death-rate amongst the inoculated was only ·4 for the whole province; on the other hand seventeen times as many uninoculated animals died during the outbreaks. Leaflets dealing with the prevention and treatment of cattle diseases were freely distributed. The Governor in Council notices with satisfaction that the Superintendent, Civil Veterinary Department, is taking keen interest in the matter and is explaining more practical methods of work to veterinary assistants so that they may make themselves more useful to the people. Steps have also been taken to improve the agency for reporting outbreaks.

4. During the year under report the itinerant veterinary assistants visited 12,831 villages and treated 58,761 animals as against 13,462 villages and 58,025 animals in the previous year.

5. In Calcutta and its suburbs all the stables and cattle-sheds were regularly inspected. Glanders and farcy were detected in 30 stables and surra in 2, against 13 and 4, respectively, in the previous year. In the mufassal 7 deaths from glanders were reported as against 17 in the previous year.

6. The number of stud bulls kept by Government and local bodies increased from 104 in the previous year to 124 in the year under report. Of these 57 are the property of local bodies. The Governor in Council notices with satisfaction that a record is now being kept by the veterinary assistants of the services of stud bulls and of their results.

7. Four new dispensaries were established during the year, thus bringing the total number of such institutions up to 35 whilst it is satisfactory to note that other dispensaries are under contemplation. The number of patients treated at these dispensaries was 44,747 as against 43,312 in the previous year.

8. In accordance with paragraph 8 of the resolution on the last year's report, veterinary sub-committees were appointed in some districts: the scheme will be tried throughout the province in the current year. It is hoped that the members of the sub-committees will take an active interest in the work and thus prove their utility in dealing with the veterinary work of the districts.

9. The work of the Deputy Superintendent, Civil Veterinary Department, Veterinary Inspectors and the staff of the Bengal Veterinary College continued to be satisfactory.

His Excellency in Council has much pleasure in acknowledging the valuable services of Colonel Smith and in recording his appreciation of the work done by Mr. A. D. MacGregor.

By order of the Governor in Council,

M. C. McALPIN,

Secy. to the Govt. of Bengal.

REORGANISATION OF THE SUBORDINATE EDUCATIONAL SERVICE.

GENERAL DEPARTMENT

Education.

CALCUTTA, THE 9TH OCTOBER 1920.

RESOLUTION—No. 872T.-Edn.

THE Governor in Council is pleased to appoint the following Committee :—

(*1*) to examine and report upon the present pay and prospects of officers of the Education Department below the Provincial Educational Service, viz., the Subordinate Educational Service, the Lower Subordinate Educational Service, the vernacular teachers' service and the subordinate ungraded officers of the Education Department ; and

(*2*) to recommend such changes of organization and of pay as they may consider desirable, with special reference to the question whether the present graded system should be retained or a time-scale of pay should be introduced :—

Mr. W. C. Wordsworth, Principal, Presidency College, Calcutta	*President.*
Mr. J. W. Gunn, officiating Director of Public Instruction, Bengal	*Members.*
The Hon'ble Babu Kishori Mohan Chaudhuri	
The Hon'ble Khan Sahib Aman Ali ...	
Babu Heramba Chandra Maitra, Principal, City College, Calcutta	
Babu Kausik Nath Bhattacharji, Lecturer, Rajshahi College (of the Subordinate Educational Service)	
Rai Surendra Nath Sinha Bahadur, officiating Assistant Director of Public Instruction, Bengal	*Member and Secretary.*

2. The Committee is requested to submit their report by the 1st May 1921. All communications and memorials should be addressed to the Secretary to the Committee at Writers' Buildings, Calcutta.

By order of the Governor in Council,

L. S. S. O'MALLEY.
Secy. to the Govt. of Bengal.

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 7th October 1920.

Summary.—During the week, moderate rain fell over the greater part of North and East Bengal. Elsewhere the fall was generally light. The October rainfall, which is the mainstay of the winter paddy crop, is urgently needed, especially in West Bengal. The prospects of deep-water paddy are generally promising and those of transplanted paddy are fair. Preparation of lands for and sowing of pulses continues in certain districts. The average price of common rice for the province has fallen by about 0·87 per cent. as compared with that of the previous week.

DEPARTMENT OF AGRICULTURE, BENGAL.

Second Forecast of the Sugarcane Crop of Bengal, 1920-21.

[Note.—On an average of the five years ending 1918-19, the area under sugarcane in Bengal has represented some 8·7 per cent of the total area under sugarcane in British India.]

Character of the season.—As stated in the first forecast, the weather at planting time was favourable only in the eastern districts. The drought that prevailed from the months of April to the first part of June affected the growth of the crop to some extent especially in some western and northern districts. Subsequent rainfall proved very beneficial and the present prospects are reported to be favourable on the whole. Damage by drought is reported from the districts of Nadia and Pabna and by flood and heavy rain from parts of Midnapore only.

Acreage.—The total area planted with sugarcane for the province is reported to be 219,500 acres this year, against 218,600 acres and 217,900 acres reported in the corresponding and final forecast of last year.

Outturn.—According to the estimates of District Officers, the Provincial outturn works out to 90 per cent of the normal against 88 and 89 reported respectively in the corresponding and final forecasts of last year.

G. EVANS,
Director of Agriculture, Bengal.

APPENDIX.

Second forecast of the sugarcane crop of Bengal, 1920-21.

District.	Estimated normal area under sugarcane.	Estimated area under sugarcane.		Taking 100 to represent the normal, what would be the average outturn per acre cropped.		Date by which the planting of setts generally commenced this year, and whether that date was early, normal or late.	Remarks by District Officers.
		Last year.	This year.	Last year.	This year.		
1	2	3	4	5	6	7	8
	Acres.	Acres.	Acres.				
24-Parganas ...	5,000	4,300	4,700	100	97	April. Normal ...	The increase in area is due to the high price of sugar and to timely rainfall. The weather has been favourable on the whole.
Nadia ...	7,900	6,100	6,200	[illegible]	67	January to February. Normal.	The weather has been favourable and its effects on the growth of the crop have been fair. The outturn is low on account of the general deterioration of the soil.
Murshidabad ...	3,600	2,800	2,900	83	75	November to May. Normal.	The increase in area is due to high price of *gur* and sugar. The weather was fair at planting time, but subsequent drought affected the growth of the crop to a certain extent. Copious rainfall afterwards, however, has improved the condition of the crop.
Jessore	3,900	3,100	2,900	75	92	February and March. Normal.	The character of weather has been good and its effects on the growth of the crop have been favourable.
Khulna	1,500	1,000	1,100	75	75	February. Normal ...	The character of weather and its effects on the growth of the crop have been favourable since the submission of the first forecast.
Burdwan	25,800	18,100	18,800	43	92	April to May. Normal.	The increase in area was due to favourable weather at planting time in Kalna and also to high price of sugar. The weather was fair at planting time but has now been favourable.
Birbhum	9,000	11,000	9,000	100	75	May. Normal ...	The decrease in area was due to want of rain at planting time. Subsequently the weather has been favourable.
Bankura	15,000	10,500	11,000	117	117	End of May. Late ...	The weather and its effects on the growth of the crop have been good.
Midnapore	6,500	4,200	6,200	83	80	March and April. Normal.	The increase in area is due to extension of cultivation owing to high price of sugar. The weather has not been favourable owing to drought at planting time and to heavy rainfall afterwards. Recent floods have caused some damage.
Hooghly	7,200	4,900	4,900	94	75	Serampur and Arambagh. March. Normal. Sadar. Beginning of April. Normal.	The weather was unfavourable at planting time owing to want of rain but it is now favourable in the Sadar and Serampur subdivisions. In Arambagh subdivision the weather is reported to be unfavourable.
Howrah	6,500	5,200	5,000	88	83	Middle of January. Normal.	The weather was not favourable at planting time but has subsequently been favourable on the whole.
Rajshahi ...	7,500	13,300	6,600	75	88	End of January. Normal.	The weather has been fair.
Dinajpur	25,000	30,600	31,000	87·5	81	January to March. Normal.	The increase in area is due to high price of sugar. The weather was not very favourable at the beginning for want of timely rain which retarded the growth of the crop. Subsequent rainfall has improved the condition of the crop a little.
Jalpaiguri	3,900*	3,700	3,800	88	83	First week of December. Normal.	The weather has been fair.
Darjeeling	200	200	200	83	83	February. Normal ...	The weather and its effects on the growth of the crop have been fair.
Rangpur	20,500	13,600	14,100	100	100	From the latter part of February. Normal.	The increase in area is due to high price of sugar. The weather and its effects on the growth of the crop have been favourable.
Bogra	5,000	4,300	4,500	92	90	March and April. Normal.	The increase in area is due to high price of *gur*. The weather was favourable at the beginning, but want of rain subsequently retarded the growth of the crop. The weather has again been favourable but the outturn is still expected to be below the normal.

* Revised.

District.	Estimated normal area under sugarcane.	Estimated area under sugarcane.		Taking 100 to represent the normal, what would be the average outturn per acre cropped.		Date by which the planting of setts generally commenced this year, and whether that date was early, normal or late.	Remarks by District Officers.
		Last year.	This year.	Last year.	This year.		
1	2	3	4	5	6	7	8
	Acres.	Acres.	Acres.				
Pabna	10,000	4,600	4,700	55	65	Middle of April. Normal.	The weather was dry at planting time but is now favourable.
Malda	300	300	300	100	100	Ditto ...	The weather was dry at the time of planting. Subsequently the weather has been favourable. A normal outturn is expected.
Dacca	21,100	23,700	24,100	75	99	February to April. Late.	The increase in area is due to high price of sugar and molasses. The weather has been favourable and its effects on the growth of the crop have been good.
Mymensingh ...	11,100	10,300	10,300	108	80	January to March. Normal.	The weather has been generally favourable.
Faridpur	7,100	7,400	7,400	85	90	February. Normal ...	The weather was favourable at the time of planting but has been unfavourable afterwards owing to heavy rain which has caused some damages.
Bakarganj	11,000	22,000	25,000	108	100	January and February. Normal.	The increase in area is due to high price of *gur* and sugar. At planting time the weather was favourable but was unfavourable later on for some time owing to drought. It has now been favourable and the growth of the crop is good. A normal outturn is expected.
Chittagong	6,400	6,000	6,400	100	100	.....	The weather and its effects on the growth of the crop have been favourable.
Tippera	8,000	6,000	8,000	75	100	March. Normal ...	The weather has been good and its effects on the growth of the crop have been favourable.

Monthly Weather and Crop Report of Bengal for the month of September 1920.

Character of the season.—During the month under report the rainfall was above the normal in the eastern and northern districts; elsewhere the fall was defective. The fall was markedly in excess in Dinajpur, Jalpaiguri, Rangpur, Malda, Dacca, Noakhali and Cooch-Behar. The usual rainfall statement is appended.

2. **Progress of agricultural operations.**—Good rainfall during the earlier part of the month facilitated the transplantation of winter paddy all over the Presidency, especially in the northern and eastern districts. More rain, however, was needed in the western districts. The weeding of winter paddy and the cutting, steeping and washing of jute were in progress. The harvesting of autumn paddy was completed in the districts of Eastern and Northern Bengal, but it was still in progress in some of the districts of Western Bengal. Preparatory tillage for the next spring crops commenced in some districts during the latter part of the month.

3. **State of standing crops.**—The condition of deep water winter paddy and sugarcane was satisfactory and that of transplanted paddy was reported to be fair.

4. **Prospects and probable outturn.**—The present outlook of winter paddy was reported to be promising in almost all the districts of Eastern and Northern Bengal, but in the Western Bengal districts, especially in Nadia, Murshidabad, Jessore, Burdwan, Birbhum and Midnapur rain was badly wanted for the growth of the crop. The outturn of autumn paddy is anticipated to be 85 per cent of the normal.

5. **Damage to standing crops.**—Slight damage to jute and other standing crops by insect-pests was reported from places in Nadia, Jessore and Hooghly. Some damage to winter paddy, specially in the lowlying tracts, was caused by flood and excessive rainfall in Rajshahi, Dinajpur, Rangpur, Bogra, Mymensingh and Tippera. The extent of the damage done was not serious.

6. **Condition of agricultural stock.**—Sporadic cases of cattle disease were reported from nine districts.

7. **Failure of pasturage and fodder.**—There was sufficient fodder in all the districts and no scarcity was felt anywhere.

8. **Prices of food-grains.**—During the second half of the month under review the price of common rice of the cheapest quality rose in six districts, fell in 15 and remained stationary in others. It ranged from 4 seers 8 chittaks per rupee at Darjeeling to 6 seers 8 chittaks in the Chittagong Hill Tracts.

9. **Condition of agricultural population.**—The condition of the agricultural population was fair.

DARJEELING,
The 13th October 1920.

G. EVANS,
Director of Agriculture, Bengal.

LIBERALITY OF BABU JATINDRA NATH GHOSH OF BILSORA.

No. 1851-Medl., dated Calcutta, the 3rd September 1920.

From—R. Douglas, Esq., I.C.S., Under-Secretary to the Government of Bengal, Finance Department,

To—The Commissioner of the Burdwan Division.

With reference to your letter No. 385-J. G., dated the 22nd July 1920, addressed to the Secretary to this Government, Municipal Department, in which you report that Babu Jatindra Nath Ghosh of Bilsora, in the district of Hooghly, has made a donation of Rs. 60,000, in Government promissory notes to meet the entire cost of maintenance of the charitable dispensary at that place, I am directed to request that you will be so good as to convey to him the thanks of Government for his liberality and public spirit.

LIBERALITY OF BABU SATISH CHANDRA CHAUDHURI.

No. 735T.—Medl., dated Darjeeling, the 9th October 1920.

From—The Hon'ble Mr. A. Marr, I.C.S., Secy. to the Govt. of Bengal, Financial Department.

To—The Commissioner of the Dacca Division.

I am directed to refer to the correspondence ending with your memorandum No. 4986J., dated the 17th September 1920, reporting that Babu Satish Chandra Chaudhuri, of Nagarpur, in the district of Mymensingh, has made a donation of Rs. 1,25,000 in Government Promissory Notes for the maintenance of a hospital at that place and to request that you will be so good as to convey to him the thanks of Government for his liberality and public spirit.

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 14th October 1920.

Summary.—During the early part of the week heavy rain fell over the greater part of the province improving the prospects of winter paddy generally. Preparatory tillage for the spring crops is proceeding. Sowing of pulses and early oilseeds has commenced in some districts. The average price of common rice for the province has fallen by about 0·51 per cent., as compared with that of the previous week.

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 21st October 1920.

Summary.—During the week light scattered showers fell in a number of places. Rain is urgently needed for the late transplanted paddy in some districts of West Bengal. Preparation of lands for and sowing of spring crops are proceeding favourably. The prospects of winter paddy are generally reported to be favourable. The average price of common rice for the province has fallen by about 0·32 per cent. as compared with that of the previous week.

CONSTITUTION OF A COMMITTEE FOR THE SELECTION OF CANDIDATES FOR APPOINTMENT TO THE INDIAN EDUCATIONAL SERVICE AND PROVINCIAL EDUCATIONAL SERVICE IN THE BENGAL PRESIDENCY.

GOVERNMENT OF BENGAL.

GENERAL DEPARTMENT.

Education.

DARJEELING, THE 26TH OCTOBER 1920.

RESOLUTION—No. 965T.Edn.

THE Public Services Commission (1916) recommended that selection committees consisting of five members (three officials and two non-officials), of whom two should be Indians, should be constituted in each province to advise the local Government on the selection of candidates for direct appointment in India to the higher branches of the educational service. They also

suggested that in the case of appointments requiring technical qualifications the committee should have power to co-opt or consult specialists. These recommendations have been approved by the Government of India and the Secretary of State.

2. The Governor in Council is accordingly pleased to appoint a selection committee whose duty it will be to recommend candidates for appointment to the Indian Educational Service and Provincial Educational Service. The committee will consist of the following :—

Chairman.

The Director of Public Instruction, Bengal (*ex officio*).

Members.

The Vice-Chancellor, Calcutta University (*ex officio*).

The Vice-Chancellor, Dacca University (*ex officio*).

DEPARTMENT OF STATISTICS, INDIA.

CALCUTTA TRADE FLUCTUATIONS.

THE following tables are intended to show the trade by all routes, *i.e.*, by rail, river, canal, road, and sea, of the Calcutta block* in certain selected articles during the months of April to August, 1920, as compared with the corresponding period of 1919 and 1918. The statistics have been compiled from returns furnished by the Collector of Customs, Calcutta, Railway Audit Offices, Steamer Companies, the Commissioners for the Port of Calcutta, the Collectors of the 24-Parganas and Howrah, and the Assistant Engineer, Calcutta Canals.

General Summary.

Imports.—The imports of rice, including paddy†, into Calcutta* by rail, river, canal, road, and sea (coastwise) during the months of April to August, 1920, amounted to 4,471,000 maunds, as against 9,510,000 maunds in the corresponding period of the preceding year—a decrease of 53 per cent. There was an increase of 32 per cent in the imports of coal and coke (55,270,000 maunds as against 41,791,000 maunds last year). The imports by rail, river, road, and sea (coastwise) of Indian cotton piecegoods showed an increase of 16 per cent, the total value amounting to Rs. 4,66 lakhs as against Rs. 4,03 lakhs in 1919. The quantity of indigo imported during the months of April to August, 1920, increased from 1,431 maunds to 3,124 maunds. The imports of raw jute amounted to 1,733,000 bales as against 1,219,000 bales—an increase of 42 per cent. The importations of gunny bags also showed an increase from 169 million bags to 209 millions. The total imports of oilseeds (linseed and rape and mustard seed) decreased by 9 per cent from 4,369,000 maunds to 3,978,000 maunds. The imports of sugar increased by 81 per cent from 235,000 maunds to 425,000 maunds, while those of tea decreased by 17 per cent from 1,084,000 maunds to 897,000 maunds.

Exports.—The value of the exports of cotton piecegoods, foreign, from Calcutta by all routes during the months of April to August, 1920, increased by 5 per cent (Rs 10,29 lakhs as against Rs 9,77 lakhs last year). The exports of gunny bags (including the exports by sea to foreign countries) increased from 439 million bags to 591 millions; the shipments of gunny bags to other Indian ports also showed an increase from 16 to 19 millions in number in the period under review. The quantity of kerosene oil despatched from Calcutta and Budge-Budge by internal routes and by sea (coastwise) decreased from 2,390,000 maunds to 2,310,000 maunds.

* The Calcutta block consists of the town of Calcutta with Howrah and Kidderpore Docks.
† One maund of paddy is equivalent to 25 seers of rice.

TABLE I

Trade of Calcutta in certain selected articles in the five months, April to August, 1920, compared with the corresponding months of 1919.

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 28th October 1920.

Summary.—During the week light scattered showers fell generally in North Bengal; elsewhere the fall was limited to a number of places. Some rain would still be beneficial to the late transplanted paddy in parts of West Bengal. Ploughing of fields for spring crops and their sowings are proceeding. Reaping of early winter paddy has commenced. The prospects of winter paddy are satisfactory in North and East Bengal and fair in West Bengal. The average price of common rice for the province has fallen by about 0·74 per cent. as compared with that of the previous week.

Serial No.	District and subdivision.	Rainfall.	Price of common rice, in seers per rupee.		Character of the weather, condition of crops, etc.

REPORT ON THE ADMINISTRATION OF THE STAMP DEPARTMENT FOR THE TRIENNIUM ENDING THE 31ST MARCH 1920.

NOTIFICATION.

No. 3180S.R.—The 5th November 1920.—The following extracts from the report on the Administration of the Stamp Department for the triennium ending the 31st March 1920 are published for general information.

A. MARR,
Secy. to the Govt. of Bengal.

No. 389-T.S.R., dated Darjeeling, the 18th October 1920.

From—The Hon'ble MR. A. MARR, I.C.S., Secretary to the Government of Bengal, Financial Department,

To—The Secretary to the Government of India, Finance Department.

I AM directed to submit, for the information of the Government of India, the following report on the administration of the Stamp Department during the three years ending the 31st March 1920.

* * * * *

Financial Results.

3. The receipts, which in 1916-17, the last year of the preceding triennium, were Rs. 2,46,13,496, fell to Rs. 2,35,02,730 in 1917-18, but rose to Rs. 2,59,31,580 in 1918-19. During the last year of the period under review, the receipts, as reported by the Accountant-General, Bengal, *plus* Rs. 12,57,818 paid to the Calcutta Improvement Trust, being the collection of the increased stamp duty leviable under section 82 of the Calcutta Improvement Trust Act, 1911, and also Rs. 4,99,000, the provincial share of the sale-proceeds of unified stamps credited to non-postal revenues, amounted to Rs. 3,13,15,702, an increase of Rs. 53,84,122, or 20·7 per cent., as compared with those of 1918-19, and of Rs. 78,12,972, or 33·2 per cent., over those of 1917-18. The increase occurred both under judicial and non-judicial stamps.

* * * * *

A.—Judicial Stamps.

5. The sale-proceeds of court-fee stamps (excluding stamps for copies) rose steadily during the past three years. The receipts during 1919-20 were Rs. 1,78,21,873 against Rs. 1,66,78,415 in 1918-19, and Rs. 1,54,64,461 in 1917-18. Compared with 1918-19, there was an increase in 1919-20 of Rs. 11,43,458, which was shared by all the divisions. The largest increase, Rs. 6,02,747, was contributed by the Presidency Division owing, it is said, to the increase in litigation and to the commencement of settlement operations in Nadia, Murshidabad and Jessore. The receipts from the sale of stamps for copies fell from Rs. 7,25,815 in 1917-18 to Rs. 6,90,337 in 1918-19, but rose to Rs. 7,36,934 in 1919-20. The receipts from the sale of plain paper rose from Rs. 3,46,213 in 1917-18 to Rs. 3,55,467 in 1918-19, and to Rs. 3,81,197 in 1919-20.

B.—Non-Judicial Stamps.

6. The revenue derived from the sale of non-judicial stamps during 1919-20 showed an increase of Rs. 41,71,382, or 50·8 per cent., as compared with 1918-19, and of Rs. 54,12,500, or 77·7 per cent., over that of the first year of the triennium. The increase was shared by all classes of stamps.

7. **Impressed stamps.**—The receipts from the sale of impressed stamps (the most important item among non-judicial stamps) showed a progressive increase during the past three years. The revenue, which amounted to Rs. 34,64,819 in 1917-18, rose to Rs. 37,26,258 in 1918-19 and to Rs. 50,88,970 in 1919-20. The growth in revenue was shared by all the divisions. The increases in the districts of the 24-Parganas and Calcutta are noticeable, being 92·2 and 107·5 per cent., respectively, in 1919-20, over the receipts of 1917-18. The increase in the former district is ascribed partly to the sale of land at a

high price by the Calcutta Improvement Trust to the public, and partly to the purchase of land by mill-owners and speculators. In Calcutta, it is ascribed to a large number of transfers of moveable properties owing to the prosperous condition of trade, as well as to the issue of a large number of mining and other leases. In other districts, the increase is attributed generally to the execution of a large number of sale and mortgage deeds owing to the high prices of foodstuffs, cloth and other necessaries of life.

8. **Hundis or inland bills-of-exchange.**—The revenue derived from the sale of hundi or bill of exchange stamps fell from Rs. 1,89,691 in 1917-18 to Rs. 1,76,776 in 1918-19, but rose to Rs. 2,88,930 in 1919-20, out of which Calcutta contributed Rs. 2,72,121 against Rs. 1,77,663 in 1917-18 and Rs. 1,62,020 in 1918-19. The increase in Calcutta is attributed to the fact that business among Indian traders, specially Marwaris, returned to more normal conditions after the war.

9. **Impressed labels or special adhesive stamps.**—The receipts from the sale of these stamps showed a progressive increase during the past three years. The receipts, which amounted to Rs. 16,15,793 in 1917-18, rose to Rs. 24,12,873 in 1918-19 and to Rs. 44,54,096 in 1919-20. These stamps are used principally in Calcutta, where the receipts during 1919-20 showed an increase of 84·7 per cent. as compared with those of 1918-19 and of 175·7 per cent. over those of 1917-18. The increase is attributed to trade activity after the war.

10. **Foreign bill stamps.**—The receipts from these stamps, which are sold mainly in Calcutta, amounted, in 1919-20, to Rs. 3,17,692 and exceeded those of the preceding two years by Rs. 45,846 and Rs. 1,35,453, or 16·8 and 74·3 per cent., respectively. The increase is due to increased activity in foreign trade which has occurred after peace was declared.

11. **Share transfer stamps.**—Sales of these stamps, which are used for the payment of stamp duty on transfers of shares of public companies, are practically confined to Calcutta. The revenue rose from Rs. 5,79,646 in 1917-18 to Rs. 6,74,778 in 1918-19 and to Rs. 11,48,112 in 1919-20. This remarkable increase is attributed to a general improvement in trade and to continued speculation, specially in jute mill shares.

12. **Stamps for legal practitioners' licenses.**—The receipts from the sale of these stamps during 1919-20 were Rs. 1,42,302, showing an increase of Rs. 5,664 and Rs. 6,037 over the receipts of the years 1918-19 and 1917-18, respectively.

13. **Notarial stamps.**—These stamps were sold only in Calcutta and Chittagong during 1919-20. The sales of the year amounted to Rs. 2,264, in comparison with Rs. 2,025 and Rs. 1,177 in the previous two years.

14. **Forms for agreements and contracts chargeable with two-anna coloured impressions.**—The income from this source rose from Rs. 3,606 in 1917-18 to Rs. 4,127 in 1918-19 and to Rs. 6,508 in 1919-20.

15. **Forms for cheques and receipts.**—The sale of these forms, which are stamped with one-anna coloured impressions, brought in Rs. 2,83,044 during 1919-20, which exceeded the receipts of the previous two years by Rs. 67,882 and Rs. 69,187, or by 31·5 and 32·4 per cent., respectively. The increase occurred chiefly in Calcutta, and is due to the opening of new banks and other activities as well as to the growing tendency of Indian traders in the town to adopt this method of stamping bills and receipts instead of affixing unified stamps.

16 **Miscellaneous receipts.**—The receipts under this head were mainly composed of realizations under section 35 and sections 32, 37, 40 and 41 of the Indian Stamp Act, 1899. The income from these sources rose from Rs. 80,148 in 1917-18 to Rs. 87,876 in 1918-19 and to Rs. 1,47,823 in 1919-20. The increase occurred mainly in Calcutta.

Arrangements for the sale of stamps.

17. * The total number of vendors engaged in the sale of judicial and non-judicial stamps during the year 1919-20 was 5,235 against 5,234 and 5,311 in the previous two years. The expenditure on discounts allowed to stamp vendors during 1919-20 was Rs. 4,42,148, which exceeded that of the previous two years by Rs. 82,404 and Rs. 97,262, respectively. The increase, which occurred in all the divisions, was due to the rise in the sale of judicial and non-judicial stamps. The average discount per vendor during the triennium under report was Rs. 73 against Rs. 68 in the preceding period.

* * * * *

Punitive action of the Courts and Revenue officers.

18. * The total number of cases dealt with by the Civil Courts decreased from 2,280 in 1917-18 to 2,128 in 1918-19 and to 1,891 in the last year of the triennium. The duty and penalty realized by the Civil Courts also declined from Rs. 16,264 in 1917-18 to Rs. 13,946 in 1918-19 and to Rs. 12,853 in 1919-20. There was an increase of 533 in the number of cases decided and of Rs. 8,216 in the duty and penalty realized by Revenue officers in 1919-20 as compared with the figures of the preceding year and of 416 and Rs. 21,100, respectively, as compared with the figures of 1917-18.

19. * The number of cases instituted in 1919-20 was 346, in which 375 persons were brought to trial against 219 and 242 in 1918-19 and 272 and 305 in 1917-18. Compared with the year 1918-19, the number of prosecutions in 1919-20 rose in all divisions. The fines imposed during the last year of the triennium amounted to Rs. 2,644 against Rs. 2,227 in 1918-19 and Rs. 3,415 in 1917-18. The amount paid in rewards in 1919-20 was Rs. 841, showing a decrease, as compared with the previous two years, of Rs. 454 and Rs. 238, respectively. No rewards were paid outside Calcutta.

Working of section 19-H added to the Court-fees Act, VII of 1870, by Act XI of 1899.

20. * The number of cases pending at the beginning of the year 1919-20 was 649 against 535 and 591 in the previous two years respectively. The number of cases reported to the Collector showed a gradual increase from 1,456 in 1917-18 to 1,540 in 1918-19 and to 1,762 in 1919-20. The number of cases in which enquiries were instituted during 1919-20 was 2,165 showing an increase, as compared with the previous two years, of 422 and 427, respectively. The number of enquiries completed during 1919-20 was 1,430 against 1,326 and 1,445 in the previous two years. The amount of deficit court-fees realized fell from Rs. 1,18,332 in 1917-18 to Rs. 88,98[illegible] in 1918-19 and to Rs. 80,070 in the last year of the triennium. Of the cases reported during 1919-20, including those pending at the beginning of the year, 58·6 per cent. were completely enquiried into, the corresponding percentages in the preceding two years being 63·9 and 70·6, respectively. The proportion borne by the deficit duty required to the amount originally realized was 11·7 in 1919-20 and 12·9 and 12·3 in the preceding two years. There was a marked increase in the realization of deficit duties during the triennium in Calcutta, the total being Rs. 1,85,587 against Rs. 85,147 during the preceding triennium. This is attributed to the appointment of a special Deputy Collector to perform the functions of a probate officer.

Total for 1918-1919	(b) 2,59,31,580	3,59,861	1,88,099	25,807	5,73,767	2,53,57,813	2,86,773
Total for 1917-1918	(c) 2,35,02,730	3,44,957	2,01,156	26,773	5,72,886	2,29,29,844	2,58,468

(a) Includes Rs. 12,57,818 paid to the Calcutta Improvement Trust on account of excess stamp duty realised from several districts, and also Rs. 4,99,000 being the provincial share of sale-proceeds of unified stamps credited to non-postal revenues.

(b) Includes Rs 9,66,338 paid to the Calcutta Improvement Trust on account of excess stamp duty realised from several districts, and also Rs. 4,99,000 being the provincial share of sale-proceeds of unified stamps credited to non-postal revenues.

(c) Includes Rs. 7,90,922 paid to the Calcutta Improvement Trust on account of excess stamp duty realised from several districts, and also Rs. 4,99,000 being the provincial share of sale-proceeds of unified stamps credited to non-postal revenues.

(d) Includes Rs. 17,196 on account of district establishment, Rs. 945 on account of rewards and Rs. 8,068 on account of contingencies.

REPORT ON THE ADMINISTRATION OF INCOME-TAX IN BENGAL DURING THE TRIENNIUM ENDING 31st MARCH 1920.

NOTIFICATION.

No. 3182S.R.—The 5th November 1920.—The following extracts from the Report on the Administration of Income-tax in Bengal, during the three years ending 31st March 1920, are published for general information,

A. MARR,
Secy. to the Govt. of Bengal.

No. 403T.—S.R., dated Darjeeling, the 22nd October 1920.

From—THE HON'BLE MR. A. MARR, I.C.S., Secretary to the Government of Bengal,

To—The Secretary to the Government of India, Finance Department.

I am directed to submit the following report on the administration of income-tax in Bengal during the triennium ending on the 31st March 1920. The report has been prepared in accordance with the orders of the Government of India contained in their Finance Department letter No. 2806-F., dated the 20th October 1918.

2. **Administration of income-tax.**—The income-tax administration in districts was in the hands of the Subdivisional Officers, including those in charge of Sadar Subdivisions, who were invested with the powers of a Collector under clause (5) to section 2 of the Income-tax Act in their respective subdivisions. In those Sadar Subdivisions, where there were no Subdivisional Officers, the Deputy Collectors in charge were invested with the necessary powers. The duty of general supervision rested upon the District Collectors, who also exercised the powers delegated to them, under sections 21 and 22 of the Act, of hearing objections to assessments made by Subdivisional Officers. During the first year of the triennium, the law in force was Act II of 1886, as subsequently amended by Acts XII of 1891, VI of 1902, XI of 1903, IV of 1914 and V of 1916. Act II of 1886 and all subsequent amending Acts were repealed by Act VII of 1918, which came into force with effect from the 1st April 1918. The new Act introduced several changes in the mode of assessment and revised the classification of income for the purpose of assessment. The amending Act of 1919 raised the minimum limit of taxable income from Rs 1,000 to Rs. 2,000 per annum.

* * * * * *

5. **Revenue derived from income-tax during the triennium.**—The receipts, charges and net revenue derived from the collection of income-tax during each of the three years 1917-18, 1918-19 and 1919-20 were as follows :—

Year.	Receipts.	Charges.	Percentage of charges.	Net revenue.
	Rs.	Rs.		Rs.
1919-20	3,40,84,589	2,48,294	·7	3,38,36,295
1918-19	2,14,96,644	2,03,541	·9	2,12,93,103
1917-18	1,99,74,698	1,96,658	·9	1,97,78,040

Notwithstanding the relief afforded by the Income-tax Amendment Act (IV of 1919), which came into force from the 1st April 1919 and which exempted from the operation of the Income-tax Act incomes below Rs. 2,000 per annum, there was an increase of Rs. 1,25,43,192 in the net revenue of the

year 1919-20 over that of 1918-19. The increase was wholly contributed by Calcutta, where there was an increase of Rs. 1,29,30,944, due in great measure (1) to the high profits earned by jute mills, (2) to the assessment of one hundred new companies for the first time during the year 1919-20, (3) to the system of making assessment at a rate determined by the total income of an assessee, a introduced by Act VII of 1918, (4) to the adjustment procedure under section 19 and (5) to new assessments under section 25 of incomes which accrued in the previous year, but escaped taxation that year.

6. **Demand on account of income-tax.**—The number of persons finally assessed and the final demand during each year of the triennium were as follows :—

Year	Number of persons finally assessed in—			Final demand in—		
	Calcutta.	Other districts.	Total of cols. 2 and 3.	Calcutta.	Other districts.	Total of cols. 5 and 6.
1	2	3	4	5	6	7
				Rs.	Rs.	Rs.
1919-20 ...	18,209	15,052	33,261	3,35,67,152	24 78,664	3,60,45,814
1918-19 ...	26,531	38,522	65,053	1,85,20,286	29,05,753	2,14,26,039
1917-18 ...	25,883	37,062	62,945	1,79,19,287	27,98,028	2,07,17,260

It is noticeable that although the number of assessees decreased by 31,792, which may be attributed mainly to the exemption allowed under the amending Act IV of 1919, the final demand in 1919-20 increased by Rs. 1,46,19,775.

7. **Adjustment under section 19.**—The system of adjustment under section 19 of the Income-tax Act of 1918, which came into operation for the first time during the year 1919-20, resulted in an increase in assessment of Rs. 86,60,045 over the preliminary assessments made in 1918-19. In Calcutta, the result of adjustment showed an increase of Rs. 93,06,884 over the preliminary assessments made in 1918-19.

8. **Assessment under section 25.**—The application of section 25 resulted in a demand of Rs. 29,78,703 on account of assessment of incomes in Calcutta which escaped assessment during 1918-19, of which Rs. 12,13,967 or 40·7 per cent. was collected during the year, leaving a balance of Rs. 17,64,736 outstanding at the close of the year.

9. **Rural and urban incidence of the tax.**—The proportion of the tax paid in Calcutta (excluding penalties, costs, arrear collections, etc.) in comparison with that paid in the rest of the Province is exhibited below :—

Year.	Amount of tax realized in		Total.
	Calcutta.	Rest of the Province.	
	Rs.	Rs.	Rs.
1919-20	2,57,80,332	23,85,687	2,81,66,019
1918-19	1,64,22,034	28,31,460	1,92,53,494
1917-18	1,61,10,719	27,44,286	1,88,55,005

From the statements given in paragraphs 6 and 9, it will be seen that during the year 1919-20, Calcutta contributed about 55 per cent. of the persons assessed and 92 per cent. of the tax realized.

The incidence of the tax in rural areas during the year 1919-20 varied from Re. 1 to every 45 persons in Jessore to Re. 1 to every 2 persons in Darjeeling. Apart from Calcutta, only one person in 2,930 of the population pays income-tax, and the average amount paid by each assessee is Rs. 164. In Calcutta, which for income-tax purposes includes the town of Howrah, the proportion is one person in 67 of the population and the average tax paid is Rs. 1,735.

10. **Incidence of the demand on population.**—The following statement shows the proportion of persons assessed to population and to villages in the Province and the incidence of the tax during the triennium under report :—

Year.	Number of persons assessed to population.		Proportion of persons assessed to villages.		Number of persons in proportion to each rupee of the tax assessed.
	Persons.	Population.	Persons.	Villages.	
1919-20 ...	1	1,363	27	100	1·2
1918-19 ...	1	697	54	100	2·1
1917-18 ...	1	720	52	100	2

Year.	No. of persons exempted.	Amount of tax remitted. Rs.
1919-20 ...	297	50,689
1918-19 ...	642	56,466
1917-18 ...	810	2,45,340

12. **Exemptions and result of revision.**—The figures on the margin compare the number of persons exempted on revision and the amount of tax remitted by District Officers and Commissioners.

The percentage of exemptions on the number of persons originally assessed was ·9 in 1919-20, 1 in 1918-19 and 1·1 in 1917-18 and that of remissions on the original demand ·15 in 1919-20, ·25 in 1918-19 and 1·1 in 1917-18.

13. **Collection of income-tax**—The total amount of the tax collected on account of the demand for the year 1919-20 was Rs. 2,81,66,019, as compared with Rs. 1,92,53,494 and Rs. 1,89,55,005 in 1918-19 and 1917-18, respectively.

The revenue rose by Rs. 89,12,525 during the year 1919-20 over the receipts for 1918-19, although, under Act IV of 1919, incomes below Rs. 2,000 were exempted from the tax during the year 1919-20 which accounts for the diminution by 31,792 in the number of assessees. In Calcutta, the amount of tax collected on the assessments made in 1919-20 showed an increase of a little over 93½ lakhs as compared with 1918-19. The increase occurred wholly under the head "profits of companies," while there was a decrease of Rs. 12,92,912, under the heads "interest on securities" and "other sources." The percentage of collection during the year 1919-20 on the final demand on account of tax was 78, which was much below the prescribed standard of 95 per cent. This was due to the short collection made in Calcutta, namely, 76·8 as against 88·7 and 89·9 in the previous years. In the rest of the province, the prescribed standard was reached in all districts, except Midnapore (88·7), Howrah (91·8), 24-Parganas (89·8), Nadia (81·3), Mymensingh (92·1) and Rajshahi (91·2). The low percentage in Calcutta was due to the slow progress of assessment during the early part of the year and to the large number of important assessments—mostly European firms and limited companies having been held over till the latter part of the year on account of their assessments to super-tax and excess profits duty as explained above. A considerable portion of the demand covered by these late assessments has, however, been realized since the close of the year and the percentage in June last was well over 88·5.

14. **Outstanding balance.**—The outstanding balance on account of tax, penalties and costs was Rs. 92,21,475 in 1919-20 against Rs. 27,16,320 and Rs. 20,92,769 in the previous two years. Out of the total balance of Rs. 92,21,475 at the close of the year 1919-20, Calcutta alone was responsible for Rs. 91,12,870, including arrears from previous years amounting to Rs. 23,87,712 against Rs. 26,64,139 in 1918-19 and Rs. 20,48,307 in 1917-18. Out of this sum, Rs. 39,11,275 was collected after the close of the year.

15. **Coercive measures.**—The following statement compares the demand, collections and balances on account of panalties, fines and costs for the last three years :—

Year.	Demand.		Collection.		Balances.	
	Penalties and fines.	Costs.	Penalties and fines.	Costs.	Penalties and fines.	Cost.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1919-20 ...	26,819	5,316	7,698	3,933	19,121	1,383
1918-19 ...	25,728	8,217	10,205	6,448	15,523	1,769
1917-18 ...	22,269	8,482	11,659	6,076	10,610	2,406

19. **General.**—The main feature of the triennium was the passing of Act VII of 1918, which replaced the old Act of 1886 and the subsequent amending Acts IV of 1919 and XVII of 1920. The relief afforded by Act IV of 1919 by exempting from taxation incomes below Rs. 2,000 was much appreciated by middle class assessees, who have been hard hit by present economic conditions. The commercial and industrial development of Calcutta has rapidly increased of late and the revenue has risen from a little over 1 crore, 38 lakhs in 1916-17, the last year of the previous triennium to over 3 crores, 15½ lakhs in 1919-20. Adding to this, the amounts collected on account of super-tax and excess profits duty, the total revenue amounted to about 9 crores and 15 lakhs in 1919-20, viz., income-tax Rs. 3,15,63,577, super-tax Rs. 85,67,502 and excess profits duty Rs. 5,13,68,180. The thanks of Government are specially due to Mr. Williams, the present Collector of Income-tax, for his smooth and very efficient administration of the department. He received valuable assistance from the Second Collector, Mr. Crosse, and from Babu R. C. Sen, Deputy Collector of Income-tax. The Governor in Council desires also to acknowledge the services of all Commissioners and District Officers in their satisfactory management of the Department.

DACCA, *the 4th October 1920.*

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 4th November 1920.

Summary.—During the week light showers fell in a few places only. Reaping of early winter paddy is proceeding. A satisfactory outturn is anticipated. Preparatory tillage for the spring crops and their sowings are progressing favourably. The outlook, so far, is generally reported to be promising. The average price of common rice for the province has fallen by about 2 per cent., as compared with that of the previous week.

RESOLUTION ON THE CONSTITUTION OF A COMMITTEE TO ADVISE AS TO THE REVISION OF PAY OF MINISTERIAL, MENIAL AND OTHER SUBORDINATE ESTABLISHMENTS.

GOVERNMENT OF BENGAL.

FINANCE DEPARTMENT.

Finance.

DARJEELING, THE 2ND NOVEMBER 1920.

RESOLUTION—No. 2934T.—F.

The situation created by the large increase in prices in recent years, in consequence of which the subordinate officials in Government service in this

Presidency have been hard hit, has been partially met by the grant of war and grain compensation allowances and of the temporary allowances lately sanctioned for ministerial officers. In the opinion of Government, however, the changed conditions render a readjustment of salaries necessary, and with this object in view they have decided to appoint a committee to advise as to the revision, in accordance with modern economic conditions, of the pay of the permanent ministerial and menial establishments in all Provincial offices, as well as in the Imperial offices under the administrative control of the Local Government in this Presidency and also of such subordinate establishment as Government may desire the committee to take up. The committee will submit their report by the 31st March 1921.

2. The committee will consist of—

Hon'ble Mr. McAlpin, I.C.S.	*President.*
Hon'ble Rai Mahendra Chandra Mitra Bahadur ...	*Member.*
Mr. S. N. Roy, I.C.S.	*Member and Secretary.*

3. The committee will be authorized, in connection with their investigations, to examine witnesses, official or non-official, at their discretion and to obtain from the Secretariat and offices of the heads of departments information on any points concerning their enquiries. The President is further authorized to arrange such visits to any part of the Presidency for the purpose of making local enquiries, as may be necessary for the full elucidation of the whole question. Such visits may be made by the committee as a whole or by individual members of it, at the President's discretion.

By order of the Governor in Council,

A. MARR,

Secy. to the Govt. of Bengal.

RESOLUTION ON THE RECOMMENDATIONS OF THE PUBLIC SERVICES COMMISSION REGARDING THE REORGANISATION OF THE FACTORY AND BOILER INSPECTION DEPARTMENTS.

GOVERNMENT OF BENGAL.

COMMERCE DEPARTMENT.

Commerce.

RESOLUTION—No. 4052Com.

CALCUTTA, THE 22ND NOVEMBER 1920.

THE recommendations of the Public Services Commission in respect of the Factory and Boiler Inspection Departments have been under discussion

for some time with the Government of India and the Secretary of State. The Governor in Council is now pleased to publish for general information the following decisions of the Secretary of State on the subject.

2. **Factory Inspection Department.**—(*a*) The officers of the Factory Inspection Department in this Presidency will draw the following revised rates of pay with effect from the 1st December 1919 :—

		Rs.
Chief Inspector of Factories	...	1,200—100—1,500 per mensem.
Inspectors of Factories	...	300—50—800 „

The question of the pay of the Factory Inspectors is under further consideration.

(*b*) Inspectors of Factories will ordinarily be recruited in India after advertisement of vacancies, but recruitment in India will not necessarily be confined to Indians, and only when no qualified candidate is procurable in India, will steps be taken for the recruitment of officers from the United Kingdom, the selection in such cases being made after advertisement and on the advice of the home authorities.

(*c*) The maximum limit of age for admission of recruits has been fixed at 30 years, and a departure from this rule will be permitted only in very exceptional cases.

(*d*) All newly appointed officers will be on probation for two years before they are confirmed in their appointments, and will be required to pass a colloquial test in the vernacular of a higher character than that at present imposed.

(*e*) The ordinary pension rules will apply to the officers of this Department. Subject to the usual provisos, they will be allowed to reckon as service qualifying for superannuation pension, the number of completed years by which their ages at the time of appointment exceeded 25 years, the concession being limited, however, to a maximum of five years.

(*f*) In case of proved inefficiency, an officer will be liable to compulsory retirement.

3. **Boiler Inspection Department.**—(*a*) The Boiler Inspectors will draw the following revised rates of pay, viz., Rs. 600—25—900 per mensem, with effect from the 1st December 1919. The pay of the newly created post of Chief Inspector will be Rs. 1,200—100—1,500 per mensem.

(*b*) The Boiler Inspectors will be recruited in India as at present, and Indians with requisite qualifications will be eligible for appointment. All vacancies will be advertised.

(*c*) The maximum limit of age for admission of recruits has been fixed at 30 years, and a departure from this rule will be permitted only in very exceptional cases.

(*d*) All newly appointed officers will be on probation for a period of two years before they are confirmed in their appointments.

(*e*) The ordinary pension rules will apply to the officers of the Boiler Inspection Department. Subject to the general provisos, these officers will be allowed to reckon as service qualifying for superannuation pension, the number of completed years by which their ages at the time of appointment exceeded 25 years, the concession being limited to a maximum of five years. The provisions of rules 35, 36 and 37 of the rules under the Bengal Steam Boilers and Prime Movers Act, 1879, regarding the grant of extraordinary pension or gratuity to a Boiler Inspector or his relative in the case of injury or death will be retained.

(*f*) In case of proved inefficiency, an officer will be liable to compulsory retirement.

By order of the Governor in Council,

A. MARR,

Secy. to the Govt. of Bengal.

RESOLUTION ON THE ANNUAL REPORTS BY THE PORT OFFICERS, CALCUTTA AND CHITTAGONG, FOR THE YEAR 1919-20.

GOVERNMENT OF BENGAL.

MARINE DEPARTMENT.

CALCUTTA, THE 22nd NOVEMBER 1920.

RESOLUTION—No. 1944 Marine.

READ—

(1) Annual report by the Port Officer, Calcutta, for the year 1919-20.

(2) Annual report by the Port Officer, Chittagong, for the year 1919-20.

Port of Calcutta.

Bengal Pilot Service.—The number of Pilots including Leadsmen Apprentices in the Bengal Pilot Service at the end of the year was 63 against the sanctioned number of 74, of whom 14 were on long leave and on deputation to military duty. Nine Leadsmen Apprentices were appointed during the year. There were four casualties in the service; one Branch Pilot died and three of the Leadsmen Apprentices resigned. The majority of the Pilots, who were engaged on Naval and Military duties, returned during the year. As in the previous year the system of guaranteed minimum remuneration to Pilots with a view to compensate them for the decrease in the normal earnings was continued.

Vessels piloted.—The number of vessels piloted inwards was 1,124 with a gross tonnage of 4,788,616 and outwards 1,102 with a gross tonnage of 4,687,463 against 950 vessels inwards and the same number of vessels outwards with a gross tonnage of 3,717,543 and 3,685,156, respectively, for the preceding year. Vessels drawing over 21 feet piloted inwards and outwards were 355 and 720 against 296 and 608, respectively, during the previous year.

No vessel was neaped inwards or outwards during the year for want of sufficient depth of water over the bars against one in the preceding year. No vessel was detained at the Sandheads for want of pilots, against 17 in the previous year.

Pilotage receipts.—The receipts from pilotage fees were Rs. 10,80,472 against Rs. 10,42,874 and Rs. 8,63,709 for the two preceding years.

Casualties to vessels.—There were 35 cases of grounding and eight of collision during the year against 27 groundings and one collision in the previous year. As the result of the collisions one steamer and two cargo-boats were sunk. Suitable action was taken in any case where a Pilot was found to blame.

Courts of enquiry.—Sixteen cases of casualties to vessels were referred to Special Courts of Enquiry against two during the preceding year.

Examinations.—Seventy-six candidates appeared in the examinations for colonial and home-trade certificates of competency as Master, Mate or Engineer of sea-going vessels, of whom 26 passed. Out of the total number of 590 candidates, 166 passed the examinations for certificates of competency as Master, Serang, Engineer and Engine-driver under the Inland Steam Vessels Act, I of 1917.

The members of the Bengal Pilot Service carried on their duties with commendable zeal and ability, in spite of the fact that the service was below the sanctioned strength and that the number of vessels of deep draught piloted inwards was nearly 20 per cent. larger than that of the previous year.

Captain D. F. Vines, O.B.E., R.I.M., Port Officer and Shipping Master, reverted to the R.I.M. on the 14th June 1919, making over charge of his office to Commander W. K. Thyne, R.I.M., Deputy Port Officer. Captain

E. Stocken, R.I.M., assumed the duties of the Port Officer and Shipping Master on the 19th June 1919 and again made over charge of his duties to Commander W. K. Thyne on the 15th March 1920 when he reverted to the R. I. M.

Engineer-Commander C. T. Amor, R.I.M., continued as Principal Engineer and Ship Surveyor throughout the year.

Port of Chittagong.

Arrival and departure of vessels.—The total number of vessels that entered the port was 842, of which 238 were sea-going vessels, 523 inland steamers and 81 native sailing vessels with a total gross tonnage of 489,664 as against the total number of 709 vessels with a gross tonnage of 309,690 in the preceding year. The total number of departures was 835, including 236 sea-going vessels, 519 inland steamers and 80 native sailing vessels with a total gross tonnage of 476,049 as against the total number of 706 vessels with a gross tonnage of 311,288 in the previous year.

Casualties to vessels.—There were two casualties to vessels, of which one resulted in the total loss of the vessel and the other was a case of grounding. No Marine Court of Enquiry was held during the year under review.

Examinations.—Candidates numbering 158 sat in the examinations for certificates of competency as Master, Serang, Engineer and engine-driver under the Inland Steam Vessels Act, I of 1917, of whom 94 passed.

Commander H. M. K. Moilliet, O.B.E., R.I.M., took over charge as Port Officer and Shipping Master, Chittagong, on the 1st July 1919, and continued in his office throughout the year.

Engineer Lieutenant-Commander W. A. Williams, R.I.M., was appointed as Engineer and Ship Surveyor, Chittagong, on the 30th June 1919 and remained in charge of his Department throughout the year.

By order of the Governor in Council,

C. B. BAYLEY,

Deputy Secy. to the Govt. of Bengal.

MONTHLY WEATHER AND CROP REPORT OF BENGAL FOR THE MONTH OF OCTOBER 1920.

Character of the season.—During the month under report the rainfall was generally above the normal in all the districts excepting in Birbhum, Bankura, Darjeeling, Chittagong, Tipperah and the Chittagong Hill Tracts where it was slightly defective. The usual rainfall statement is appended.

II. Progress of agricultural operations.—Preparatory tillage for the spring crops and their sowings continued all over the province. Harvesting of early winter paddy commenced. The rainfall during the first half of the month was beneficial to winter paddy though in almost all the districts of Western Bengal more rain was urgently needed for the late transplanted winter paddy. The steeping and washing of jute were finished.

III. State of standing crops.—The condition of winter paddy and other standing crops was generally reported to be satisfactory.

IV. Prospects and probable outturn.—The prospects of winter paddy were generally reported to be excellent except in the high land tracts where more rain would have been helpful to it.

V. Damage to standing crops.—Slight damage was caused to the standing crops by heavy rainfall in Rangpur, Bogra and in parts of Noakhali, and by drought in parts of Midnapore.

VI. Condition of agricultural stock.—Sporadic cases of cattle disease were reported from nine districts.

VII. Failure of pasturage and Fodder.—No scarcity of fodder was felt anywhere in the province.

VIII. Prices of food-grains.—During the second half of the month under review the price of common rice of the cheapest quality rose in two districts only, fell in fifteen and remained stationary in the rest. It ranged from 4 seers 8 chittaks per rupee at Darjeeling to 6 seers 6 chittaks at Nadia.

IX. Condition of agricultural population.—The condition of the agricultural population was reported to be fair.

G. EVANS,
Director of Agriculture, Bengal.

DACCA,
The 17th November 1920.

Statement showing the normal and actual rainfall in each district during October 1920.

CALCUTTA. *the 22nd November 1920.*

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 18th November 1920.

Summary.—The week was rainless. The weather is favourable to harvesting of winter paddy which is progressing. Excepting on high lands, a satisfactory outturn of winter paddy is anticipated. Sowing of wheat, potatoes, tobacco and oilseeds continues, but some moisture is required in parts of West Bengal to facilitate the operation; the outlook is reported to be generally good. The average price of common rice for the province has fallen by about 3·38 per cent. as compared with that of the previous week.

Serial No.	District and subdivision.	Rainfall.	Price of common rice, in seers per rupee.		Character of the weather, condition of crops, etc.
			This week.	Previous week.	
1	2	3	4	5	6
		Inches.			
1	24-Parganas	Nil	5¼	5¼	Fodder and water are sufficient. *Rabi* crops are being sown. Burma rice is available in Sadar. Cattle-disease is reported from thana Habra in Baraset subdivision.

* Including deaths from Influenza.

CALCUTTA;
The 13th November 1920.

CHAS. A. BENTLEY,
Sanitary Commissioner for Bengal.

DEPARTMENT OF STATISTICS, INDIA.

CALCUTTA TRADE FLUCTUATIONS.

THE following tables are intended to show the trade by all routes, *i.e.*, by rail, river, canal, road, and sea, of the Calcutta block* in certain selected articles during the months of April to September, 1920, as compared with the corresponding period of 1919 and 1918. The statistics have been compiled from returns furnished by the Collector of Customs, Calcutta, Railway Audit Offices, Steamer Companies, the Commissioners for the Port of Calcutta, the Collectors of the 24-Parganas and Howrah, and the Assistant Engineer, Calcutta Canals.

General Summary.

Imports.—The imports of rice, including paddy†, into Calcutta* by rail, river, canal, road, and sea (coastwise) during the months of April to September, 1920, amounted to 4,997,000 maunds, as against 12,009,000 maunds in the corresponding period of the preceding year—a decrease of 58 per cent. There was an increase of 44 per cent in the imports of coal and coke (68,180,000 maunds as against 47,191,000 maunds last year). The imports by rail, river, road, and sea (coastwise) of Indian cotton piecegoods showed an increase of 21 per cent, the total value amounting to Rs. 5,82 lakhs as against Rs. 4,81 lakhs in 1919. The quantity of indigo imported during the months of April to September, 1920, increased from 2,179 maunds to 3,124 maunds. The imports of raw jute amounted to 2,161,000 bales as against 1,798,000 bales—an increase of 20 per cent. The total imports of oilseeds (linseed and rape and mustard seed) decreased by 2 per cent from 4,557,000 maunds to 4,471,000 maunds. The imports of sugar increased by 74 per cent from 282,000 maunds to 491,000 maunds, while those of tea decreased by 17 per cent from 1,300,000 maunds to 1,078,000 maunds.

Exports.—The value of the exports of cotton piecegoods, foreign, from Calcutta by all routes during the months of April to September, 1920, increased by 3 per cent (Rs 12,29 lakhs as against Rs 11,87 lakhs last year). The exports of gunny bags (including the exports by sea to foreign countries) increased from 537 million bags to 731 millions; and shipments of gunny bags to other Indian ports also showed an increase from 19 to 20 millions in number in the period under review. The quantity of kerosene oil despatched from Calcutta and Budge-Budge by internal routes and by sea (coastwise) decreased by 4 per cent from 2,817,000 maunds to 2,717,000 maunds.

* The Calcutta block consists of the town of Calcutta with Howrah and Kidderpore Docks.
† One maund of paddy is equivalent to 25 seers of rice.

*New gauge fixed at Rajmahal from 1st June 1910 in place of the gauge at Sahebganj. The zero of gauge at Rajmahal again 56·46 ft. above M.S.-L. from 10th February 1916 to 15th June 1918. From the 16th June 1918 to 6th April 1919, it April 1919 it is 56·319 ft. above M.S.-L.

†To compare the reduced levels shown in these monthly printed statements before and after the 1st June 1903, 5·78 ft. October 1909).

(a) A new gauge fixed at Monghyr on 16th July 1914.

(b) From the 1st November 1915 the zero of gauge was 2·43 ft. above M.S.-L. Previous to that the zero was at M.S.-L zero is 1·509 ft. above M.S.-L.

(c) From the 25th January 1916 to 4th April 1919 the zero of gauge at Berhampore was 30·99 ft. above M.S.-L. From

(d) From the 25th October 1916 a temporary wooden gauge with its zero at 49·00 ft. above M.S.-L. was erected at 3rd June 1919. From 4th June 1919 the zero is 1·51 ft. above M.S.-L.

(e) Gauge shifted from Sabik Goalundo to Fakirabad from 30th June 1919.

The 22nd November 1920.

RESOLUTION ON THE REPORTS ON INLAND EMIGRATION UNDER THE ASSAM LABOUR AND EMIGRATION ACT, 1901, FOR THE YEAR ENDING THE 30TH JUNE 1920.

GOVERNMENT OF BENGAL.

COMMERCE DEPARTMENT.

Emigration Branch.

CALCUTTA, THE 25TH NOVEMBER 1920.

RESOLUTION—No. 4085Emi.

READ—

The Reports on Inland Emigration under the Assam Labour and Emigration Act, 1901, (VI of 1901) for the year ending the 30th June 1920, submitted by the Superintendent of Emigration, Calcutta, and the District and Assistant Superintendents of Emigration.

1. The year under review was an uneventful one, its principal feature being the considerable decrease in the number of emigrants despatched to

the labour districts as compared with the previous year. No administrative measure of importance was introduced during the year.

2. Recruiting operations were conducted in the districts of Bankura, Birbhum, Burdwan and Midnapore, where seven hundred garden-sardars (including 177 sardarnis) were employed during the year as against 1,522 (including 353 sardarnis) in the preceding year. All of them worked under the supervision of licensed local agents. Thirteen local agents' licenses were issued in 1919-1920 as compared with six in the year 1918-1919. In all, 600 emigrants were recruited in Bengal, or 1.764 less than in the previous year, Midnapore and Bankura supplying the largest number of recruits, viz., 369 and 183, respectively. No criminal case connected with emigration was reported during the year.

3. The total number of emigrants recruited in Bengal and other provinces who embarked at Goalundo during the year under report, was 50,989, as compared with 119,883 in the preceding year, in which the number of emigrants was abnormally large owing to the scarcity and high prices prevailing in the recruiting districts. Most gardens were thus better stocked with labour than they had been for many years and consequently the demand was less.

4. The places of accommodation and rest-houses for emigrants were duly inspected and generally kept in proper sanitary condition, while the arrangements for river transport were satisfactory. Twenty-three deaths, of which six were due to cholera, were reported to have occurred among emigrants at Asansol, Kharagpur or Naihati on their way to Goalundo and among the 51,052 emigrants, who arrived at that station, there were 55 deaths, seven being due to cholera. There was no death during the steamer journey to Chandpur among the 17,892 emigrants, who embarked for the Surma Valley districts, but of the 33,097 emigrants who embarked for the Brahmaputra Valley, 28 died during the voyage, three of the deaths being due to cholera.

5. Fifteen emigrants refused to embark after their arrival at Goalundo, one was rejected as physically unfit for labour on a tea estate, and one was repatriated from the labour district *viâ* Goalundo.

6. In connection with the transport of labour to Assam, receipts fell from Rs. 1,840 in the preceding year to Rs. 1,751, while the expenditure rose from Rs. 14,482 to Rs. 22,720.

7. Lt.-Col. E. A. W. Hall, I.M.S., held the office of Superintendent of Emigration, Calcutta, up to the 31st March 1920, when he proceeded on leave preparatory to retirement. The thanks of the Governor in Council are due to him and to Major Gourlay, who succeeded him for his report and to the local officers for their assistance in the administration of the Act.

By order of the Governor in Council,

A. MARR,

Secy. to the Govt. of Bengal.

Vital statistics of Towns with a population of 50,000 and over of Bengal Presidency for the week ending Saturday, the 30th October 1920.

District	No.	Towns.	Population under registration according to Census of 1911.			Births registered.		Deaths registered.

CHAS. A. BENTLEY,
Sanitary Commissioner for Bengal.

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 25th November 1920.

Summary.—The week was rainless. Reaping of winter paddy and ploughing for and sowing of spring crops are in full swing. The prospects of spring crops, so far, are reported to be generally excellent. The average price of common rice for the province has fallen by about 1·8 per cent. as compared with that of the previous week.

Serial No.	District and subdivision.	Rainfall.	Price of common rice, in seers, per rupee.		Character of the weather, condition of crops, etc.

*New gauge fixed at Rajmahal from 1st June 1910 in place of the gauge at Sahebganj. The zero of gauge at Rajmahal again 56·46 ft. above M.S.-L. from 10th February 1916 to 15th June 1918. From the 16th June 1918 to 6th April 1919, it April 1919 it is 56·519 ft. above M.S.-L.

†To compare the reduced levels shown in these monthly printed statements before and after the 1st June 1908, 5·78 ft October 1909).

(*a*) A new gauge fixed at Monghyr on 16th July 1914.

(*b*) From the 1st November 1915 the zero of gauge was 2·43 ft. above M.S.-L. Previous to that the zero was at M.S.-L. zero is 1·509 ft. above M.S.-L.

(*c*) From the 25th January 1916 to 4th April 1919 the zero of gauge at Berhampore wa s 30·99 ft. above M.S.-L From

(*d*) From the 25th October 1916 a temporary wooden gauge with its zero at 49·00 ft. above M.S.-L. was erected at 3rd June 1919. From 4th June 1919 the zero is 1·51 ft. above M.S.-L.

(*e*) Gauge shifted from Sabik Goalundo to Fakirabad from 30th June 1919.

The 30th November 1920.

NOTIFICATION.

No. 10596B.G.—The 6th December 1920.—The report on the working of the Government Cinchona Plantations and Factory in Bengal for the year 1919-20 is published for general information.

M. C. MCALPIN,
Secy. to the Govt. of Bengal.

FIFTY-EIGHTH ANNUAL REPORT OF THE GOVERNMENT CINCHONA PLANTATIONS AND FACTORY IN BENGAL FOR THE YEAR 1919-20.

1. **General.**—The outstanding features of the year under review in the cinchona and quinine trades have been the re-establishment of the Dutch Combine on lines similar to those existing in pre-war days, the formation of a British Quinine Corporation for purposes of co-operative buying from the Dutch, and the release towards the end of 1919 of Government control of the quinine market in London. It is now possible and may be permissible at short length to review the history of quinine from the beginning of the war to the time when stocks became sufficiently plentiful to allow release of control and the drug to find its own economic level of prices and its own channels

of distribution. Briefly, the episode is one of a commodity, controlled by a group of monopolists encountering the various restrictions, political and economic, of nations in the grip war. For the growing needs of the world, supplies were none too plentiful when hostilities broke out in August 1914. Germany, one of the largest manufacturing and distributing countries, had stocks enough in hand and, if she required to do so, was able to obtain during the earlier stages of the war, enough of the raw product to meet all her own and her partner's wants. The Allies were, from the first, largely dependent for supplies on the good-will of a neutral power which, when the crisis of 1918 came indicating a world's shortage of the drug, could show in no uncertain manner that it had learned to appreciate the defensive power of this economic weapon. The Allies had to have quinine. There was no reason why the Dutch should fail to profit by the occasion. To the paramount needs of the Allied armies were added requirements to meet the great influenza scourge and it early became apparent that if pressure had to be applied to secure supplies, it should not be applied piecemeal. On the one hand, the Dutch eagerly desired a new economic agreement of such a general nature as would allow of a less restricted trade flow. In particular, they desired increased supplies of coal in Europe and machinery and certain food-stuffs including Burma rice for their colonies. On the other hand they were fully alive to the disadvantages of bartering once and for all the bargaining power which the possession of the cinchona monopoly conferred. On their part, the Allies had to balance the advantages of getting the drug with the disadvantages under war and early-post-war conditions of allowing Holland facilities for trade and commodities which they could ill-afford to spare. The final result was collective bargaining on the part of the Allies and the signing of an agreement to be worked by the Combine and a body called the Association of Quinine Manufacturers in Allied countries. By this agreement supplies became assured. Even when it could scarcely have paid them to do so, the Dutch loyalty kept by it till its termination with the end of the war.

The after-war history of the drug, too, is of interest. In common with many other commodities where genuine shortage gave opportunity for speculation by second and third hand holders, quinine came under some annoying though necessary post-war trade restrictions. Its controlled price in the English market would not bear comparison with the high-level rates prevailing abroad and at one time it became cheaper, nominally, to get re-export quinine landed in Calcutta from London than to get quinine direct from Java. The drug began to flow freely to other main distributing centres and these conditions so threatened London's important export trade that Government control was eventually withdrawn leaving quinine once again a trade free commodity. On decontrol, prices in the English market soon reached continental and American levels; fluctuations in rates of exchange, however, still leaving opportunity for speculation. The British Quinine Corporation working in harmony with the Dutch Combine now practically controls the English quinine market. Prices have of late shown a tendency to decline, but the production of bark and quinine as a lucrative commercial proposition is established on a sounder foundation than ever. This position, no less than the lesson the last five years have taught of the advisability of relying on home industries for essentials, may be responsible for the growing interest various countries now evince in cinchona cultivation. In particular, is this true of America, Japan and—within the British Empire—India. The current year has witnessed the beginnings of a scheme for the supply from within the Empire of a larger proportion of its quinine requirements than has hitherto been possible. It is much too early yet to predict that Burma will prove an important source of the drug for India or the Empire, but work has started and, so far, the signs are hopeful. In the Bengal plantations the strain of war years is now evident in greatly reduced harvests. During 1919-20, 513,043 lbs. only were cropped and there will be a still smaller harvest during 1920-21. So far as the plantations are concerned this is all to the good, but, unless bark which is expected from Java arrives soon, the factory will be running at an uneconomic rate.

2. **Extensions, Acreages and Crops.**—(*a*) *Mungpoo.*—Rainfall was 104·43 inches against an average of 123·6 for the past 42 years. The dry weather was prolonged, no rain of any value to cinchona falling from the middle of October 1919 till the end of February 1920. The younger blocks of cinchona and forest trees suffered in consequence of this drought, but vacancies caused will be filled in during the 1920 planting season. Cinchona extensions in all were 255 acres, consisting of *Cinchona Ledgeriana* 172 acres on Mungpoo division and 55 acres on Sittong division and of *Cinchona Ledgeriana* × *succirubra* 28 acres on Labdah division. About 96,650 trees, equivalent to 51·6 acres, of cinchona of various ages, but of an average age of 7·1 years were cut out, yielding 194,158 lbs. of dry bark, an average of 2·01 lbs. per tree or 3,763 lbs. per acre. This very low yield is ascribed, partly to the age of the trees cut out, partly to an unreliable method of estimating their number. Of the total bark harvest, 9,075 lbs. were *C. succirubra*, 55,888 lbs. *C. Ledgeriana* × *succirubra* and 129,195 lbs. *C. Ledgeriana*. The average quinine percentage of the ledger bark was 4·81, of the hybrid bark 4·15 and of the mixed barks 4·61. At the end of March 1920, there were 728·7 acres under a full complement of cinchona. Afforestation extensions amounted to 35 acres, bringing the total acreage of fuel and timber trees up to 3,075 at the end of the year. Over 700 tons of wood fuel of value Rs. 2,944 and about 1,960 cubic feet of sawn timber of value Rs. 487 were supplied free to the factory.

(*b*) *Munsong.*—Rainfall was 105·46 inches against an average of 96·48 for the past 19 years. Very heavy hail, lying in many places to a depth of 18 inches, caused considerable damage to the young plants and nurseries in the higher parts of the plantation. The young shoots of recently coppiced trees, especially, were affected, but have since come on well. Extensions were 412 acres, consisting of 315 *C. Ledgeriana* (85 on Kashyem, 110 on Munsong, 50 on Burmiak and 70 on Sangser divisions, respectively), 57 of *C. Ledgeriana* × *officinalis* (25 on Kashyem, 7 on Munsong and 25 on Burmiak, respectively) and 40 of *C. Ledgeriana* × *succirubra* on Munsong division. About 189,070 trees, equivalent to 145·5 acres, of various ages, but of an average age of 5·69 years, were cut out, yielding 318,885 lbs. of dry bark or an average of nearly 1·7 lbs. per tree and 2,191 lbs. per acre. Of the total harvest 263,660 lbs. were *C. Ledgeriana*, 38,075 lbs. *C. Ledgeriana* × *succirubra*, 23,650 lbs. *C. officinalis* and 760 lbs. *C. succirubra*. The average quinine percentage of the ledger bark was 4·30, of the hybrid 2·11 and of the *C. officinalis* 3·90, the average of the mixed barks being 4·09. At the end of March 1920, there were 2,351·8 acres under a full complement of cinchona. During the year, 55 acres of cinchona sick land were put back into forest, bringing the total reafforested area on Munsong plantation up to 421 acres.

(*c*) *Plantations as a whole.*—The total area under a full complement of cinchona is 3,080 acres, of which 2,319 acres are comparatively young. Details are given in Appendix A. The approximate number of cinchona trees is 5,090,000, of which about 3,610,000, are on Munsong and 1,480,000 on Mungpoo.

3. **Factory Work.**—Besides 514,540 lbs. of bark from Java for the Government of India, 149,835 lbs. of Mungpoo bark and 334,410 lbs. of Munsong bark were worked up during the year. The actual amounts of quinine sulphate shown by analysis were 6,902 lbs. in the Mungpoo bark and 13,686 lbs. in the Munsong bark, a total of 20,588 lbs., while that in the Java bark was 31,571 lbs. The products actually obtained were 47,727½ lbs. of sulphate of quinine, 1,022 lbs. of hydrochlorides equivalent to 1,160 lbs. of sulphate and 15,166 lbs. cinchona febrifuge, containing quinine equivalent to 2,226 lbs. of sulphate. This is a yield of 98 per cent. on the analytical results. Assuming an equal efficiency of extraction over all the barks used, the Java bark gave 98 per cent. of 31,571 lbs. or 30,938 lbs. Of this amount, the equivalent of 1,349 lbs. of sulphate went into the 9,230 lbs. Febrifuge made from Java bark, leaving a balance of 29,589 lbs. sulphate set aside for the Government of India. No account is taken of this quinine in the provincial stock statements under Appendix C. All the cinchona febrifuge, however, is being sold and the proceeds of the portion belonging to the

Government of India, less cost of manufacture borne by Provincial revenues, will eventually be credited to that Government. The cost of extraction per lb. of quinine sulphate was Rs. 2·37, making a sum of Rs. 70,126 debitable hereafter against the Government of India. The plantation barks yielded 18,138·25 lbs. of quinine sulphate, 1,022 lbs. of hydrochlorides and 5,936 lbs. of cinchona febrifuge containing quinine equivalent to 877 lbs. sulphate.

4. **Cost and Value of Plantation Bark.**—The 194,158 lbs. of bark harvested from Mungpoo at 3·6 annas per lb. cost Rs. 43,685. The unit-rate for bark during 1919-20 being 2 annas and the average quinine percentage of Mungpoo bark 4·6, the market value of the bark was 9·2 annas per lb. or a total of Rs. 111,640 or Rs. 67,955 *plus* freight and carriage charges more than it actually cost. The 318,885 lbs. of Munsong bark at 2·7 annas per lb. cost Rs. 53,812, whereas its market value at 2 annas per unit and an average percentage of 4·09 was 8·18 annas per lb. or a total of Rs. 1,63,030 or Rs. 1,09,218 *plus* freight and carriage charges more than it actually cost. The total cost of the total harvest was Rs. 97,497, while the actual market value was Rs. 2,74,670. In other words, purchase of the same quantity of bark in the market would have cost Government Rs. 1,77,174 *plus* freight and carriage charges more than it actually did cost.

5. **Cost and Value of Quinine Produced**—(*a*) **Cost in the Bark.**—The 484,245 lbs. of plantation bark used in the factory cost—at 3·6 annas per lb. for Mungpoo and 2·7 annas for Munsong—Rs. 90,144 and yielded 18,138·25 lbs. sulphate and 1,022 lbs. hydrochlorides—a total sulphate equivalent of 19,298·25 lbs. The cost of quinine in the plantation bark before extraction was, therefore, Rs. 4·771 per lb.

(*b*) **Cost of Extraction, Packing and Delivery to Railway.**—The net factory expenditure after the exclusion of bark and quinine purchase charges and charges in connection with the manufacture of products other than sulphate and hydrochlorides, and the inclusion of net depreciation of factory block and share of general charges was Rs. 1,15,676-9-7. This sum gave an equivalent of 48,887·25 lbs. quinine sulphate which, therefore, cost Rs. 2·366 per lb. to extract, pack and deliver.

(*c*) **Total Cost per lb.**—The cost per lb. in the bark was Rs. 4·671 and of its extraction, etc., Rs. 2·366 a total of Rs. 7·037.

(*d*) **Value.**—For purposes of valuation in the stock account, Rs. 28 per lb. for quinine sulphate has been taken. The average import rate *C.I.F.*, Calcutta, for quantities in bulk was over Rs. 29 for the first ten months of the official year. At present it is about Rs. 32, so that Rs. 28 may be considered a reasonably low estimate.

6. **Sales and Selling Rates.**—Total issues were 79,666 lbs. 9 oz. of cinchona products and 8,268 lbs. of bark. Of the total, 62,439 lbs. 9 oz. were quinine Sulphate, of which 10,830 lbs. were sold or distributed in tablet form as "treatments". The following are the rates per lb. at which factory products were sold during 1919-20. Quinine sulphate Rs. 24 to Rs. 26 according to quantities; cinchona febrifuge Rs. 5 to Rs. 7 according to quantities and form; quinoidine tablets Rs. 6 to Rs. 7; cinchonidine sulphate Rs. 11 to Rs. 12; quinoidine in non-tablet form and residual alkaloids Rs. 4.

7. **Expenditure and Receipts.**—The total expenditure was Rs. 12,80,877-11-9, of which Rs. 9,68,844-10-0 represents the year's charges on account of foreign bark and quinine, leaving Rs. 3,12,033-1-9 as the total direct expenditure on the department. The gross receipts were Rs. 20,97,596-15-1, of which Rs. 11,90,995-12-0 were credit and Rs. 9,06,601-3-1 cash. Of the latter, Rs. 2,77,117-0-5 are claimed by the Prisons Department to cover the cost of converting 10,830 lbs. of purified quinine into tablet form and distributing the tablets. The net revenue to be credited to the Cinchona Department is, therefore, Rs. 18,20,479-14-8 and the net surplus for the year Rs. 5,39,602-2-11. This is a handsome money surplus considering that over Rs. 9½ lakhs have gone in the purchase of quinine.

8. **Quinine Reserve and Stock Account.**—The total provincial quinine reserve stood at 50,356 lbs.-11 oz. on the 31st March 1920. This is 44,831 lbs. less than the balance, including the amount under suspense, with which the year opened. The value of stock of all sorts, on the 31st March 1920, was Rs. 15,80,442-14-3, of which quinine sulphate valued at Rs. 14,09,986-4-0 and bark at Rs. 1,25,666 are the principal items.

9. **Block Account.**—The total valuation under this heading is Rs. 21,12,505-0-5, of which buildings stand at Rs. 1,28,011-10-10, machinery at Rs. 74,400-5-7 and plantations at Rs. 19,10,093. Cinchona trees are valued at Rs. 16,32,890 and timber and fuel trees at Rs. 2,77,203.

10. **Profit and Loss Valuation.**—The change since the end of last financial year in valuation of block and stock, expenditure—except capital expenditure—and receipts also being taken into computation, shows a profit balance of Rs. 1,84,177-1-7.

11. **Land Rent.**—From Munsong, Rs. 975-8-6 were paid into the Kalimpong Sub-Treasury to Forest Department account and from Mungpoo, Rs. 4,898-14-6 were paid into the Darjeeling Treasury as land rent and grazing fees.

12. **Staff.**—Lieutenant-Colonel A. T. Gage, I.M.S., was in administrative charge till the 10th October 1919 when he went on combined leave; thereafter, the writer held administrative charge till the end of the year. Mr. G. E. Shaw, B.SC., F.I.C., F.C.S., was Government Quinologist, throughout the year. During April 1919, he was deputed to Burma in connection with the new cinchona scheme. Mr. P. T. Russell was on deputation to Burma during April 1919 and held charge as Manager, Mungpoo Plantation, till the 4th August 1919 when, on the grant of leave, he handed over charge to Mr. H. Thomas. On his return from leave in January, Mr. Russell proceeded to Burma as Superintendent of Cinchona Cultivation in that province. Mr. H. F. Green was Manager of Munsong throughout the year. From the 1st to the 30th April 1919 and from the 4th August to the 31st March 1920, Mr. Thomas officiated as Manager, Mungpoo. Mr. P. V. Osborne, Assistant Manager, Munsong, was transferred to the Royal Botanic Gardens, Sibpur, as Offg. Curator from the 2nd July 1919. Mr. G Holl, Mr. P. W. Cresswell and Mr. J. A. Hulbert officiated as Assistant Managers in the department from the 2nd July 1919, the 8th January 1920 and the 2nd August 1919, respectively. Mr. T. H. Child was appointed temporarily as assistant in the factory from the 7th March 1919 to the 13th August 1919 when he resigned Government service. All the officers of the factory and plantations and the clerical staff performed their duties with their wonted efficiency.

ADDENDUM.

Medicinal Plants other than Cinchona.

Ipecacuanha.—12,500 plants were raised during the year. Of this number, 6,500 were used to fill vacancies among young stock, the remainder being planted in new nurseries. The total number of plants now stands at approximately 76,000. The older plants seeded well and all the seed has been sown. The question of whether or not the cultivation of *Ipecacuanha* can be made to pay is still uncertain. The percentage of losses during the cold weather has been heavy, but if plants can be reared from seed, it may still pay to risk these losses.

Digitalis.—*Digitalis* has been put out at a higher elevation than where it went out on Mungpoo in the earlier stages of its cultivation. The crops came

on very well till heavy hail storms towards the end of the year resulted in the loss of quite 50 per cent. of the leaf, a harvest of 1,800 lbs. only being obtained in lieu of the anticipated 4,000 lbs. A portion of the 1920-21 crop will be put in partially cleared forest only. It is hoped in this manner to secure a break of the full force of hail storms. European methods of drying the leaf have been successfully proved and the product is of high quality. With *digitalis folia* at its present price, the requirements of India could easily be met from home grown supplies.

Chenopodium.—The cultivation of this has been discontinued at least for the present. An area of 15 acres put down produced 2½ maunds per acre, but the yield of oil was so low that it proved unprofitable.

Belladonna.—About three-fourths of an acre of this was planted in February while the crowns were dormant. By planting at this time, a larger crop of leaf should be got the first year as the plants should be spared the check which ensues to growth when transplanting occurs during the growing season.

Lycopodium.—Demands have not come in for this and collection from the natural supply on Mungpoo plantation has ceased, pending evidence of its being required.

C. C. CALDER,

Offg. Superintendent, Royal Botanic Garden, Calcutta, and of Cinchona Cultivation in Bengal.

RESOLUTION ON THE REPORT ON THE WORKING OF THE CO-OPERATIVE SOCIETIES IN BENGAL FOR THE YEAR ENDING THE 30TH JUNE 1920.

GOVERNMENT OF BENGAL,

REVENUE DEPARTMENT.

Agricultural Branch.

CALCUTTA, THE 7TH DECEMBER 1920.

RESOLUTION—No. 10704.

READ—

The report on the working of the Co-operative Societies in Bengal for the year ending the 30th June 1920.

Mr. J. T. Donovan, I.C.S., was in charge of the department till he went on leave on the 23rd March 1920, when he made over charge to Mr. M. Thorp, I.C.S., the Deputy Registrar, who acted for him during the remainder of the year. As a temporary measure, Babu Tarak Chandra Ray, Deputy Collector, on special duty in the Co-operation Department, was appointed to act as Deputy Registrar during the first six months of Mr. Thorp's deputation.

2. During the year under report the total number of societies increased from 4,256 to 5.408 and of members from 179,007 to 217,175 and the working capital from Rs. 2,30,80,156 to Rs. 2.82,61,564. The greatest demand for new societies was in the area affected by the cyclone of the 24th and 25th September. In order to avoid the formation of unsound societies, each application was thoroughly scrutinised and the principles of co-operation were fully explained before the society was admitted to registration. Thus fewer societies were registered than applied. Thirty-eight societies were liquidated during the year as against 81 in the previous year; and 39 were closed without recourse to liquidation. Six new Inspectors were appointed to deal with the increasing number of societies, including a Weaving Expert and a Veterinary Assistant Surgeon. The number of honorary organisers rose from 49 to 67 during the year under review. Twelve additional auditors were appointed, bringing the total number up to 40.

3. During the year the Central Banks advanced Rs. 56½ lakhs and recovered Rs. 36½ lakhs against Rs. 32½ lakhs and Rs. 23 lakhs, respectively, in 1918-19. The large increase in the amount of loans is attributed to the havoc wrought by the cyclone and the general high range of prices; at the same time collections represented on the amount of outstanding loans 51 per cent. against 39 per cent. of the previous year.

Rural credit societies advanced for similar reasons the large sum of Rs. 44 lakhs and recovered Rs. 28 lakhs in 1919-20 against Rs. 28 lakhs and Rs. 23½ lakhs, respectively, in the previous year. The amount of loans overdue to such societies was slightly reduced; and their reserve funds were increased from Rs. 11½ lakhs to Rs. 13¾ lakhs. The Bengal Provincial Co-operative Federation, Limited, continued to make good progress and to render assistance to its affiliated societies in investing their idle funds. Owing to good collections there was little demand from such societies for loans.

4. The number of central banks increased from 58 to 64, their working capital from Rs. 82½ lakhs to Rs. 104 lakhs and their paid-up share capital from Rs. 11¾ lakhs to Rs. 13¾ lakhs. The number of unions decreased from 12 to 6 in the year under review.

5. Agricultural societies increased in numbers from 3.923 at the end of 1918-19 to 4.977 at the end of the year under review. Ninety-two per cent.

of those societies are credit societies, whose membership has risen from 128,471 to 147.923, working capital from Rs. 86½ lakhs to Rs. 104 lakhs and paid-up share capital from Rs. 65,252 to Rs. 1½ lakhs. The increase in share capital is due to the adoption of the share system in order to make the societies financially independent. It is satisfactory to find that the Registrar considers that the day of dishonest office-bearers is on the wane; whilst his remarks in paragraph 20 of his report on the good social and moral effects of the existence of the societies on their members are significant.

6. A feature of the department continued to be the development of agricultural non-credit and non-agricultural societies, of which the number increased from 31 and 262, respectively, in the previous year to 58 and 360 in the year under review. The most important developments amongst agricultural non-credit societies have taken place in irrigation societies in Bankura and in milk societies near Calcutta. The possibilities of irrigation societies in Bankura are receiving the special attention of the co-operative department, and it is hoped that they will be able to take advantage of the provisions of the Bengal Agricultural and Sanitary Drainage Act which was recently passed in Council. The number of milk societies has increased from 19 to 40, which supply from 42 to 52 maunds of milk per day to Calcutta. The Naogaon Ganja Cultivators Co-operative Society made a net profit of Rs. 1¾ lakhs during the year and continued its career of general usefulness in spheres other than ganja cultivation under the guidance of Khan Bahadur Ata-ur-Rahman, Deputy Collector, as its chief executive officer. The Sundarbans Supply and Sale Society made a profit of Rs. 7,035; the society has now decided to erect granaries for storing, and to purchase machinery for husking, paddy. Amongst non-agricultural societies the most remarkable advance was in the demand for Store and Supply societies, of which the number increased from 18 to 65. The increase is due to the prevailing high prices. Such societies are, it is reported, doing well on the whole, whilst the demand is on the increase. There was an increase of 20 non-agricultural credit societies and of 28 societies amongst weavers. In this connection the Bankura District Co-operative Industrial Union continued its useful activity. It provided employment for 550 families of weavers, supplied finished cloth worth Rs. 1,37,668 and made a profit of Rs. 7,351.

7. The Bengal Co-operative Organisation Society which also aims at being a central bureau of information and advice on matters relating to co-operation, continued to do useful propaganda work by means of lectures and through its organs, "The Bengal, Bihar and Orissa Co-operative Journal" and the "Bhandar." The Governor in Council appreciates the work which is being done by it and its members, in particular by Professor J. C. Coyajee and Professor P. Mukharjee.

8. The thanks of the Governor in Council are due to Mr. Donovan for the zeal and energy shown by him in his conduct of the affairs of the department and to Mr. M. Thorp for its efficient administration during the latter part of the year. His Excellency in Council observes with pleasure the remarks of the Registrar on the good work of the different officers employed in the department; and he has much pleasure in recording his appreciation of the value of the help given by numerous officials and non-officials to it.

By order of the Governor in Council,

M. C. McALPIN,

Secy. to the Govt. of Bengal.

THE TRIENNIAL REPORT ON THE WORKING OF THE HOSPITALS AND DISPENSARIES IN THE BENGAL PRESIDENCY FOR THE YEARS 1917, 1918 AND 1919.

GOVERNMENT OF BENGAL.

FINANCIAL DEPARTMENT.

Medical Branch.

CALCUTTA, THE 7TH DECEMBER 1920.

RESOLUTION—No. 2156Medl.

READ—

The Triennial Report on the working of the hospitals and dispensaries in the Bengal Presidency for the years 1917, 1918 and 1919.

Major-General W. R. Edwards, C.B., C.M.G., M.D., I.M.S., was in charge of the medical administration of the Presidency during the first year of the triennium, and, pending the arrival of his successor, Major-General W. H. B. Robinson, C.B., K.H.S., I.M.S., Lt.-Colonel Sir Walter Buchanan, I.M.S., Inspector-General of Prisons, Bengal, held charge of the office of the Surgeon-General from the 3rd January to the 11th March 1918, in addition to his own duties. Major-General Robinson assumed charge on the 12th March 1918. During his absence on leave from the 6th March to the 27th November 1919, Colonel J. K. Close, I.M.S., acted for him.

2. The Medical Department had to work under the same adverse conditions as in the preceding three years for the reason that not only, with few exceptions, were the medical officers, who had been deputed from Bengal to military service, not allowed to revert, but there were 65 further deputations to the Military Department during the triennium, against 52 reversions. The total number of officers on deputation to military duty from the Presidency of Bengal was 132, consisting of 20 I.M.S. officers, 21 military assistant surgeons, 28 civil assistant surgeons (both permanent and temporary) and 63 civil sub-assistant surgeons. This serious and continuous drain upon the resources of the province, though necessitated by emergencies which it was incumbent upon Bengal, alike with other provinces, to assist in meeting, has meant that work has been carried on in most unfavourable circumstances, and even to carry on has imposed a heavy strain on all concerned.

3. During the last three years there were 14 deaths, 25 retirements, 3 resignations and 2 dismissals among the officers under the Medical Department. Among those who died were two eminent members of the I.M.S., viz., Lt.-Colonel R. Bird, M.V.O., and Lt.-Colonel C. R. Stevens, both brilliant surgeons and distinguished professors of the Calcutta Medical College, and in them the Medical Department has suffered a great loss. Seven I.M.S. officers retired, including Lt.-Colonel J. T. Calvert, C.I.E., who had held with distinction the responsible post of Principal of the Medical College and Superintendent of the Medical College Hospitals, Calcutta, for several years.

4. During the period under review the pay of almost all classes of officers in the Department has been revised. The pay of I.M.S. officers in civil employ was increased with effect from the 1st December 1918, and that of sub-assistant surgeons from the 1st June 1918. The pay and prospects of compounders in Bengal, as well as of clerks in civil surgeons' offices and of the menials in all medical institutions under Government, were also improved last year. A revised scale of pay has recently been sanctioned for the civil assistant surgeons of the Presidency.

5. **Medical Education.**—The need for a greater number of qualified medical practitioners has received the earnest attention of Government. In order to meet this demand, the sanctioned strength of the students at the existing Government Medical Schools at Calcutta and Dacca has been raised

to 500 and 400, respectively, while the establishment of a new medical school at Burdwan has been sanctioned, with accommodation for 200 students. It is hoped that it will be opened next year. The question of establishing medical schools at other suitable centres is also under consideration, and, in particular, a scheme in connection with the enlarged and improved hospital at Mymensingh is being elaborated. But it is necessary to proceed with some caution; each new school involves considerable capital and recurring expenditure, and the maintenance of an efficient hospital alongside of it is an essential condition of its success or, indeed, of its feasibility. The actual working of these institutions, too, in the smaller mufassal towns has still to be seen. The Carmichael Medical College at Belgachia, which also affords facilities for higher medical education, has now succeeded in obtaining affiliation up to the final M.B. examination of the Calcutta University, thanks largely to the liberal financial assistance afforded to it by Government.

6. The School of Tropical Medicine at Calcutta was completed four years ago, but could not be opened on account of conditions arising out of the war, and this has been among the most unfortunate results of the dislocation of the Department. In 1917 it was decided that the school, which was originally designed to teach only for the diploma in Tropical Medicine, should be combined with a new Institute of Hygiene, thus rendering necessary the construction of additional buildings. Revised proposals for the increased staff and for an extended syllabus required for the combined institution are now under the consideration of the Government of India, and it is hoped that there will be little further delay in opening the school and the Carmichael Hospital for Tropical Diseases attached to it. Research work will also be started shortly in connection with the school, out of the funds generously contributed by the Indian Tea, Jute and Mining Associations and certain private firms and gentlemen.

7. A scheme has also been drawn up for the establishment of a Dental School to be attached to the Calcutta Medical College, involving the construction of buildings at an estimated cost of Rs. 3,66,000. The work will be taken up as soon as funds are forthcoming.

8. The arrangements introduced in 1912, for holding post-graduate courses in the Government medical schools for the benefit of private doctors working in local fund dispensaries continued, and during the last three years 23 medical practitioners employed in District Board and Municipal dispensaries attended the class opened for them at the Campbell Medical School. A scheme for the post-graduate training of civil assistant surgeons and sub-assistant surgeons in place of the existing departmental examinations for promotion is under consideration.

9. The supervision and training of the nursing staff at the Presidency General Hospital was, as usual, undertaken by the Sisters of the Community of St. John the Baptist, and at the Medical College Hospitals by a lady superintendent assisted by five senior nursing sisters all trained in England. The training of Indian nurses under the scheme inaugurated by Lady Carmichael was continued in two institutions, *viz.*, the Sambhunath Pandit Hospital and the Charteris Hospital at Kalimpong, the course at the Darjeeling Victoria Hospital being discontinued. A similar arrangement for training Indian nurses is being made at the Mitford Hospital, Dacca.

10. The work of the Serological Department at the Calcutta Medical College is steadily increasing, and in order to cope with this increase, the Government of India have lately sanctioned the appointment of two additional assistants, one for medico-legal work and the other for carrying out the diagnosis of syphilis by the Wasserman reaction. This department has suffered severely by the untimely death of the distinguished serologist, Lt.-Colonel W. D. Sutherland, C.I.E., I.M.S., who had been in charge of the department from its establishment.

11. **Calcutta Hospitals.**—Though all the Government hospitals in Calcutta are more or less overcrowded, incurables and permanent cripples always occupy a considerable number of beds, especially at the Campbell Hospital. The establishment of a separate hospital for incurables in Calcutta has become a matter of urgent necessity and the matter is receiving

attention. The want of a convalescent home near the city to relieve the pressure on the Medical College and other hospitals has also been brought to notice. Another long-felt need is the provision of a suitable infectious diseases hospital. In 1917 a committee of six members was appointed by Government to consider the matter and to select a site outside municipal limits. After much delay, the committee came to the conclusion that two hospitals for the treatment of infectious diseases are required in Calcutta, one for the northern and the other for the southern part of the city, although the former should take precedence. The co-operation of the Calcutta Corporation has recently been sought.

The scheme of having honorary medical officers on the staffs of the Sambhunath Pandit and Mayo Hospitals continues to prove satisfactory. The Howrah General Hospital has also recently enlisted the honorary services of two independent medical practitioners, who are reported to be rendering good service. The system of appointing medical men outside the ranks of Government service to the house appointments of the Medical College Hospitals has not, however, proved a success, and it has now been decided to appoint civil assistant surgeons to the senior posts, the junior appointments being held, as before, by private medical men.

The expenditure, especially on Government institutions, shows a considerable increase during the period under review in comparison with that of the preceding three years. This increase is due mainly to the high cost of diet, clothing, medical stores, dressing materials, the enhancement of the pay of establishments, the construction of certain important buildings and the acquisition of land required for expansion, but these ever-growing demands absorb a large proportion of the provincial resources, in view of which *mufassal* wants are apt to come off badly. Amongst the projects undertaken during the last three years, the following are the most important, viz :—

	Rs.
Acquisition of land for the extension of the compound of the Medical College Hospitals	8,66,160
Acquisition of land for the new Eye Hospital ...	1,66,494
Construction of servants' quarters, Medical College Hospital	4,79,786
Construction of servants' quarters, Campbell Hospital ...	1,39,512
Construction of a tuberculosis ward at the Medical College Hospitals	41,593
Purchase of 3, Lee Road, for quarters of the nursing superintendent and supervising nurses of the Sambhunath Pandit Hospital	90,125
Acquisition of land for students' hostels at the Medical College	7,05,000
Improvements at the Campbell Hospital	1,97,591
Grants-in-aid to the Carmichael Medical College ...	5,00,000 (in addition to the annual recurring grant of Rs. 50,000)

New nurses' quarters and the Eye Hospital are at present under construction at the Medical College, and it is hoped that the much needed extension of the Eden Hospital will be shortly commenced.

The total cost of the upkeep of the Calcutta Hospitals amounted to Rs. 66,61,090 in the three years under notice as compared with Rs. 44,23,748 in the preceding three years, rising from Rs. 16,42,995 in 1917 to Rs. 21,14,443 in 1918, and Rs. 29,03,660 in 1919. The total receipts of all classes of institutions amounted to Rs. 70,57,079 during the three years, of which Government contributed Rs. 50,71,040, or 71·87 per cent., as compared with Rs. 20,17,242, or 67·5 per cent., in the previous triennium. Of the amount contributed by Government Rs. 46,38,463 was on account of the upkeep of Government institutions, against Rs. 27,88,411 in the preceding three years. The amount of subscriptions and donations received from the public was Rs. 1,20,267 in 1917, Rs. 1,50,237 in 1918 and Rs. 60,692 in 1919, or 6·96, 6·60 and 1·98 per cent., respectively, of the total receipts, the last year showing a

most disappointing decline. The obligation of contributing liberally towards these charitable institutions is but inadequately met by the Calcutta public, and there is ample scope for greater private liberality than has hitherto been displayed.

The total number of in-door patients treated at the Calcutta Hospitals increased from 95,740 to 107,632 during the triennium, and the out-door patients from 1,095,483 to 1,230,994, *i. e.*, the out-door attendance exceeded the figures for the previous triennium by 135,511. These increases are to be attributed partly to the prevalence of epidemic diseases, *e.g.*, influenza and small-pox. The number of beds available in these hospitals, viz., 2,385 during the last triennium, against 2,323 beds available during the previous three years, shows a slight increase. The nursing arrangements at the various hospitals continued to be satisfactory, though modern economic conditions led to considerable improvements in the prospects of the staff. The Medical College and the Presidency General Hospitals are, however, in need of more nurses for the new extensions, but they cannot be appointed until additional quarters are built for them and more money is forthcoming to meet the extra cost involved. The provision of proper nursing is absolutely essential to the efficiency of these institutions, and failing greater public support they cannot but be severely handicapped.

12. **Hospitals and Dispensaries outside Calcutta.**—The triennium under notice opened with 700 hospitals and dispensaries outside Calcutta. Altogether 77 new dispensaries came into existence during the three years and 12 were closed. Of the 765 institutions thus remaining at the close of the triennium, 19 were State public, 46 State special, 408 local fund, 87 private aided, 158 private non-aided and 52 railway dispensaries. In spite of this increase the number of dispensaries in the *mufassal* still fails to keep pace with the demand for medical assistance. The urgency of the matter has on more than one occasion been brought to the attention of District Boards, and the Governor in Council trusts that they will continue energetically their efforts to establish new hospitals and dispensaries in the areas in which medical relief is still not available.

An annual average of 6,471,403 out-door and 69,620 in-door patients were treated in *mufassal* institutions, compared with 5,725,611 and 61,402 during the previous triennium. The nursing arrangements in these hospitals are generally very defective and, except in a few instances, are still left to the relatives of patients or to the hospital dressers, compounders, and ward coolies. Want of funds is the chief obstacle in the way of remedying this very serious defect.

There was a marked increase in the cost of upkeep of the hospitals and dispensaries in the mufassal, as in Calcutta, due to similar causes. The total expenditure of all State public (class I), local fund (class III) and private aided (class IV) hospitals and dispensaries outside Calcutta amounted to Rs. 40,93,332 during the triennium under review, as compared with Rs. 35,02,595 in the previous three years, while the total receipts amounted to Rs. 42,63,781, against Rs. 36,83,664. The Government contributions formed 12·66 per cent. of the total income in 1917, 11·28 per cent. in 1918 and 12·82 per cent. in 1919, while local fund contributions amounted to 40·10 per cent., 42·10 per cent. and 42·88 per cent., respectively, of the total income of those years. The public subscriptions and donations received during the last three years show an increase from Rs. 2,67,595 in 1917 to Rs. 2,85,989 in 1919 (or 18·41 per cent. of the total income), but they are still lamentably inadequate to permit of these institutions being placed upon a satisfactory footing. In fact the finances of *mufassal* hospitals are at present in an exceedingly precarious position. Recent enhancements in the cost of nearly everything have seriously embarrassed work, and instances of full use failing to be made, for pecuniary reasons, even of the insufficient number of beds which exist, are by no means few. The experiment was initiated on a small scale of subsidising private practitioners in order to induce them to settle in the interior, and it should be capable of expansion with advantage.

13. **Leprosy.**—This disease is treated chiefly in the three leper asylums at Gobra, Raniganj and Bankura. The first is maintained by Government, while the other two are under the Mission to Lepers, helped by Government. The scale of capitation grants paid from provincial revenues for adult lepers treated in the last two asylums was raised from Re. 1-8 to Rs. 4 per head per mensem with effect from April 1919, and that for the untainted children of lepers to Rs. 2 per child. The Gobra Leper Asylum had an annual average population of 396, while the population at the Raniganj and Bankura asylums averaged 317 and 176 a year respectively.

The Lepers Act has been amended so as to widen the definition of a statutory leper. The arrangements at present existing in the leper asylums are not up to date, while the accommodation provided therein is also insufficient. A more satisfactory way of dealing with the problem is to open large leper colonies or settlements, and the question of establishing a leper colony is engaging the attention of Government. The difficulty will be mainly financial.

14. The thanks of Government are due to Major-General Robinson and all the officers under him, especially the few remaining in the Indian Medical Service, who uncomplainingly have borne the strain of the last three years. Civil assistant surgeons had unique opportunities of showing their worth as officiating civil surgeons and gave satisfaction in many respects. They also got ample opportunities of volunteering for temporary commissions in the Indian Medical Service, and those who did so have reaped valuable experience. Altogether 17 permanent and 20 temporary officers of this class have been awarded temporary commissions since the outbreak of the war, and it is satisfactory to note that two officers, one permanent and one temporary, were granted permanent commissions in the Indian Medical Service last year.

By order of the Governor in Council,

A. MARR,
Secy. to the Govt. of Bengal.

IRRIGATION DEPART

Statement showing heights over mean sea-level and low water in the August 1920, and the highest reading of each gauge over

RIVER GANGES.

Sanitary Commissioner for Bengal.

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 2nd December 1920.

Summary.—The week was rainless. Harvesting of winter paddy is proceeding under favourable weather conditions. A good progress in sowings has been made of spring crops. The prospects are generally reported to be satisfactory, but some moisture is required for their growth. The average price of common rice for the province has fallen by about 3·55 per cent. as compared with that of the previous week.

REPORT ON THE WORKING OF THE LICENSED WAREHOUSE AND FIRE BRIGADE ACT FOR THE YEAR ENDING 31st MARCH 1920.

NOTIFICATION.

No. 2986M.—The 8th December 1920.—The following is published for general information, under section 41 of the Licensed Warehouse and Fire-Brigade Act, 1893 (Bengal Act I of 1893).

L. S. S. O'MALLEY,
Secy. to the Govt. of Bengal.

No. F.B. 49-20—1269, dated Calcutta, the 30th November 1920.

From—R. CLARKE, ESQ., C.I.E., Commissioner of Police, Calcutta.
To—The Secretary to the Government of Bengal, Municipal Dept.

IN accordance with paragraph 41, section 2 of the Licensed Warehouse and Fire Brigade Act (I of 1893), I have the honour to submit herewith the report on the working of the Fire Brigade and Ambulance Department for the year ending the 31st March 1920.

No. F. B. 49-20—952B., dated Calcutta, the 11th November 1920.

From—R. CLARKE, ESQ., C.I.E., Commissioner of Police, Calcutta.
To—The Secretary to the Government of Bengal, Municipal Dept.

I HAVE the honour to submit herewith the report of the Chief Officer of the Calcutta Fire Brigade for the financial year ending 31st March 1920.

The Chief Officer's report gives the full details in connection with the working of the Brigade, and I need not recapitulate these.

The question of the water-supply in the districts of Howrah and Chitpore demands immediate attention as these areas comprise very dangerous fire risks.

The Brigade has worked extremely well during the year, and I am glad to report that there were no accidents to the members while engaged on actual fire work.

No. F.B. 49-20—952A., dated Calcutta, the 11th November 1920.

From—W. JARRETT, ESQ., Offg. Chief Officer, Fire Brigade, Calcutta.
To—The Secretary to the Government of Bengal, Municipal Dept.
(Through R. Clarke, ESQ., C.I.E., Commissioner of Police, Calcutta.)

I HAVE the honour to submit the following report on the working of the Calcutta Fire Brigade for the financial year ending the 31st March 1920.

I have been in charge of the Fire Brigade from the 27th February 1920, on which date Captain B. A. Westbrook, the permanent Chief Officer, went on leave.

2. **Financial Statement.**—The statements of the receipts and expenditure and payments made by the municipalities within the jurisdiction of the Fire Brigade Act, I of 1893, is given in Appendix I.

All the municipalities have fully contributed their share excepting Cossipore-Chitpur. This municipality covers the most important and dangerous district containing several jute presses and very heavy fire risks.

3. **Fires, etc.**—The total numbers of fires or supposed fires dealt with by the Fire Brigade during the year under review is 550, being an increase of 10 as compared with the previous year. Turn-outs may be classified as under :—

Fires	425
False alarms	124
Calls for special service	1

It is unsatisfactory to note that no less than 73 of the above false alarms were assumed to be wilful. In only three instances were the offenders arrested by the police and dealt with. The Fire Alarm system has proved however to be most useful as undoubtedly many serious fires have been averted due to this rapid means of communicating with the Brigade.

The actual number of calls received during the year was 811 as compared with 825 in 1918-19. This figure includes several instances where

more than one call was received for the same fire. The means by which these calls were received by the Brigade are given in Appendix II.

On one	day	7	fires or supposed fires	occurred ...	7
On four	days	6	ditto	ditto ...	24
On eight	,,	5	ditto	ditto ...	40
On eighteen	,,	4	ditto	ditto ...	72
On forty-five	,,	3	ditto	ditto ...	135
On seventy-five	,,	2	ditto	ditto ...	150
On one hundred and twenty-two	,,	1	ditto	ditto ...	122
273 days				Total ...	550

Thirty-eight fires occurred in the premises licensed under the Licensed Warehouse and Fire Brigade Act, I of 1893, as compared with 24 in the previous year. The nature of the trades requiring licenses under the Act are enumerated in Appendix XVII.

4. **Fire Loss.**—The damage caused by fire and water during the year was estimated at Rs. 28,13,022 being an increase of Rs. 12,62,748 over the last year and of Rs. 17,75,218 over the average for the past nine years. The increase of fire loss is due to several serious jute fires in the Chitpore and Howrah areas which could not be rapidly controlled owing to the inadequate water-supply. The most serious outbreak was the fire at the Hanuman Jute Press, Ghoosery, Howrah, where the damage was estimated at about Rs. 10,00,000, and in this case water had to be brought from a tank 1,000 yards away. The average damage per fire during the year was Rs. 5,115 as compared with Rs. 3,635 for the past nine years.

5. The following summaries are given in the Appendices shown against each :—

	Appendix
Districts in which fires or supposed fires occurred ...	III
The number of fires on every day and month throughout the year	IV
Daily and hourly summary of fires or supposed fires ...	V
Damage caused by fire, etc., in various districts ...	VI
Classification of fires and calls	VII
Means by which fires were extinguished	VIII
Short reports of fires Rs. 1,000 damage and over ...	IX
Causes of fires and buildings affected	XV
Comparative statement for the past eleven years	XVIII

6. **Appliances.**—Appendix X shows the present distribution of the principal appliances in use by the Brigade, and Appendix XI gives the number of times each appliance has been turned out in response to fire calls, with monthly figures.

It is estimated that motor appliances travelled 4.230 miles and horse-drawn appliances 240½ miles during the year in responding to and returning from calls.

Delivery has been received of a motor fire engine with a Rees-Roturbo Pump from Messrs. Leyland & Co. on 20th November 1919, and of a 60-65 B. H. P., Dennis Fire Engine of 500 gallons capacity on 20th January 1920, which have been added to increase the efficiency of the Brigade. Another fire engine on order is still due and delivery is expected very shortly.

7. **Fire Stations.**—Appendix XII gives the number of times each station has been turned out in response to fire calls, together with monthly figures.

The Fire Brigade Headquarters are still situated in the premises temporarily hired from the Samavaya Corporation, Limited, at a high monthly rental and I regret I am unable to record progress in the provision of the permanent headquarters as unfortunately no suitable site could be obtained at present.

During the year under review arrangement has been made to erect a new district fire station in the Central Avenue on the site formerly occupied by the pumping station.

I am pleased to be able to report that the building is now in course of construction, and it is expected to be occupied during the year.

Plans and estimates have been prepared for the extension of the Chitpore Fire Station, and for this purpose a portion of land has been transferred to the Fire Brigade by Government, but as there are no funds for the purpose the work has been deferred to the next year.

The district fire station at Howrah remains the same and requires remodelling and extending. It is hoped that arrangements will be made to take up this work very shortly.

It has been decided that Government will appoint a Committee to consider the question of fire control in the port area and the docks, and it is hoped that the matter will be put on a proper footing. It was suggested that a district station be erected at the Kidderpore Docks to protect the docks and also to respond to the calls in Kidderpore, Watgunge and Garden Reach areas. When this station is erected the existing small fire stations at Garden Reach and Watgunge will be vacated.

Arrangements are in progress to provide a fire station in the Sova Bazar section which will undoubtedly improve the situation in the northern town.

8. **Staff.**—The total strength of the Fire Bridge is 221. The general conduct and discipline has been good.

Although the scale of pay has been revised lately it is insufficient to balance the general increase in the cost of living, and there has been a general discontent among the staff, inasmuch as they frequently leave the Fire Brigade for higher pay and better prospects outside. It has also been found very difficult to recruit a suitable class of men on the existing pay, and if no appreciable enhancement is made very soon it is feared that the Fire Brigade will lose all its experienced hands. The matter will be shortly placed before Government, and it is hoped that it will receive urgent and favourable consideration.

9. **Fatalities and Accidents.**—Short details of fires and calls involving loss of life and accidents are given in Appendix XIV.

I am glad to be able to report that the members of the Calcutta Fire Brigade have been remarkably free from serious accidents.

The total number of fatalities during the year was 46 as compared with 10 in the previous year. Of these only one was a case of suicide by burning.

First aid was rendered in almost all the cases by the Fire Brigade and the injured persons were conveyed to hospital.

10. **Horses.**—There are at present 12 horses against 16 in the previous year. Four have been cast and sold during the year. When the motorisation of the Brigade is fully effected horse traction will be discontinued.

11. **Water-Supply.**—The reports for previous years contain full details of the exact situation as regards water-supply.

The position in the Howrah and Chitpore districts is exceptionally dangerous, and although it was reported to the responsible authorities several times, nothing has been done to provide for an adequate water-supply for fire extinguishing purposes. The attention of Government has been drawn to this fact in letter No. F. B. 95-9217, dated the 21st November 1919.

The fire which occurred at the Hapuman Press, Ghoosery, Howrah, on the 8th day of January 1920 was the most serious fire for several years in the area protected by the Calcutta Fire Brigade. I trust that this fire, in a very dangerous industrial district, may serve the purpose of emphasising the previous representations on the subject, and that an adequate water-supply will be installed both at Howrah and Chitpore.

The press concerned is located in an increasingly important and congested industrial district, and no provision whatsoever has been made for the supply of water for fire extinguishing, notwithstanding repeated representations to the authorities concerned.

Reliance for this purpose has been placed on various tanks in the vicinity of the presses and from the river.

In reference to the tanks, the practice of filling them up on sanitary grounds has been carried on extensively for the past few years, and now the nearest available tank to the Press destroyed is well over 1,000 yards. The danger of filling up these tanks before a water-supply has been installed has been several times pointed out to the Howrah Municipality.

So far as the river is concerned it may be noted that for several years past the Annual Reports have urged the extreme necessity for the provision of a modern fire float, as the fire float which was provided and maintained by the Port Commissioners was old and unsuitable for the work. Since the last Annual Report that fire float has been sunk in the river and cannot be salvaged.

At present the port of Calcutta and the districts adjoining the river are in the peculiarly bad position of having to rely upon a land steam fire engine placed on board a hopper barge and used as a fire float. The Hopper barge is unable to proceed against the stream at certain times.

The river being the only practical method of obtaining water for two large industrial areas, viz., Chitpore and Sulkea, etc., it is extremely important to have an up-to-date fire float without delay. The present conditions would not be tolerated in any other large city in the world.

Both the districts mentioned, but especially Sulkea, are becoming exceedingly congested, totally insufficient space being left between jute, etc., godowns to give the Fire Brigade, even with a good water-supply, a reasonable chance of confining a fire to the godown in which it originated.

Under the Licensed Warehouse and Fire Brigade Act plans are required to be submitted before godowns are sanctioned, but in many instances of late godowns have been erected, and actually stocked with jute, etc, before the submission of plans. Representations have been made on this matter to the Howrah Municipality with, I fear, but little effect.

In reference to the congestion of industrial risks it may be noted that there is little difficulty in obtaining a policy from the Insurance Companies to cover any risk. That no doubt, has a great deal to do with congestion and the danger of fires spreading, as, if Insurance Companies insisted on sufficient space being allotted for each erection and water provided, considerably more care and precaution would be taken.

The economical aspect of the subject appears to have been lost sight of. Owners of presses, etc., are contented when they are covered by insurance, but for the welfare of the country generally it must be remembered that when a fire takes places the value of the buildings and contents are irretrievably lost, and the country is so much the poorer.

The increasing popularity of insurance in India materially enlarges the responsibilities of the Fire Brigade, and it may be noted that the absence of water-supply and congestion of industrial risks particularly in Chitpur and Howrah (Sulkea and Ghoosery) render it necessary to maintain a much larger staff of firemen and appliances than would otherwise be required. The risks in Howrah and Chitpur are entirely responsible for a very large proportion of the Fire Brigade, especially as these municipalities have made no provision for water-supply and in fact, are continually reducing the available supply. Further these municipalities are not paying attention to subdividing fire risks, and the prospects of extremely serious fires are very apparent.

Moreover at these serious fires the attention of the Fire Brigade is required often for a week or ten days thus reducing the available staff for the protection of the remaining portion of the jurisdiction of the Calcutta Fire Brigade.

In connection with floating fire appliances for the protection of shippings etc., on the river, and property contiguous to the river, I regret to have to report again that an extremely serious state of affairs exists. It is much

more serious now than formerly, as not only has the volume of shipping increased considerably, and many more properties have been erected near to the river, but the only fire float in existence in the port collided with Howrah Bridge and sunk on 14th June 1919.

As already remarked the only means now provided for the protection of shipping or supplying water for riverside fires is an old pattern steam fire engine placed on a hopper barge. It may be noted that the responsibility for fires in the river rests with the Port Commissioners, and that in 1913 an order was placed by them for an up-to-date fire float. In 1914 this appliance was practically completed, but on the outbreak of hostilities, it was commandeered by the Admiralty and used by that department throughout the war.

For some considerable time no further action has been taken by the Port Commissioners for the provision of a floating fire appliance commensurate with the needs of the port, and the matter was held up pending the decision of Government as to whether the protection from fire of all shipping, etc. should be taken over by the Calcutta Fire Brigade or remain as it is at present.

Subsequently, however, Government issued instructions to the Port Commissioners to proceed without delay with the provision of the fire float leaving the financial considerations, and I am glad to report that the Commissioners of the Port of Calcutta have placed an order with Messrs. Merryweather & Sons, Ltd., and it is hoped that the new fire float will be provided as quickly as possible.

I have to thank the officers of Water Works Department of the Calcutta Corporation for their constant endeavours to improve the water-supply and for their prompt attention to any complaints which have been made.

12. **Street Fire Alarms, Telephones and Electrical communications.**—Appendix II shows the means by which fire calls have been transmitted to the Fire Brigade.

Appendix XVI gives the position of the Street fire alarms in commission.

I am pleased to have the opportunity of thanking the Bengal Telephone Co. for their continuous interest in all matters concerning Fire Brigade work and the keeping of the fire alarm system and telephones in good working order.

13. **Inspection Department, theatres and places of public amusement.**—A considerable amount of work has been carried out to safeguard the public in places of amusement, but still much remains to be done. (Direct Fire Alarm connections with the Fire Brigade Headquarters have been installed in all the Theatres and the Museum). The fines imposed on theatres for breach of the bye-laws in the Municipal Court during the year amounted to Rs. 11,315 as against Rs. 3,250 in the previous year.

In connection with the Licensed Warehouse and Fire Brigade Act, I of 1893, during the year under review 4,979 inspections have been made (exclusive of theatres and places of public amusement), 5,012 application for licenses and complaints have been attended to and disposed of.

Two hundred and seventy one prosecutions were instituted under section 14 of Act I of 1893 which resulted in 233 persons being fined aggregating in all, Rs. 3,468, 16 persons being warned and 22 cases withdrawn and filed.

Five licenses were refused as the sites were not considered suitable and in conformity with requirements from the Fire Brigade point of view.

14. **Fire Brigade Work Shops.**—A large amount of work has been done in the Fire Brigade workshops in keeping the appliances in good order, and it is hoped, that the workshops will be fitted with up-to-date machines and sufficient men to cope with the large amount of work required to be done there. I am pleased to commend Station Officer Mr. F. Tucker, who is at present in charge of the workshops, for the exceptional meritorious service rendered by him throughout the year, although the special allowance granted to him has ceased under Government orders.

15. **Office.**—The work of the office has considerably increased and more responsibility has been thrown on it owing to the inauguration of the Stores Department and the centralisation of all the accounts, etc. at the Fire Brigade

headquarters. Much credit is due to the Head Clerk Babu K. C. Sen Gupta, who has greatly helped to organise and to bring the office up to its present standard of efficiency. I am pleased to report that there appears to be no serious accounts objection during the audit of the last four years.

16. **General.**—The Calcutta Fire Brigade protects the municipalities of Calcutta, Cossipore-Chitpur, Howrah, Maniktolla and Garden Reach and may attend fires outside the boundaries of these municipalities but not exceeding a radius of 6 miles from the Central Fire Station, provided that appliances can be spared and on payment of a prescribed fee. Appendix XIX gives the Government order relating to this and the form which should be signed prior to the Fire Brigade leaving the jurisdiction of the above municipalities.

The actual area protected by the Calcutta Fire Brigade is just over 113 square miles and the population included in same is about 1½ millions.

Great progress has been made by the Inspection Department in safeguarding fire risks, and it is necessary that this department should be increased to fully and efficiently deal with the amount of the work which devolves on it.

On the occasion of the riots in April 1919 the Fire Brigade had no less than 9 calls and the engines and the men had to face serious risks at the hands of the rioters, and I am pleased to report that nothing serious occurred excepting slight injuries to the men with stones.

I am pleased to be in a position to report that the officers of the Fire Brigade rendered honest and hard services throughout the year for which my thanks are due to them.

17. **Ambulance Service.**—The Motor Ambulance Service continues to do a lot of valuable work, no less than 16,060 calls having been received during the year under review as compared with 8,792 calls in the previous year. The number of miles travelled by motor ambulances during the year is 63,961 as compared with 43,039 during the previous year.

During the year the service has been supplemented by 2 Ford Non-infectious ambulances and one extra Infectious car for the epidemic season.

Appendix XXI gives the number of calls received every day and month throughout the year, and Appendix XXII gives the scale of charges for the use of the motor ambulances.

The Ambulance Department is financially maintained by Government and the Corporation of Calcutta at the proportion of one-third and two-thirds respectively. Appendix XX gives a statement of receipts and expenditure incurred by the motor ambulance service.

N.B.—Some of the Appendices referred to in the above report are not reprinted in the Gazette.

APPENDIX I.

Abstract of Receipts and Disbursements of the Fire Brigade Fund for the year ending 31st March 1920.

APPENDIX IX.

Short reports of fires of Rs. 1,000 damage and upwards in 1919-20.

Date.	Time of call.	Address.	Trade	Extinguished by	Remarks.
1919.					
1st April ...	1-37 P.M.	2, Bagmari Road Maniktolla.	Dwelling house	One motor pump	Two stacks of straw and a *gol-patta* hut comprising about six rooms severely damaged by fire and water.
3rd „ ...	3-25 P.M.	Hooghly Hydraulic Press, Chitpur.	Jute Press ...	Three motor Pumps, two steam fire engines and fire float.	A brick-built two-storeyed jute warehouse about 200′ × 50′ of which the upper floor used for assorting jute and the ground floor used for storing baled jute. Roofs and wall collapsed. Considerable difficulty with water-supply. Building and contents severely damaged by fire and water.
8th „ ...	7-59 A.M.	Block C, No. 1 Warehouse, Port Commissioners' Juggernath Ghat Road.	Ware house ...	One motor pump	A single-storeyed brick-built warehouse about 200′ × 45′ containing Indian corn in sacks. Building and contents slightly damaged by fire and water.
8th „ ...	12-49 P.M.	Ashcroft Jute Press, Chitpur.	Jute Press ...	Two motor pumps two steam fire engines and fire float.	A double-storeyed brick-built warehouse about 200′ × 60′. The ground floor containing about 5,000 bales of jute and the upper floor containing some loose jute. Building collapsed and contents severally damaged by fire and water. Inadequate water-supply and large quantity of hose had to be used.
12th „ ...	12-44 P.M.	Strand Road ...	Motor Car ...	Hydrant ...	Taxi Cab No. A119 very severely damaged.
12th „ ...	12-53 P.M.	Grand Trunk Road near Chandmari Bridge, Howrah	Shops ...	One steam fire engine.	A brick-built building divided into four small shops severely damaged by fire and water.
14th „ ...	2-40 A.M.	4-1, Gobind Chandra Dey Lane.	Warehouse ...	Two motor pumps	A two-storeyed brick-built warehouse containing about 5,000 bales of cotton goods on ground floor damaged by fire and water.
18th „ ...	4 P.M.	67-4-2, Boloram Dey Street.	Dwelling house	Ditto ...	A quantity of wooden bobbins on roof of a three-storeyed brick-built residence damaged by fire and water. Building slightly damaged.
19th „ ...	6-46 A.M.	Nasmyth's Press Ghoosery, Howrah.	Jute Press ...	One motor pump one steamer and and mill appliances.	A single-storeyed brick-built warehouse about 250′ × 25′ containing a quantity of loose hemp. Contents severely damaged by fire and water.
21st „ ...	11-51 P.M.	Nasmyth's Press Ghoosery, Howrah.	Ditto ...	One steam fire engine and private appliances.	A brick-built godown about 230′ × 25′ containing about 230 bales of jute and a quantity of loose jute. Building and contents damaged by fire and water.
28th „ ...	5-15 A.M.	66, Grey Street...	Godown ...	Two motor pumps and hydrant.	A corrugated iron shed about 50′ × 25′ divided into two compartments used for storage of flour and rice. Building and contents severely damaged by fire and water.

Date.	Time of call.	Address.	Trade.	Extinguished by	Remarks.
1919					
29th April ...	2-30 P.M.	21, Canal South Road.	Bustee ...	One motor pump and one Valiant engine.	One bustee consisting of four huts and two straw stacks about 60' × 30'.
30th „ ...	8-46 P.M.	Talla North Road, Chitpur.	Dwelling huts	One motor pump	Seventy-four *golpatta* tiled huts and corrugated sheds.
1st May ...	10 P.M.	43, Garden Reach Road.	Godown ...	Ditto ...	A corrugated iron shed containing paint and oil.
3rd „ ...	7-34 P.M.	28, Coal Berth, Kidderpore Docks.	Warehouse ...	Ditto ...	One truck containing about 10,000 gallons of petrol and castor oil and one truck containing Government tents.
7th „ ...	10-26 A.M.	No. 5 Shed, E. B. Railway, Cossipur.	Godown ...	Two motor pumps, one steam fire engine and one valiant fire engine.	A corrugated godown containing about 2,152 bales and 788½ bales of jute.
10th „ ...	11-59 A.M.	No. 10 Shed, Kidderpore Docks.	Warehouse ...	Two motor pumps and one valiant fire engine.	About 3,000 bales of jute in a corrugated iron shed.
17th „ ...	11-16 A.M.	Hooghly Hydraulic Press, Chitpur.	Jute Press ...	Four motor pumps, two steam fire engines, one valiant engine and one fire float.	A big sorting and storing godown with a large quantity of baled and loose jute.
27th „ ...	1-34 P.M.	Allen Brothers' Canvas Factory	Factory ...	Two motor pumps.	A large canvas factory containing machineries, etc. Building and contents severely damaged.
31st „ ...	4-40 P.M.	K. P. Roy Lane, Tollygunge.	Dwelling huts	One motor pump	Nine tiled huts used as dwellings severely damaged by fire and water.
2nd „ ...	6-47 A.M.	SS. "Astronomer"	Ship ...	Ship's appliances	About 12,000 drums of bleaching powder in No. 2 hold in a damaged condition giving off large volumes of chlorine gas.
3rd „ ...	10-12 A.M.	Bengal Cotton Mill, Garden Reach.	Cotton Mill	Mill's appliances	A quantity of spinning machinery including belting cotton and woodwork slightly damaged.
18th June ...	6-51 A.M.	15-G, Lindsay Street.	Film store ...	One motor pump	A film store containing about 200 reels of films. Films partially destroyed, and office furniture damaged by fire and water.
30th July ...	9-36 A.M.	18-1, Lower Chitpur Road.	Bookseller's shop.	One motor pump	Bookstore on the third storey of a brick-built building. A large quantity of books, book-cases, etc., destroyed by fire and water.
17th August ...	5-55 P.M.	Atlas Press, Chitpur.	Jute Press ...	Three motor pumps, 2 steam fire engines and 1 motor turntable ladder.	A brick-built two-storeyed godown about 200' × 70' containing about 200 bales of loose jute on the upper floor and 18,000 bales of kutcha jute on the ground floor. Building severely damaged, Roof and floor collapsed and portion of wall collapsed.
7th September	5-20 P.M.	Baranagore South Mill.	Jute Mill ...	One motor pump mill hydrants.	A brick-built single-storeyed godown containing about 8,000 *pucca* bales of jute. Building slightly damaged by fire and water.
15th „ ...	8-41 P.M.	Allied Cotton and Dyeing Works, Garden Reach.	Cotton Mill ...	Two motor pumps and one valiant fire engine.	About 120 bales of cotton, four hopper feeding machines, travelling lattice, etc., on the first floor of a two-storeyed brick building about 250' × 120' damaged by fire and water.
30th „ ...	.....	Richardson Printing Ink Co., Howrah.	Ink Factory ...	One motor pump and one steam fire engine.	A corrugated iron lean-to shed containing quantity of linseed oil, two electric motors, etc. Contents and building damaged by fire and water.
12th October ...	10-33 P.M.	No. 5 Jetty, Strand Road.	Warehouse ...	Three motor pumps and one fire float and dock hydrants.	A brick-built corrugated iron shed about 500' × 250' containing goods. Building and contents badly damaged.
17th „ ...	7-39 P.M.	Barnagore Jute Mill.	Jute Mill ...	Three motor pumps and one steam firecngine and mill hydrants.	A re-inforced concrete godown, containing about 4,500 bales of gunny bags. Building and contents severely damaged by fire and water.
